SAIC

Business Development Dossier

Industry	**Defense / Government IT Services**
Revenue	**$7.2B**
Employees	**24,000**
Ideal Customer Profile Score	**80**

ICP SCORING MODEL

`ICP = Signals + Revenue + Employees + Fit   (max 100)`

Signals (0-35)	Top 4 signals scored; each = base(60%) + recency bonus <30d: 40% | <90d: 30% | <180d: 20% | older: 10%
Revenue (0-25)	$500M-$10B sweet spot -> 70-100% of 25 pts Below $500M -> pro-rata x 0.5 | Above $10B -> 60%
Employees (0-20)	2,000+ preferred (70-100%) | 500-2K partial (50-70%) Below 500 -> pro-rata x 0.3
Fit (0-20)	High-fit types: reorg, transformation, M&A, hiring, funding, partnership -> 5 pts ea (max 12) + diversity 2/type (max 8)

Prepared March 19, 2026

McChrystal Group

Leadership Advisory & Organizational Effectiveness

SECTION 1

Organization Snapshot

Legal Name	Science Applications International Corporation
Headquarters	Reston, Virginia
Founded	1969
Ownership	Public (NASDAQ: SAIC). Fortune 500.

Footprint

40+ U.S. states. Major hubs: Northern Virginia/DC, Huntsville AL, San Diego CA. Limited international (UK MOD, Australia, Canada via subcontracts).

SECTION 1b

Company Overview

Science Applications International Corporation (SAIC) is a Fortune 500 technology integrator providing IT modernization, engineering services, and mission solutions to the U.S. government. The company supports defense, intelligence, and civilian agencies across their digital transformation initiatives.

SECTION 2

Financial Health & Growth Stage

Understanding SAIC's financial position and trajectory is critical to framing any engagement conversation.

Revenue: FY2025 $7.48B (+3.1% organic) -> FY2026 declining ~5.6% YoY. Q3 FY2026 $1.87B. Adj. EBITDA margin 9.9% (expanding despite revenue pressure). FCF >$550M. Backlog $23.8B (1.2x book-to-bill). Consensus: 3 Buy / 5 Hold. Citi target $133. Pressures: DOGE procurement delays, revenue contraction. Tailwinds: $23.8B backlog, SilverEdge acquisition, strong cash generation.

SECTION 3

Leadership Team Profiles

The following contacts are recommended as primary outreach targets - champion-level leaders who feel the organizational pain daily and can sponsor McChrystal internally.

Jim Reagan - CEO [PRIORITY TARGET]

Nearly 40 years in defense/gov services. Former EVP & CFO at Leidos. SAIC board since Jan 2023.

Outreach rationale: New permanent CEO actively reshaping organization. 'Speed, flexibility, efficiency' language maps directly to Team of Teams. First 100 days = optimal engagement window.

John K. Tien Jr. - Board Member [PRIORITY TARGET]

U.S. Army veteran. Former Deputy Secretary of DHS. West Point graduate. Three combat tours in Iraq.

Outreach rationale: Military background creates natural affinity with McChrystal Group. Board-level champion/connector.

Additional leadership team members relevant to the engagement:

Prabu Natarajan - EVP & CFO

Oversees all financial activities including IR

Barbara Supplee - EVP, Army Navy Business Group (ANG)

Joined 2023; previously VP/GM at GDIT Navy & Marine Corps

Vinnie DiFronzo - EVP, Air Force, Space & Intelligence Group (AFSI)

Deborah Torosian - SVP & Chief Talent Officer

Recent hire - signals leadership attention to workforce/culture challenges

David Urban - Board Member

West Point Class of 1986. Chairman of American Battle Monuments Commission.

SECTION 4

Organizational Culture & Structure

Culture and structure are often where McChrystal Group finds the deepest leverage. The following signals indicate how SAIC operates today and where friction exists.

Organizational Structure

Consolidated from 5 business groups to 3 (ANG, AFSI, Civilian) effective Jan 31, 2026. CTO role merged with Chief Growth Officer. New Chief Talent Officer hired.

Culture Signals

Glassdoor 3.9/5.0 (4,822 reviews); 79% recommend. Work-life balance 4.2. Named to Glassdoor 2026 Best Places to Work. Positives: flexible work, growth opportunities. Negatives: management concerns (workload, favoritism), contract-based job insecurity, bureaucratic processes. Gap between 'Best Places to Work' and management complaints suggests inconsistency across business units - hallmark of siloed organizations.

SECTION 5

Recent News & Trigger Events

The following developments from the past 18 months create urgency and provide natural conversation entry points for engaging SAIC.

1. **2025-10-23 - CEO Townes-Whitley departs after 2 years; Reagan named Interim CEO**
   C-suite disruption = prime window for leadership advisory. New CEO must establish credibility and unify.
2. **2025-11-13 - 5 business groups consolidated to 3; three senior leaders and Chief Innovation Officer depart**
   Structural overhaul with significant leadership churn. Team of Teams and cross-functional alignment highest impact.

3. 2025-10-15 - SAIC acquires SilverEdge Government Solutions for $205M
Post-acquisition integration of agile software company into 24,000-person org.

4. 2026-02-17 - Jim Reagan appointed permanent CEO after 4-month search
First 100 days as permanent CEO = optimal engagement window.

5. 2025-12-04 - Q3 FY2026: revenue declines 5.6% despite EPS beat
Revenue pressure from DOGE creates urgency to optimize operations and win rates.

6. 2025-09-01 - DOGE-driven federal procurement delays and personnel turnover
External disruption forcing adaptation. VUCA environment - McChrystal's core thesis.

7. 2025-12-01 - Major contract wins: $1.4B Pentagon, $928M HOPE 2.0, $242M Navy
Winning big, but execution across reorganized groups becomes critical.

SECTION 6

McChrystal Fit Assessment

> *Textbook. Tier 1 industry, $7.5B revenue (sweet spot), 24K+ employees, active CEO transition, reorg, acquisition, DOGE disruption, board loaded with military leaders. Timing exceptional: new permanent CEO Feb 2026.*

Primary Problem

24,000-person defense/IT firm navigating simultaneous CEO transition, 5-to-3 group consolidation, post-acquisition integration (SilverEdge), and DOGE-driven market disruption. Needs to move faster, break silos, create shared consciousness across distributed workforce.

Best McChrystal Capability Fit

Team of Teams - directly addresses 5-to-3 consolidation. Leadership development - new CEO, new group leaders, executive departures. Cross-functional alignment - CTO/CGO merger, talent officer hire, innovation office restructuring. Post-acquisition integration - SilverEdge (small, agile) into SAIC (large, matrixed).

Likely Objections to Engagement

We already have military DNA
Just reorganized - need to let changes settle
Budget pressure makes discretionary consulting tough

Competitive Advisory Landscape

Booz Allen Hamilton - direct competitor in gov IT, unlikely hired as advisor
McKinsey/BCG - strategy/org design but lack military credibility
Korn Ferry - leadership assessment
McChrystal advantage: military heritage + instant credibility with board (two West Point graduates)

SECTION 7

Conversation Entry Points

These questions are designed for a Senior Partner's first conversation. Each opens a thread that naturally leads to McChrystal Group's capabilities without a direct pitch.

1. You've consolidated five groups into three and stated the goal is 'speed, flexibility, and efficiency.' The hardest part isn't the new org chart - it's getting the Army group and Navy group to actually operate as one team. How are you building shared consciousness across merged groups?

2. SilverEdge was a 200-person software shop built for agility. SAIC is 24,000 people optimizing for scale. What's your integration philosophy - protecting SilverEdge's DNA or assimilating them?

3. You both know from military service that the hardest transitions are combining units with different operational tempos. General McChrystal faced the same challenge getting Army, Navy, Air Force, and CIA operating as one force in Iraq. We've codified those lessons.

Direct at board members Tien or Urban

Recommended Meeting Framing

Position around 'operating model for the next chapter' - Reagan is building, not repairing. Frame as partner in designing how reorganized SAIC should operate. Lead with Team of Teams as proven model for military-to-corporate transformation. Avoid positioning as response to Townes-Whitley departure.

SECTION 8

Brand Insights & Market Positioning

Brand strategy reveals organizational priorities and coordination challenges. The following analysis connects SAIC's market positioning to potential McChrystal engagement opportunities.

Brand Value & Competitive Standing: SAIC is a top-10 U.S. defense and government IT contractor with strong brand recognition in the federal market. The brand stands for technical expertise, mission understanding, and cleared personnel - critical differentiators in government contracting. SAIC competes against Leidos, Booz Allen Hamilton, CACI, and ManTech for major federal contracts.

Brand Identity Evolution: SAIC has undergone significant brand transformation since the 2013 split into SAIC and Leidos. The current SAIC repositioned from a pure IT services company to a "technology integrator" combining IT, engineering, and mission solutions. The SilverEdge acquisition added advanced intelligence capabilities, further evolving the brand toward higher-value national security solutions.

Marketing Leadership & Strategy: SAIC's marketing is primarily B2G (business-to-government) - focused on contract wins, past performance citations, and capabilities demonstrations. The brand is less consumer-visible but highly influential in federal procurement. Key marketing channels: government industry events (AFCEA, AUSA), thought leadership, and executive visibility.

Brand Threats: DOGE-driven federal spending uncertainty threatens the entire government contracting ecosystem. If major programs are cut or consolidated, SAIC's revenue base is directly at risk. Additionally, competitors with stronger commercial portfolios (Accenture Federal) may weather government spending volatility better.

Major Brand Investments: The SilverEdge acquisition was a brand investment in national security/intelligence capabilities. SAIC's digital transformation practice and AI/ML solutions are brand extensions into higher-margin growth areas.

McChrystal Connection: SAIC's brand in the defense market aligns naturally with McChrystal's military background. The organizational challenge - consolidating from 5 to 3 business groups while integrating SilverEdge and navigating DOGE uncertainty - requires the kind of mission-focused organizational discipline that McChrystal's Team of Teams model embodies. The defense sector connection creates a warm introduction pathway.

SECTION 9

Deep McChrystal Group Fit Analysis

This is the strategic case for pursuing SAIC. It synthesizes findings from all previous sections into a comprehensive engagement thesis with specific fit dimensions, expected outcomes, stakeholder mapping, and a phased pursuit strategy.

9a. Fit Dimensions

Fit Dimension 1: Organizational Consolidation Under Uncertainty

SAIC is consolidating from 5 business groups to 3 while simultaneously integrating the SilverEdge acquisition and navigating DOGE-driven federal spending uncertainty. Each of these would be a major organizational initiative alone; together they create compounding complexity. McKinsey's defense practice advises on portfolio strategy; McChrystal builds the operating model that executes a 3-group structure while managing the political uncertainty that could reshape the entire business.

Fit Dimension 2: CEO Transition Execution

New CEO Jim Reagan must establish his leadership while executing the consolidation, integration, and DOGE navigation simultaneously. McChrystal's leadership team alignment methodology accelerates CEO effectiveness - building shared operating norms and decision-making frameworks for the new leadership team faster than organic team-building allows.

Fit Dimension 3: Defense Sector Cultural Alignment

SAIC's culture blends military precision (many employees are former DoD) with technology innovation. McChrystal's military background creates immediate cultural credibility that no civilian consulting firm can match. This isn't marketing - it's a genuine capability advantage in an organization where military service is the dominant cultural reference point.

Fit Dimension 4: DOGE Navigation as Organizational Agility Challenge

DOGE creates unprecedented uncertainty in federal contracting - programs may be cut, consolidated, or restructured with little warning. SAIC needs organizational agility to rapidly reallocate resources, pursue new opportunities, and protect critical contracts. McChrystal's adaptive operating model - designed for exactly this kind of volatile, uncertain environment (VUCA) - is the direct capability fit.

9b. Cumulative Case - Why SAIC Is a Top Pipeline Opportunity

SAIC is the most natural McChrystal prospect in the pipeline - a defense/IT firm with military DNA, navigating organizational consolidation, CEO transition, post-acquisition integration, and DOGE uncertainty simultaneously. Signal chain: CEO transition -> 5-to-3 group consolidation -> SilverEdge integration -> DOGE uncertainty -> 24,000 employees needing direction. McChrystal's defense sector credibility, military cultural alignment, and VUCA operating model expertise create an unchallengeable competitive advantage. Revenue potential: $500K initial (consolidation operating model + DOGE agility framework), $1.5M-$2M deployment, $500K ongoing. Total: $2.5M-$3.5M over 24 months.

9c. Enterprise Issues & Organizational Challenges

1. 5-to-3 Group Consolidation: Merging 5 business groups into 3 requires redefining leadership roles, eliminating redundancies, realigning customer relationships, and rebuilding P&L accountability - all while maintaining contract performance across thousands of active programs.

2. SilverEdge Cultural Integration: SilverEdge's intelligence/national security culture is different from SAIC's IT services culture. Integration must preserve SilverEdge's specialized capabilities while connecting them to SAIC's scale and customer relationships.

3. CEO Transition Authority Building: Jim Reagan must build credibility with 24,000 employees, key government customers, and board members while executing the consolidation. Every organizational decision is both an operational choice and a leadership signal.

4. DOGE Uncertainty Response: Federal spending uncertainty requires scenario planning, rapid resource reallocation, and defensive positioning - organizational capabilities that SAIC's steady-state operating model may not support.

5. Cleared Personnel Retention: SAIC's competitive advantage is its cleared workforce. Organizational uncertainty (consolidation, CEO change, DOGE) creates flight risk among the most valuable and hardest-to-replace employees.

6. Contract Recompete Pressure: Major contracts are constantly up for recompete. Organizational distraction from internal transformation reduces the quality and speed of proposal responses - directly threatening revenue.

7. Board Member John Tien (Military Background): Board member with military background creates a natural McChrystal connection point and potential champion for engagement.

9d. Expected Outcomes from McChrystal Group Engagement

1. 3-Group Operating Model: Design and implement the operating rhythm for the consolidated 3-group structure. Measurable: new group structure fully operational within 6 months with zero unplanned contract disruptions.

2. SilverEdge Integration Acceleration: Cross-functional coordination for intelligence capabilities integration. Measurable: SilverEdge revenue synergies on-track within first year.

3. DOGE Agility Framework: Scenario-based operating model enabling rapid resource reallocation. Measurable: response time to federal program changes reduced by 50%.

4. CEO Transition Effectiveness: Leadership alignment program for Reagan and the new 3-group leadership team. Measurable: leadership team alignment scores established and improving.

5. Talent Retention During Transformation: Organizational stability framework protecting cleared personnel retention. Measurable: voluntary attrition of cleared employees below 8%.

6. Contract Recompete Excellence: Organizational discipline ensuring proposal quality is maintained during transformation. Measurable: recompete win rate maintained at or above historical levels.

9e. Key Stakeholders & Business Unit Map

CEO

Leader: Jim Reagan
Function: Enterprise leadership, CEO transition
McChrystal Relevance: Executive sponsor

CFO

Leader: Prabu Natarajan, EVP & CFO
Function: Financial consolidation, DOGE impact
McChrystal Relevance: Budget gatekeeper

Army Navy Group

Leader: Barbara Supplee, EVP
Function: Military customer relationships
McChrystal Relevance: Priority: Consolidation execution

Air Force Space Intel

Leader: Vinnie DiFronzo, EVP
Function: National security, SilverEdge integration
McChrystal Relevance: Priority: Integration + consolidation

Talent

Leader: Deborah Torosian, SVP & CTO
Function: Cleared personnel retention, culture
McChrystal Relevance: Change management

Board

Leader: John K. Tien Jr.
Function: Military background, governance
McChrystal Relevance: Warm intro: Military connection to McChrystal

Board

Leader: David Urban
Function: Government/political connections
McChrystal Relevance: DOGE navigation insight

9f. Opportunity Thesis

Strategic Signal Convergence - Why Now: CEO transition -> 5-to-3 consolidation -> SilverEdge integration -> DOGE uncertainty -> all converging in 2026. The organizational complexity is at its peak. DOGE adds an external forcing function that makes organizational agility existentially important.

The Structural Paradox - Why McChrystal, Not McKinsey: McKinsey's defense practice advises on portfolio strategy and M&A integration. Booz Allen competes directly (can't advise). But McChrystal brings something no consulting firm can match in the defense sector: genuine military operational credibility. General McChrystal commanded the organizations that SAIC supports. The cultural bridge is authentic, not manufactured. This creates trust and access that no RFP can replicate.

Phased Engagement Hypothesis - Land and Expand:

- Phase 1 (Months 1-3, $400K-$500K): 3-Group Operating Model Design + DOGE Agility Framework - map the new organizational structure, design the operating cadence, and build scenario-based response capabilities. Beachhead: the consolidation itself - visible, urgent, and affecting every employee.
- Phase 2 (Months 4-9, $800K-$1.2M): Enterprise deployment - SilverEdge integration, talent retention, contract recompete excellence.
- Phase 3 (Months 10-24, $500K retainer): Ongoing transformation management, DOGE adaptation, and CEO effectiveness coaching.

Competitive Displacement Strategy: Don't enter through the procurement channel (SAIC buys services through contracting, which is slow and commoditizing). Enter through the executive/board relationship - John Tien (board member, military background) is the warm introduction vector. Position McChrystal as a strategic advisor to the CEO, not a consulting vendor to procurement.

Multi-Threaded Pursuit Map:

- Thread 1: Barbara Supplee (EVP, Army Navy Group) or Vinnie DiFronzo (EVP, AFSI) - consolidation execution. Angle: "How is the 5-to-3 consolidation affecting your group's ability to win recompetes?"
- Thread 2: Deborah Torosian (SVP, Chief Talent Officer) - talent retention during transformation. Angle: "How are you retaining cleared personnel when the organization is in flux and DOGE creates uncertainty about program futures?"
- Thread 3: John Tien (Board Member) - military connection. General McChrystal and John Tien likely share military network connections. A personal introduction at the board level creates executive sponsorship for the engagement.
- Warm Introduction Vectors: Military/veteran network (McChrystal -> Tien); defense industry events (AUSA, AFCEA); SAIC's military advisory relationships; former JSOC/SOF personnel at SAIC.
