McChrystal Group

Leadership Advisory & Organizational Effectiveness

SECTION 1

Organization Snapshot

Legal Name	Baker Hughes Company
Headquarters	Houston, Texas and London, UK (co-headquartered)
Founded	1987

Ownership

Publicly traded (NASDAQ: BKR). Formerly majority-owned by GE (exited 2019)

Footprint

Operations in 120+ countries with major facilities in US, UK, Italy, Germany, Norway, Singapore, Malaysia, India, UAE, Saudi Arabia, Brazil, Australia

SECTION 1b

Company Overview

Baker Hughes is a global energy technology company with $27.7 billion in annual revenue and 56,000 employees across 120+ countries. The company recently restructured from four product companies into two segments (OFSE and IET) targeting $150M+ in cost savings, and in July 2025 announced the transformative $13.6 billion acquisition of Chart Industries. Under CEO Lorenzo Simonelli, Baker Hughes is executing 'Horizon Two' (2026-2028) targeting 20% company-wide margins while pivoting from cyclical oilfield services to diversified energy technology.

SECTION 2

Financial Health & Growth Stage

Understanding Baker Hughes's financial position and trajectory is critical to framing any engagement conversation.

Revenue: FY 2025 $27.7B (flat YoY). IET $13.4B (+10%), OFSE declined ~8%

Profitability: Record EBITDA $4,825M (+5%); IET margins 18.5% (+170bps); record free cash flow $2.7B

Chart acquisition: $13.6B - largest in company history. Targeting $325M+ cost synergies, double-digit EPS accretion. Expected close mid-2026

IET backlog: Record $32.4B; $14.9B in FY2025 orders (above high-end guidance)

2026 targets: IET revenue $13.5B at 20% EBITDA margins; OFSE $13.75B; overall organic EBITDA growth mid-single digits

Key pressures: Upstream spending headwinds, tariff costs, Chart integration complexity

Tailwinds: LNG/gas infrastructure supercycle, data center power demand ($550M+ in Q2 2025 alone), energy transition, Chart synergies

SECTION 3

Leadership Team Profiles

The following contacts are recommended as primary outreach targets - champion-level leaders who feel the organizational pain daily and can sponsor McChrystal internally.

Muzzamil Khider Ahmed - Chief People & Culture Officer [PRIORITY TARGET]

Experience across US, UAE, Colombia, Ecuador, Egypt. Replaced departing CHRO Deanna Jones

Outreach rationale: Owns people/culture transformation during massive restructuring and Chart integration. New to ELT, building his agenda - needs to demonstrate impact quickly. Direct buyer for McChrystal

Maria Claudia Borras - Chief Growth & Experience Officer [PRIORITY TARGET]

Previously EVP OFSE since 2022. Newly created cross-cutting role for growth and customer experience

Outreach rationale: Role inherently requires breaking down silos between OFSE and IET - classic Team of Teams problem. Newly created position, defining her mandate

Additional leadership team members relevant to the engagement:

Lorenzo Simonelli - Chairman & CEO

Italian-born; career GE executive; ran GE Oil & Gas before merger. CEO Today USA Award 2025

Ahmed Moghal - EVP & CFO

Previously SVP & CFO of IET segment since 2023. Navigating Chart acquisition financing

Amerino Gatti - EVP, Oilfield Services & Equipment

Succeeded Borras as OFSE head. Leading OFSE through margin recovery

SECTION 4

Organizational Culture & Structure

Culture and structure are often where McChrystal Group finds the deepest leverage. The following signals indicate how Baker Hughes operates today and where friction exists.

Organizational Structure

Restructured from 4 product companies (OFS, OFE, TPS, DS) to 2 segments (OFSE and IET). Now entering 'Horizon Two' focused on scaling profitability. Baker Hughes Business System (BHBS) deployed company-wide driving 300+ bps margin expansion

Culture Signals

Glassdoor: 4.0/5.0 (6,933 reviews); 82% recommend; 74% positive outlook. Culture 3.9/5.0

Key signal: 'Decision-making feels slow and layered, especially on cross-functional projects' - direct McChrystal fit signal

Concerns: Layoffs every 2-3 years create trust issues; 'senior leadership' and 'management' cited as cons; large-company bureaucracy

Positives: Visible senior leadership, strong safety culture, technology shift, good benefits

CHRO departure: Deanna Jones (EVP People/Comms/Transformation & CHRO) departed 2025 during peak transformation need

Newly created roles: Chief People & Culture Officer on ELT + Chief Growth & Experience Officer signal organization recognizes it has a culture/operating model problem

SECTION 5

Recent News & Trigger Events

The following developments from the past 18 months create urgency and provide natural conversation entry points for engaging Baker Hughes.

1. **2025-07-01 - $13.6B acquisition of Chart Industries announced - largest in company history**
   Massive post-merger integration requiring cultural alignment, operating model harmonization, cross-functional coordination. Classic McChrystal territory
2. **2024-10-01 - Major leadership restructuring - new OFSE head, new CGXO role, CPCO elevated to ELT**
   Multiple simultaneous transitions; new roles signal strategic recognition that growth and culture need dedicated attention
3. **2025-01-01 - CHRO Deanna Jones departs during transformation**
   Critical people/culture leadership gap at worst possible time
4. **2025-01-31 - Record FY2025 EBITDA ($4.8B) and IET backlog ($32.4B)**
   Financial strength creates budget for transformation; but OFSE/IET divergent trajectories require unified operating model
5. **2025-06-01 - $550M+ in data center power orders in single quarter**
   Rapid new market entry demands organizational agility traditional oilfield services culture may struggle to deliver
6. **2025-09-01 - Chart Industries shareholders approve acquisition - on track for mid-2026 close**
   Integration planning actively underway. McChrystal must engage before close to influence operating model design

SECTION 6

McChrystal Fit Assessment

> *Active mega-acquisition (Chart, mid-2026 close), multiple leadership transitions, CHRO departure, explicit Horizon Two targets, record financials creating budget, Glassdoor confirming cross-functional decision-making problems*

Primary Problem

Executing a dual transformation - restructuring legacy business from 4 to 2 segments while absorbing $13.6B Chart Industries acquisition - with a nearly-new leadership team, departed CHRO, slow cross-functional decision-making (per Glassdoor), and divergent growth trajectories between IET and OFSE

Best McChrystal Capability Fit

Team of Teams operating model for OFSE/IET/Chart coordination; post-merger integration cultural architecture; leadership team alignment for multiple new executives; cross-functional decision-making acceleration

Likely Objections to Engagement

We have the Baker Hughes Business System for operational improvement
We're already working with integration consultants for Chart
Our leadership team is new and still getting oriented

Competitive Advisory Landscape

McKinsey likely engaged on Chart integration strategy
Deloitte/Accenture possible in digital transformation
Korn Ferry possible for leadership assessment
None solve operating model and cultural integration at team level

SECTION 7

Conversation Entry Points

These questions are designed for a Senior Partner's first conversation. Each opens a thread that naturally leads to McChrystal Group's capabilities without a direct pitch.

1. You're about to integrate a $13.6 billion acquisition while your two core segments are on completely different growth trajectories. How are you building a unified operating model that lets Chart, IET, and OFSE move at different speeds without fragmenting decision-making?

Chart integration as primary entry

2. Horizon Two has explicit margin targets for both segments, but IET is growing 10% while OFSE is contracting. How do you prevent the natural tension between a growth segment and a pressured segment from becoming organizational dysfunction?

Two-speed organization challenge

3. You've had significant leadership transitions - new CFO, new OFSE head, new CPCO, new CGXO, CHRO departure. How is the new team building shared operating norms before Chart adds another layer of complexity?

Leadership alignment urgency

Recommended Meeting Framing

Position as 'operating model advisory for the Horizon Two transformation' - not post-merger integration (already handled), but the organizational architecture that makes integration work at execution level.

SECTION 8

Brand Insights & Market Positioning

Brand strategy reveals organizational priorities and coordination challenges. The following analysis connects Baker Hughes's market positioning to potential McChrystal engagement opportunities.

Position: #3 oilfield services globally (behind SLB, Halliburton). Actively repositioning as 'energy technology company.'

Evolution: Rebrand from 'Baker Hughes, a GE company' (2020) to standalone. IET-led strategy and Chart acquisition = becoming diversified industrial technology company. But 48% of revenue still OFSE, creating gap between brand aspiration and business reality.

Threats: If OFSE underperforms while IET thrives, 'energy technology' narrative applies to only half the company. SLB's digital platform and Halliburton's completions dominance squeeze OFSE. Chart adds industrial markets far from traditional identity.

Investments: Cordant digital platform, data center solutions ($550M+), geothermal partnership.

McChrystal connection: Brand aspiration requires cross-functional collaboration between OFSE and IET, unified go-to-market, and culture that sells integrated solutions. Chart makes this harder. McChrystal bridges the gap.

SECTION 9

Deep McChrystal Group Fit Analysis

This is the strategic case for pursuing Baker Hughes. It synthesizes findings from all previous sections into a comprehensive engagement thesis with specific fit dimensions, expected outcomes, stakeholder mapping, and a phased pursuit strategy.

9a. Fit Dimensions

Dim 1: Chart Industries Integration Architecture - $13.6B deal creating three-body problem (OFSE + legacy IET + Chart). Chart will operate as standalone unit within IET, but coordination (transfer pricing, shared customers, tech integration) is the default failure mode. McKinsey designs integration playbook; McChrystal builds shared consciousness that makes it work.

Dim 2: Two-Speed Organization (IET vs. OFSE) - IET growing 10%, approaching 20% margins. OFSE declining 8%. Share C-suite, functions, single brand. Leadership attention naturally gravitates to growth story. Deloitte builds shared services; McChrystal solves how leaders allocate resources and maintain shared consciousness at different tempos.

Dim 3: Leadership Team Alignment - New CFO, new OFSE head, new CGXO, new CPCO, CHRO departed. Essentially new team, untested through crisis or major integration. McChrystal builds team operating systems, not individual coaching (Korn Ferry).

Dim 4: New Market Organizational Agility - $550M+ data center orders in one quarter. Hyperscalers expect speed; Baker Hughes culture built for multi-year EPC projects. Organizational DNA hasn't caught up.

Dim 5: BHBS + Chart Culture Integration - BHBS drove 300+ bps of margin expansion but was designed for Baker Hughes. Can it scale to Chart's different product mix without 'not invented here' resistance?

9b. Cumulative Case

Chart acquisition -> requires cultural integration -> compounds two-speed OFSE/IET challenge -> at moment leadership team is newly configured -> under Horizon Two margin targets -> while entering new markets (data centers) demanding organizational agility -> all of which must work or 'energy technology' brand fails.

Revenue: Phase 1: $500K-$750K (pre-Chart ELT alignment) | Phase 2: $1.5M-$2.5M (post-merger operating model) | Phase 3: $500K-$1M/year | Total: $2.5M-$4.25M

9c. Enterprise Issues

1. Chart integration without cultural destruction ($325M+ synergy target)
2. Two-segment divergence creating organizational schizophrenia
3. Slow cross-functional decision-making (Glassdoor: 'slow and layered')
4. CHRO departure during peak transformation need
5. New market entry vs. legacy culture (data centers, geothermal)
6. Leadership team cohesion deficit (multiple new executives)
7. BHBS scalability to Chart operations
8. Brand-reality gap (48% still OFSE while branding as 'energy technology')

9d. Expected Outcomes

1. Unified three-entity operating model - cross-functional decision time reduced 40-60%
2. ELT shared operating norms - 100% able to articulate shared priorities within 90 days
3. Chart cultural architecture - engagement within 10% of Baker Hughes benchmarks at 18 months
4. OFSE margin recovery framework - 150-200 bps improvement within 18 months
5. New market 'fast lane' - proposal-to-contract cycle reduced 30% for data center customers
6. BHBS extension to Chart - adoption across 80% of Chart ops within 24 months
7. Horizon Two leadership development - 50+ high-potential leaders complete program in 24 months

9e. Key Stakeholders

CEO Office

Leader: Lorenzo Simonelli
Title: Chairman & CEO
Relevance: Executive sponsor

People & Culture

Leader: Muzzamil Khider Ahmed
Title: CPCO
Relevance: PRIMARY TARGET - owns culture transformation

Growth & Experience

Leader: Maria Claudia Borras
Title: CGXO
Relevance: SECONDARY TARGET - cross-functional role

Finance

Leader: Ahmed Moghal
Title: EVP CFO
Relevance: Budget holder, new to role

OFSE

Leader: Amerino Gatti
Title: EVP
Relevance: Margin recovery challenge

IET

Leader: [TBD]
Title: EVP
Relevance: Growth engine, Chart absorption

Operations

Leader: Brian Finken
Title: VP COO
Relevance: Cross-company ops implementer

9f. Opportunity Thesis

Why Now: Chart close mid-2026. 6-month window before close = when integration design happens. McChrystal must engage by Q1 2026 to influence operating model. After close, patterns calcify.

Why McChrystal: McKinsey does integration strategy. Deloitte does IMO workstreams. Korn Ferry does leadership assessment. None solve: how does a 56,000-person company with new leadership absorb $13.6B acquisition while entering new markets and actually make decisions faster? McChrystal COMPLEMENTS incumbents.

Phased Engagement: Phase 1 (Q1-Q2 2026, $500K-$750K): ELT alignment sprint pre-Chart close | Phase 2 (H2 2026-H1 2027, $1.5M-$2.5M): Post-merger operating model + BHBS/Chart integration | Phase 3 (2027-28, $500K-$1M/year): Horizon Two execution support

Pursuit Map: Thread 1: CPCO Muzzamil Khider Ahmed (direct buyer, new to ELT). Thread 2: CGXO Maria Claudia Borras (cross-functional mandate). Thread 3: Warm introduction through Houston energy/GE alumni networks.
