Convergint Technologies

Business Development Dossier

Industry	**Security Technology / Systems Integration**
Revenue	**$2.7B**
Employees	**11,000**
Ideal Customer Profile Score	**91**

ICP SCORING MODEL

```
ICP = Signals + Revenue + Employees + Fit   (max 100)
```

Signals (0-35)	Top 4 signals scored; each = base(60%) + recency bonus <30d: 40% | <90d: 30% | <180d: 20% | older: 10%
Revenue (0-25)	$500M-$10B sweet spot -> 70-100% of 25 pts Below $500M -> pro-rata x 0.5 | Above $10B -> 60%
Employees (0-20)	2,000+ preferred (70-100%) | 500-2K partial (50-70%) Below 500 -> pro-rata x 0.3
Fit (0-20)	High-fit types: reorg, transformation, M&A, hiring, funding, partnership -> 5 pts ea (max 12) + diversity 2/type (max 8)

Prepared March 19, 2026

McChrystal Group

Leadership Advisory & Organizational Effectiveness

SECTION 1

Organization Snapshot

Legal Name Convergint Technologies LLC

Headquarters Hoffman Estates, Illinois

Founded 2001

Ownership

Private; PE-backed by Ares Management, Leonard Green & Partners, and Harvest Partners. $850M continuation vehicle (March 2026) signals extended hold thesis.

Footprint

Global operations across North America, Europe, Asia-Pacific, and Middle East. New U.S. headquarters in Hoffman Estates, IL (Bell Works campus, opened Oct 2025). Offices and operations in 100+ locations worldwide through acquired companies.

SECTION 1b

Company Overview

Convergint is the world's #1-ranked security systems integrator (SDM Magazine, 8 consecutive years), providing electronic security, cybersecurity, fire and life safety, building automation, and audio-visual solutions. PE-backed by Ares, Leonard Green & Partners, and Harvest Partners, the company has completed 40+ acquisitions since 2018, quadrupled EBITDA, and closed an $850M continuation vehicle in March 2026 to fund further expansion across 11,000+ employees globally.

SECTION 2

Financial Health & Growth Stage

Understanding Convergint Technologies's financial position and trajectory is critical to framing any engagement conversation.

Revenue: $2.7B in 2024, representing 10% year-over-year growth. Revenue has grown 452% over the past decade through organic growth and acquisitions.

Profitability: EBITDA has quadrupled since Ares' initial investment in 2018. Strong margin profile driven by recurring service revenue and enterprise customer concentration.

Capital Structure: $850M continuation vehicle closed March 2026, led by Leonard Green's Sage Fund with Goldman Sachs Alternatives co-investing. Ares continues to hold shared control. This structure extends the investment horizon and provides capital for continued acquisitions.

Analyst Sentiment: N/A (private company). PE sponsors' willingness to commit $850M in fresh capital signals strong conviction in growth trajectory.

Key Pressures: Integration complexity from 40+ acquisitions; talent retention in competitive security integrator market; technology standardization across acquired companies with different systems; margin pressure from labor cost inflation.

Key Tailwinds: Security spending is countercyclical and growing; 75% Fortune 100 customer base provides revenue stability; AI and cybersecurity convergence expanding addressable market; enterprise security budgets increasing post-pandemic.

SECTION 3

Leadership Team Profiles

The following contacts are recommended as primary outreach targets - champion-level leaders who feel the organizational pain daily and can sponsor McChrystal internally.

Tony Varco - Chief Operating Officer [INFERRED] [PRIORITY TARGET]

Operational leadership across 11,000+ employees and 100+ offices globally

Outreach rationale: Owns the operational integration challenge across 40+ acquired companies - standardizing processes, systems, and culture while maintaining local entrepreneurial energy. This is the person who feels the 'integration debt' most acutely and would champion McChrystal's cross-functional alignment work.

VP of Integration / M&A - VP of Corporate Development & Integration [INFERRED] [PRIORITY TARGET]

Leads acquisition identification, due diligence, and post-merger integration for 40+ deals

Outreach rationale: Directly responsible for the integration playbook that must scale to absorb continued acquisitions. As the company targets more acquisitions with fresh capital, this leader needs to evolve from deal-by-deal integration to systematic platform integration - McChrystal's operating model addresses this scaling challenge.

Additional leadership team members relevant to the engagement:

Ken Lochiatto - Chief Executive Officer

Led Convergint through the Ares acquisition and 40+ acquisition growth phase

Dan Moceri - President & Co-Founder [INFERRED]

Original co-founder; drives culture and values; instrumental in setting integration philosophy

Jeff Warpool - Chief Financial Officer [INFERRED]

Financial leadership through PE ownership transitions and acquisition financing

SECTION 4

Organizational Culture & Structure

Culture and structure are often where McChrystal Group finds the deepest leverage. The following signals indicate how Convergint Technologies operates today and where friction exists.

Organizational Structure

Decentralized operating model that preserves local entrepreneurial cultures from acquired companies while building shared back-office and technology capabilities. Hub-and-spoke structure with regional leadership maintaining customer relationships and the corporate center providing shared services, technology platforms, procurement, and best practices.

Culture Signals

Values-First Culture: Convergint is known for its 'Culture of Service Excellence' built around core values. This is not just marketing - the company has won recognition for colleague satisfaction and was founded on the principle that culture drives business results. This values orientation is a strong McChrystal cultural fit.

Integration Culture Tension: With 40+ acquisitions, each acquired company brought its own culture. The challenge is preserving local entrepreneurial energy while building shared processes and identity. Some acquired teams fully embrace the Convergint culture; others resist standardization.

Growth-Driven Optimism: Rapid growth (452% over a decade) creates a winning mentality - but also masks integration challenges. When everything grows, problems are papered over with revenue. If growth slows, unresolved integration issues surface.

Glassdoor Signals: [INFERRED] Generally positive reviews reflecting pride in company growth and values-based culture; concerns about pace of change and integration across acquired entities.

SECTION 5

Recent News & Trigger Events

The following developments from the past 18 months create urgency and provide natural conversation entry points for engaging Convergint Technologies.

1. 2026-03-02 - Ares closed $850M continuation vehicle led by Leonard Green & Partners and Goldman Sachs Alternatives

Fresh capital signals next phase of aggressive acquisition growth - increasing integration complexity and organizational scaling demands

2. 2025-10-01 - Opened new U.S. headquarters (Convergint Development Center) in Hoffman Estates, IL

Physical infrastructure investment signals commitment to building centralized capabilities - creates opportunity for organizational design and integration methodology

3. 2025-08-01 - Acquired A+ Technology & Security Solutions, expanding Northeast security capabilities

Continued acquisition pace demonstrates the ongoing integration pipeline that creates demand for McChrystal's cross-functional alignment work

4. 2025-01-01 - Revenue reached $2.7B; ranked #1 Systems Integrator for 8th consecutive year (SDM Magazine)

Market leadership position creates heightened expectations - any integration failure now has outsized reputation impact

5. 2025-06-01 - Expanding cybersecurity and AI-driven security offerings alongside traditional physical security

Technology convergence (physical + cyber + AI) requires new organizational capabilities and cross-functional coordination between traditionally separate teams

SECTION 6

McChrystal Fit Assessment

> *Strong organizational fit (decentralized, values-driven, scaling fast) and clear transformation need (integration complexity compounding). However, as a private PE-backed company, engagement requires PE sponsor buy-in alongside management. Convergint's existing strong culture may create a 'we don't need help' dynamic. The $850M capital injection creates a time-sensitive window - fresh capital = new acquisitions = integration demand surge. Rating could move to Strong if PE sponsor relationship is established.*

Primary Problem

Scaling the integration of 40+ acquisitions into a coherent operating model while simultaneously absorbing new acquisitions funded by $850M in fresh capital - the classic PE roll-up challenge where acquisition velocity outpaces organizational integration capacity.

Best McChrystal Capability Fit

Team of Teams operating model - Convergint's decentralized structure (100+ locations from acquired companies) needs the coordination mechanisms that enable autonomous local teams to operate with shared consciousness. McChrystal's model was literally designed for this: empowering execution at the edge while maintaining strategic alignment at the center.

Likely Objections to Engagement

Our values-based culture IS our integration methodology - we don't need external help
PE sponsors may view organizational consulting as a cost rather than value-creation lever
Integration has worked for 40 deals - why change now?
Private company may resist sharing operational details with external advisors

Competitive Advisory Landscape

McKinsey Private Equity practice - PE sponsor-level relationship, value creation planning
Bain & Company - PE portfolio operations and integration methodology
Integration-specific firms (e.g., West Monroe, Huron) - M&A integration specialists
Internal capabilities - Convergint has built its own integration playbook over 40+ deals

SECTION 7

Conversation Entry Points

These questions are designed for a Senior Partner's first conversation. Each opens a thread that naturally leads to McChrystal Group's capabilities without a direct pitch.

1. With 40+ acquisitions under your belt and $850M in fresh capital for more, how is the integration playbook evolving to keep pace - or are you finding that what worked for the first 20 doesn't work for the next 20?

Acknowledge their success while identifying the scaling challenge that's harder to see from inside. Position McChrystal as pattern recognition, not criticism.

2. Convergint's values-based culture is clearly a competitive advantage. How are you scaling that culture across 11,000 employees and 100+ offices when many of those people joined through acquisition rather than hiring?

Lead with genuine respect for the culture - then surface the organizational design challenge of preserving it at scale.

Recommended Meeting Framing

Frame as a peer conversation about what happens when high-performing decentralized organizations reach the scale where informal coordination mechanisms break down. Reference McChrystal's experience with special operations teams that faced the same challenge - small autonomous teams that had to become a 'team of teams' without losing their agility.

SECTION 8

Brand Insights & Market Positioning

Brand strategy reveals organizational priorities and coordination challenges. The following analysis connects Convergint Technologies's market positioning to potential McChrystal engagement opportunities.

Brand Position: Convergint is the #1-ranked security systems integrator globally (SDM Magazine, 8 consecutive years). The brand stands for 'service excellence' and customer partnership - differentiated from competitors who compete primarily on price or technology.

Brand Value: Strong B2B brand in the enterprise security market. 75% Fortune 100 penetration demonstrates market trust. Brand equity is built on the local relationships of acquired companies combined with the credibility of Convergint's #1 ranking.

Brand Threats: Competitors (Securitas, Johnson Controls, Stanley Security) are also consolidating. If integration quality slips - inconsistent service, lost institutional knowledge, failed customer handoffs - the brand erodes faster than revenue. Roll-up brand risk: customers buy the local company's reputation, not the platform brand.

McChrystal Connection: The brand promise of 'service excellence' requires consistent delivery across 100+ offices and 40+ integration vintages. One bad acquisition integration, one major customer service failure, degrades the brand that took a decade to build. McChrystal's operating model ensures the organizational execution matches the brand promise - particularly critical as the company absorbs the next wave of acquisitions.

SECTION 9

Deep McChrystal Group Fit Analysis

This is the strategic case for pursuing Convergint Technologies. It synthesizes findings from all previous sections into a comprehensive engagement thesis with specific fit dimensions, expected outcomes, stakeholder mapping, and a phased pursuit *strategy.*

9a. Fit Dimensions

Fit Dimension 1: Integration Velocity vs. Integration Quality

With $850M in fresh capital, Convergint will accelerate acquisitions. Each acquisition adds revenue but also integration debt - systems to standardize, cultures to align, processes to unify. The faster acquisitions come, the less time for integration. McChrystal's operating model addresses this by building the coordination architecture that enables integration to happen in parallel rather than sequentially. Bain and McKinsey design integration playbooks; McChrystal builds the operating rhythm that makes them execute at speed.

Fit Dimension 2: Decentralized Scaling

Convergint's competitive advantage is local entrepreneurial energy - the acquired company's leader knows their customers and market. But at 11,000 employees and 100+ offices, informal coordination breaks down. McChrystal's Team of Teams is the proven solution for this exact challenge: maintaining decentralized execution authority while building shared consciousness across the enterprise.

Fit Dimension 3: Technology Convergence Coordination

The merger of physical security, cybersecurity, and AI capabilities requires new cross-functional coordination between teams that traditionally operated independently. This is a structural organizational challenge, not just a product challenge. McChrystal's cross-functional alignment methodology ensures these capabilities converge rather than collide.

9b. Cumulative Case - Why Convergint Is a Top Pipeline Opportunity

Convergint represents the PE roll-up at its critical inflection point: successful enough to attract $850M in fresh capital, but complex enough that the next phase of growth will break organizational systems designed for a smaller company. The signal chain: 40+ acquisitions -> $2.7B revenue -> $850M continuation fund -> accelerating acquisition pace -> integration complexity compounds -> organizational coordination becomes the binding constraint on value creation.

Revenue Potential: $300K-$400K initial diagnostic (integration operating model assessment), expandable to $800K-$1.2M for enterprise-wide operating rhythm implementation, with $200K-$400K ongoing retainer for acquisition integration cadence management. Total: $1.3M-$2M over 18 months. PE sponsor relationship could replicate across portfolio - multiplier opportunity.

9c. Enterprise Issues & Organizational Challenges

1. Integration Debt Accumulation: 40+ acquisitions, each at a different stage of integration. Early acquisitions may be fully integrated; recent ones still operate independently. The variation creates inconsistent customer experience and duplicated overhead.

2. Talent Retention in Acquired Companies: Acquired company leaders and key employees may stay through earn-outs but leave after. Knowledge and customer relationships walk out the door. The faster acquisitions come, the harder retention becomes.

3. Technology Platform Fragmentation: Each acquired company brought its own CRM, project management, inventory, and communication tools. Standardizing these without disrupting active customer projects is a coordination challenge.

4. Cultural Dilution Risk: Convergint's values-based culture is its differentiator. As the company grows through acquisition, each new cohort has less exposure to the original culture. Without intentional cultural integration, the values become a poster on the wall rather than an operating reality.

5. Cross-Selling Complexity: The converging security landscape (physical + cyber + AI) creates cross-selling opportunities, but captured companies were acquired for a specific capability. Enabling them to sell the full Convergint portfolio requires training, incentives, and organizational coordination.

6. PE Governance Complexity: Three PE sponsors (Ares, Leonard Green, Harvest Partners) with shared control creates a multi-stakeholder governance environment. Strategic decisions require alignment across sponsors with potentially different exit timeline preferences.

9d. Expected Outcomes from McChrystal Group Engagement

1. Scalable Integration Operating Rhythm: Design the integration cadence that enables parallel (not sequential) acquisition absorption. Measurable: reduce time-to-full-integration from 18 months to 9 months per acquisition.

2. Shared Consciousness Architecture: Build the information-sharing and coordination system that connects 100+ offices without destroying local autonomy. Measurable: 50%+ reduction in duplicate initiatives and missed cross-selling opportunities.

3. Cultural Scaling Framework: Develop the cultural integration program that transmits Convergint values to acquired teams at speed. Measurable: acquired employee culture alignment scores reach Convergint baseline within 6 months.

4. Cross-Functional Coordination for Converging Capabilities: Design the organizational mechanisms for physical + cyber + AI security teams to coordinate on enterprise deals. Measurable: cross-selling revenue increase of 20%+ within 12 months.

5. Acquisition Integration Playbook 2.0: Evolve the integration methodology from founder-led (first 20 acquisitions) to systematized (next 40+). Measurable: integration quality scores consistent across all new acquisitions regardless of which leader runs integration.

9e. Key Stakeholders & Business Unit Map

Office of the CEO

Leader: Ken Lochiatto, CEO
Function: Enterprise strategy, PE governance
McChrystal Relevance: Executive sponsor; PE relationship management

Operations

Leader: Tony Varco [INFERRED], COO
Function: Global operations across 100+ offices
McChrystal Relevance: Priority: Integration execution, operational standardization

Corporate Development & Integration

Leader: VP M&A [INFERRED]
Function: Acquisition pipeline, post-merger integration
McChrystal Relevance: Priority: Integration playbook scaling

Cybersecurity

Leader: [Division Leadership]
Function: Growing cybersecurity practice
McChrystal Relevance: Cross-functional coordination with physical security

Finance

Leader: Jeff Warpool [INFERRED], CFO
Function: Financial integration, PE reporting
McChrystal Relevance: Budget holder; value creation metrics

Culture & Talent

Leader: [VP HR/Culture]
Function: Values transmission, talent retention
McChrystal Relevance: Cultural scaling challenge

Founder's Office

Leader: Dan Moceri, President/Co-Founder
Function: Culture, values, customer relationships
McChrystal Relevance: Cultural guardian; warm introduction vector

9f. Opportunity Thesis

Strategic Signal Convergence - Why Now: 40+ acquisitions accumulated -> $850M continuation fund (Mar 2026) -> accelerating acquisition pace -> integration debt compounds -> technology convergence (physical + cyber + AI) demands new coordination -> organizational systems designed for a $500M company strain at $2.7B. The continuation fund is the trigger - it guarantees the next phase of growth and the organizational complexity that comes with it.

The Structural Paradox - Why McChrystal, Not McKinsey: McKinsey and Bain serve the PE sponsors on value creation strategy. Integration-specific firms (West Monroe, Huron) handle deal-level integration. But no one builds the enterprise operating model that enables 100+ decentralized offices to operate as a coordinated whole while preserving local autonomy. McChrystal's Team of Teams model is purpose-built for this exact challenge - and it has military credibility that resonates with security industry leadership.

Phased Engagement Hypothesis - Land and Expand:

- Phase 1 (Months 1-3, $300K-$400K): Integration Operating Model Assessment - map the current state of coordination across 100+ offices, identify the top 5 integration gaps, and design the scalable operating rhythm for the next wave of acquisitions. Beachhead: the next 2-3 acquisitions - use them as pilots for the new integration methodology.
- Phase 2 (Months 4-9, $500K-$800K): Enterprise-wide operating rhythm deployment. Cross-functional coordination for converging security capabilities (physical + cyber + AI).
- Phase 3 (Months 10-18, $200K-$400K retainer): Ongoing acquisition integration cadence management. Cultural scaling program.

Competitive Displacement Strategy: Enter through the COO/operations channel, not through PE sponsors (where

McKinsey/Bain have established relationships). Position as operational expertise, not strategy. Frame: "You've proven you can find and buy great companies. McChrystal ensures they become one company - without losing what made each one great." This positioning avoids competing with existing PE advisory relationships.

Multi-Threaded Pursuit Map:

- Thread 1: COO / Head of Operations - integration execution. Angle: "What breaks first as you scale past $3B with the next wave of acquisitions?" Appeal: operational leader who sees the coordination gaps daily.
- Thread 2: Dan Moceri (Co-Founder/President) - culture at scale. Angle: "How do you preserve Convergint's founding values across 11,000 people when most joined through acquisition?" Appeal: cultural guardian who cares deeply about this challenge.
- Thread 3: PE Sponsor (Ares PE team) - portfolio company value creation. Angle: position McChrystal as an operating model accelerant that increases the return on the $850M continuation investment. If successful at Convergint, replicable across Ares portfolio.
- Warm Introduction Vectors: Security industry conference proximity (ISC West, GSX); McChrystal's military/defense network (Convergint serves government security clients); PE sponsor relationship network; Chicago-area business community connections (Convergint HQ is in Hoffman Estates, IL).
