Prepared March 19, 2026

McChrystal Group

Leadership Advisory & Organizational Effectiveness

SECTION 1

Organization Snapshot

Legal Name	QXO, Inc.
Headquarters	Greenwich, Connecticut
Founded	2023

Ownership

Public (NYSE: QXO) - founded by Brad Jacobs (serial acquirer behind XPO Logistics, GXO, RXO); $3B Series C convertible preferred raised January 2026 to fund acquisitions

Footprint

700+ locations across the United States and Canada (600+ legacy Beacon branches + 110 Kodiak locations pending close). Primarily domestic with some Canadian operations. Serves 110,000+ customers.

SECTION 1b

Company Overview

QXO is a building products distribution platform created by serial acquirer Brad Jacobs (founder of XPO Logistics, GXO, RXO). In April 2025, QXO completed the $11B acquisition of Beacon Roofing Supply, becoming the largest publicly traded distributor of roofing, waterproofing, and complementary building products in the U.S. with 600+ branches and 8,000+ employees. In February 2026, QXO announced a $2.25B acquisition of Kodiak Building Partners (110 locations, $2.4B revenue). The company targets $50B in annual revenue within a decade.

SECTION 2

Financial Health & Growth Stage

Understanding QXO's financial position and trajectory is critical to framing any engagement conversation.

Revenue: Q3 2025 net sales of $2.73B; Q2 2025 net sales of $1.91B (first full quarter post-Beacon). Annualized run rate ~$10-11B. Adding Kodiak ($2.4B revenue) expected to bring combined to ~$12-13B.

Profitability: Currently operating at a loss on GAAP basis - Q3 2025 diluted loss per share of $(0.24), adjusted diluted EPS of $0.14. Integration costs and debt service from $11B Beacon acquisition weighing on near-term profitability. Management targeting at least double legacy Beacon EBITDA organically.

Capital Structure: $3B Series C convertible preferred stock (January 2026) to fund acquisitions. Significant debt load from Beacon acquisition.

Growth Trajectory: $50B revenue target within a decade. Beacon ($11B) + Kodiak ($2.25B) are first two building blocks. Active deal pipeline for additional acquisitions in the $800B building products distribution market.

Analyst Sentiment: Wall Street closely watching integration execution. Jacobs' track record at XPO/GXO provides credibility, but QXO's most ambitious platform yet in a more fragmented, relationship-driven industry.

SECTION 3

Leadership Team Profiles

The following contacts are recommended as primary outreach targets - champion-level leaders who feel the organizational pain daily and can sponsor McChrystal internally.

Josephine Berisha - Chief Human Resources Officer [PRIORITY TARGET]

Corporate HR leadership

Outreach rationale: Directly responsible for culture integration across 700+ branches. The headquarters-branch disconnect and talent attrition from legacy Beacon employees are her top challenges - McChrystal's distributed leadership model is exactly what she needs.

Additional leadership team members relevant to the engagement:

Brad Jacobs - Chairman & CEO

Serial acquirer - founded XPO Logistics ($19B), GXO Logistics, RXO. Author of 'How to Make a Few Billion Dollars.' Known for aggressive acquisition-driven growth and operational transformation.

Ihsan Essaid - Chief Financial Officer

Corporate finance

Valeri Liborski - Chief Technology Officer

Technology leadership

Ashwin Rao - Chief AI Officer

AI/ML leadership

Steve Swinney - Co-Founder & CEO, Kodiak Building Partners

Building products distribution

SECTION 4

Organizational Culture & Structure

Culture and structure are often where McChrystal Group finds the deepest leverage. The following signals indicate how QXO operates today and where friction exists.

Organizational Structure

Flattened hierarchy post-Beacon acquisition. Corporate HQ in Greenwich, CT with centralized strategy, technology, and finance functions. 700+ independently operating branches organized by region. Tension between corporate centralization speed and branch-level autonomy.

Culture Signals

Glassdoor feedback reveals significant culture integration challenges post-Beacon acquisition:

Employees report culture "deteriorated significantly" since QXO acquisition. Environment described as "cold and hierarchical" with leadership perceived as "top-down and unapproachable." Decision-making centers around "unwavering deference to the CEO."

"Most upper management with industry experience now gone" - legacy Beacon branch managers and sales leaders with deep customer relationships departing. "Severe disconnect from the QXO corporate team to the business and customers."

Layoffs announced after acquisition but restructuring took months to execute, "leaving employees in the dark about job security." Company direction described as "vague."

Positive signals: Jacobs' publicly stated integration philosophy emphasizes "one QXO" culture via immediate rebranding, internal social platform, and unified identity. Some employees see opportunity in Jacobs' track record and the $50B vision.

McChrystal relevance: The gap between Jacobs' stated integration philosophy and the branch-level experience is precisely the headquarters-field disconnect McChrystal's shared consciousness model addresses.

SECTION 5

Recent News & Trigger Events

The following developments from the past 18 months create urgency and provide natural conversation entry points for engaging QXO.

1. 2025-04-29 - Completed $11B acquisition of Beacon Roofing Supply - largest deal in building products distribution history

Massive integration challenge: 600+ branches, 8,000+ employees, 110,000+ customers. Culture integration already showing friction in employee reviews.

2. 2026-02-11 - Announced $2.25B acquisition of Kodiak Building Partners (110 locations, $2.4B revenue)

Second major acquisition before Beacon integration stabilized - compounds organizational complexity. Forces simultaneous integration of two different company cultures.

3. 2026-01-01 - Raised $3B Series C convertible preferred stock to fund additional large acquisitions

Capital deployed for more deals - each acquisition adds to the organizational integration burden without a proven operating model

4. 2025-09-01 - Launched 'broad transformation initiative' across pricing, procurement, sales, org structure, and logistics

Transformation initiative confirms organizational redesign is underway - ideal timing for McChrystal engagement

5. 2025-09-25 - Home Depot completed SRS Distribution acquisition - creating 1,200+ location, 8,000-truck fleet competitor

Competitive pressure intensifies; QXO must integrate faster and execute better to compete against well-capitalized rival

6. 2025-12-31 - Brad Jacobs stepped down as Chairman of XPO and GXO to focus exclusively on QXO

Full CEO attention on QXO integration and growth - increased urgency and decision-making velocity

SECTION 6

McChrystal Fit Assessment

> *Problem directly maps to McChrystal's Team of Teams capability. Multiple active triggers (Beacon close Apr 2025, Kodiak Feb 2026, transformation initiative launched). Glassdoor reviews provide visible evidence of organizational dysfunction. Budget exists ($11B+ revenue, $3B capital raise). Organizational urgency acute - Kodiak closing soon and Home Depot/SRS competing. The gap incumbent advisors leave (headquarters-branch cultural integration) is McChrystal's core competency.*

Primary Problem

Building a unified, high-performing organization from serial acquisitions at unprecedented speed - while Glassdoor reviews reveal a growing headquarters-branch culture disconnect that threatens customer relationships and talent retention

Best McChrystal Capability Fit

Team of Teams operating model - QXO's 700+ branch distributed network with a centralized corporate headquarters is the exact organizational topology McChrystal's framework was designed for: shared consciousness across the entire enterprise with empowered execution at each branch

Likely Objections to Engagement

Brad Jacobs has built multiple companies before and may believe his proven playbook doesn't need external organizational advisory

QXO is currently operating at a GAAP loss - advisory spend may face scrutiny during integration cost management

Jacobs' top-down leadership style may resist McChrystal's decentralized execution philosophy

Existing advisory relationships (McKinsey, Bain likely engaged) may crowd out organizational consultants

Competitive Advisory Landscape

McKinsey - likely advising on integration strategy, synergy capture, and $50B growth roadmap

Bain - probable engagement on operational transformation and branch optimization

Accenture/Deloitte - technology transformation and systems integration across branch network

Korn Ferry - executive talent assessment and cultural diagnostics

SECTION 7

Conversation Entry Points

These questions are designed for a Senior Partner's first conversation. Each opens a thread that naturally leads to McChrystal Group's capabilities without a direct pitch.

1. How are you experiencing the integration at the branch level - what are branch managers telling you about the transition from Beacon to QXO?

Position McChrystal as having visibility into the distributed field organization perspective, which headquarters often lacks during rapid integrations

2. With Kodiak closing in Q2 and the $50B target demanding continuous acquisitions, how are you building a repeatable integration operating model that scales?

Acknowledge Jacobs' serial acquirer expertise while introducing the concept that organizational integration at this scale requires a systematic framework, not just speed

3. What's your approach to maintaining customer relationships when legacy branch managers with deep local ties are being replaced or restructured?

Show understanding that building products distribution is relationship-driven and that talent retention at the branch level directly impacts revenue retention

Recommended Meeting Framing

Frame as a peer conversation between operators who've built large distributed organizations. McChrystal Group has helped organizations maintain execution quality across hundreds of locations during rapid transformation - not as consultants who slow things down, but as operators who help organizations move fast without breaking.

SECTION 8

Brand Insights & Market Positioning

Brand strategy reveals organizational priorities and coordination challenges. The following analysis connects QXO's market positioning to potential McChrystal engagement opportunities.

Brand Value & Competitive Standing: QXO is a brand-new identity in building products distribution - less than 2 years old. The company immediately rebranded all Beacon locations to QXO on day one of acquisition close, a deliberate strategy to create unified identity but one that erased Beacon's 97-year brand history in the roofing industry. QXO competes against Home Depot/SRS Distribution (1,200+ locations, consumer brand backing) and 56 PE-backed roofing platforms.

Brand Identity Evolution: QXO's brand positioning centers on technology-enabled distribution - positioning against the industry's legacy reputation as fragmented and low-tech. Brad Jacobs' personal brand (serial value creator) is inseparable from the QXO corporate brand. The $50B revenue target is both a growth strategy and a brand narrative - positioning QXO as the inevitable consolidator.

Brand Threats: Immediate Beacon rebrand created employee backlash - "company direction is vague" suggests the QXO brand identity hasn't been internalized by the branch workforce. The gap between the corporate brand promise (tech-enabled, modern, unified) and branch-level experience (cold, hierarchical, vague direction) creates brand authenticity risk. If customers experience a decline in service quality during integration, the QXO brand launches with negative associations in a relationship-driven industry.

Major Brand Investments: $50B revenue target functions as a brand narrative. Chief AI Officer and CTO hires signal technology investment. Immediate Day 1 rebranding across 600+ branches (signage, swag, internal platforms) represents significant brand deployment spend.

McChrystal Connection: The brand authenticity gap - QXO promises tech-enabled, world-class distribution but branch employees describe cold, hierarchical, disconnected culture - is fundamentally an organizational alignment problem. McChrystal's shared consciousness model directly addresses the gap between what the brand promises externally and how the organization actually operates internally.

SECTION 9

Deep McChrystal Group Fit Analysis

This is the strategic case for pursuing QXO. It synthesizes findings from all previous sections into a comprehensive engagement thesis with specific fit dimensions, expected outcomes, stakeholder mapping, and a phased pursuit strategy.

9a. Fit Dimensions

Fit Dimension 1: Multi-Acquisition Integration at Unprecedented Speed

QXO is running two massive integrations simultaneously - Beacon Roofing ($11B, 600+ branches, closed April 2025) and Kodiak Building Partners ($2.25B, 110 locations, expected Q2 2026 close) - while actively pursuing additional acquisitions toward a $50B revenue target. This is not a one-time integration challenge; it's a perpetual M&A machine that needs a repeatable operating model for absorbing acquisitions at speed. McKinsey and Bain can design integration playbooks on paper. McChrystal builds the human operating system - shared consciousness across 700+ branches and decentralized execution at each location - that makes those playbooks actually work when you're integrating a new acquisition every quarter.

Competitor displacement logic: McKinsey's integration playbooks are strategic frameworks; McChrystal builds the leadership and communication operating rhythms that enable 700+ branch managers to execute a unified strategy while adapting to local market conditions. Bain focuses on synergy capture; McChrystal ensures the organizational culture can absorb continuous acquisitions without breaking.

Fit Dimension 2: Culture Unification Across Legacy Workforces

Glassdoor reviews reveal a critical culture integration gap - Beacon employees report "culture has deteriorated significantly" since the QXO acquisition, with the environment feeling "cold and hierarchical" and leadership perceived as "top-down and unapproachable." Many legacy Beacon employees with industry experience have departed, creating "severe disconnect" between QXO corporate and the branch network. This is exactly the pattern McChrystal addresses: a headquarters that moves fast but loses shared consciousness with the field organization.

Competitor displacement logic: Korn Ferry measures culture; McChrystal changes it. The problem isn't diagnosing the culture gap (Glassdoor already did that) - it's building the operating rhythms and communication architectures that restore trust between a PE-speed headquarters and a 600+ branch field organization.

Fit Dimension 3: Technology Transformation Across a Fragmented Branch Network

QXO's stated ambition is to become the "tech-enabled leader" in the $800B building products distribution industry. The company hired a Chief AI Officer (Ashwin Rao, November 2024) and CTO (Valeri Liborski, April 2025) to drive a technology playbook across Beacon's legacy systems. But technology transformation at 700+ branches serving 110,000+ customers requires organizational adoption, not just software deployment. McChrystal's experience with technology adoption in complex, distributed organizations directly applies.

Competitor displacement logic: Accenture and Deloitte deploy technology; McChrystal ensures the branch managers, sales teams, and operations staff actually adopt it. The technology transformation will fail if the cultural dysfunction identified in Glassdoor reviews isn't addressed simultaneously.

Fit Dimension 4: Brad Jacobs' Serial Acquirer Model - Organizational Maturity Gap

Brad Jacobs has built and scaled multiple companies (XPO Logistics, GXO, RXO) through aggressive acquisition. His playbook works: immediate rebranding, flattened hierarchy, rapid systems consolidation. But QXO is his most ambitious platform yet - building products distribution is more fragmented, more local, and more relationship-driven than logistics. The same top-down speed that worked at XPO is creating backlash at QXO's branch level. McChrystal's value proposition: preserve Jacobs' speed and ambition while building the decentralized execution model that prevents the culture deterioration visible in employee reviews.

Competitor displacement logic: No competitor can credibly say "we'll help you move just as fast, but with organizational durability." McKinsey would slow Jacobs down; McChrystal gives him a framework to maintain speed with organizational health.

9b. Cumulative Case - Why QXO Is a Top Pipeline Opportunity

QXO represents a rare convergence of massive scale, continuous M&A pressure, and visible organizational dysfunction. The company is attempting to build a $50B distribution empire through serial acquisitions at a pace of at least one major deal per year. The Beacon integration is underway and already showing culture friction; Kodiak closes in months; and more acquisitions are coming. Every new deal amplifies the organizational challenge - and Glassdoor reviews prove the current approach is creating backlash.

Reinforcing signal chain: Beacon acquisition (Apr 2025) -> rapid rebranding and restructuring -> legacy employee attrition and culture backlash -> Kodiak announced (Feb 2026) before Beacon integration stabilized -> technology transformation launched across fragmented branch network -> $50B target demands continuous acquisitions -> each acquisition tests an already-strained organizational model -> compounding integration risk

Revenue potential: $500K initial engagement focused on Beacon integration operating model assessment (3-4 months), expanding to $2M - $3.5M for enterprise-wide Team of Teams implementation across 700+ branches, with $750K - $1.5M/year ongoing retainer as each new acquisition requires integration into the operating model.

9c. Enterprise Issues & Organizational Challenges

1. Headquarters-to-Branch Disconnect Glassdoor reviews describe a "severe disconnect from the QXO corporate team to the business and customers." Legacy Beacon branch managers with deep industry relationships and local market knowledge feel sidelined by corporate directives that don't account for local realities. This is the classic centralization-vs-decentralization tension McChrystal's Team of Teams model directly addresses: shared consciousness (everyone understands the strategy) with empowered execution (branch managers adapt to local markets).

2. Talent Hemorrhage from Culture Shock Employees report "most upper management with industry experience now gone" post-acquisition. The building products distribution industry is deeply relationship-driven - when experienced branch managers and sales leaders leave, they take customer relationships with them. This talent loss directly threatens the revenue base QXO paid $11B to acquire. McChrystal's leadership engagement and purpose-building frameworks can stabilize retention.

3. Serial Acquisition Without Integration Maturity QXO's model demands acquiring a new company every 6-12 months. But the organization hasn't yet proven it can fully integrate Beacon before adding Kodiak. Without a repeatable, scalable integration operating model, each acquisition compounds organizational complexity faster than the company can absorb it. McChrystal can design the repeatable integration playbook that scales.

4. Technology Adoption Resistance in a Trades-Adjacent Workforce Building products distribution employs a workforce that ranges from warehouse workers to sales reps to branch managers - many of whom have worked in the industry for decades with paper-based or legacy systems. The Chief AI Officer's vision for tech-enabled distribution will fail if the organizational change management doesn't meet branch employees where they are. McChrystal's approach to building buy-in through shared consciousness rather than top-down mandates is critical.

5. 700+ Branch Coordination Challenge QXO now operates 700+ locations across the U.S. and Canada (600+ Beacon + 110 Kodiak). Maintaining consistent customer experience, pricing discipline, and operational standards across that many independently operating branches requires a communication and decision-making architecture that doesn't exist yet. McChrystal's distributed operations model - designed for exactly this scale of coordinated decentralized execution - is purpose-built for this challenge.

6. Competitive Pressure from Home Depot/SRS Home Depot completed its acquisition of SRS Distribution in September 2025, creating a nearly 8,000-truck fleet with 1,200+ locations. QXO faces a well-capitalized competitor that can match its scale while leveraging Home Depot's consumer brand and technology infrastructure. This competitive pressure makes organizational execution speed even more critical.

9d. Expected Outcomes from McChrystal Group Engagement

1. Repeatable Acquisition Integration Operating Model McChrystal would deliver a standardized integration playbook - communication rhythms, decision architectures, and cultural onboarding frameworks - that QXO can deploy with each new acquisition. Measurable result: reduce time-to-full-integration from 18-24 months to 9-12 months for each subsequent acquisition, directly supporting the $50B revenue target timeline.

2. Branch Network Cultural Cohesion Implement Team of Teams operating rhythms across 700+ branches to restore shared consciousness between corporate headquarters and the field organization. Measurable result: improve Glassdoor "culture and values" rating from current levels (estimated 2.5-3.0 based on reviews) to 3.5+ within 12 months, and reduce voluntary attrition among branch managers by 30%.

3. Accelerated Technology Adoption Design organizational change management approach for AI and technology initiatives that builds buy-in from branch-level employees. Measurable result: achieve 80%+ adoption of new technology tools across all branches within 6 months of deployment (vs. typical 40-50% adoption rates for top-down technology mandates in distributed workforces).

4. Cross-Functional Decision Speed Establish decision-making frameworks that preserve Brad Jacobs' execution speed while empowering branch-level leaders. Measurable result: reduce average decision-making cycle time for pricing, procurement, and customer exception decisions by 40%, enabling branches to compete effectively against local independents.

5. Kodiak Integration Acceleration Apply proven integration operating model to the Kodiak Building Partners acquisition (expected Q2 2026 close). Measurable result: achieve operational integration of 110 Kodiak locations within 6 months of close (vs. the 12+ months Beacon integration is requiring), proving the repeatable model works.

6. Competitive Positioning Against Home Depot/SRS Build organizational capability that enables QXO to compete against Home Depot/SRS Distribution through superior execution speed and customer responsiveness at the branch level. Measurable result: maintain or grow market share in overlapping markets within 12 months.

9e. Key Stakeholders & Business Unit Map

QXO (Overall)

Leader: Brad Jacobs
Function: Chairman & CEO
McChrystal Relevance: Executive sponsor; serial acquirer who needs an organizational operating model that scales with his acquisition ambition

Finance

Leader: Ihsan Essaid
Function: Chief Financial Officer
McChrystal Relevance: Budget authority for transformation initiatives; controls integration spend

Human Resources

Leader: Josephine Berisha
Function: Chief Human Resources Officer
McChrystal Relevance: Priority engagement target - owns culture integration, talent retention, and organizational design. The Glassdoor feedback lands directly on her desk

Technology

Leader: Valeri Liborski
Function: Chief Technology Officer (since Apr 2025)
McChrystal Relevance: Technology transformation leader; needs organizational adoption strategy for branch network

AI & Data

Leader: Ashwin Rao
Function: Chief AI Officer (since Nov 2024)
McChrystal Relevance: AI-driven distribution vision; needs change management for branch-level technology adoption

Branch Operations (Legacy Beacon)

Leader: [To be confirmed]
Function: President/SVP, Branch Operations
McChrystal Relevance: Priority target - responsible for 600+ branch performance; directly experiencing culture integration challenges

Kodiak Integration

Leader: Steve Swinney
Function: Kodiak Co-Founder/CEO (rolling equity)
McChrystal Relevance: Key relationship for Kodiak integration; has agreed to roll equity into QXO

Board

Leader: Jared Kushner et al.
Function: Board of Directors
McChrystal Relevance: Board oversight of integration execution and $50B strategy

Priority engagement targets: (1) Josephine Berisha, CHRO - owns the culture and integration challenge; (2) SVP of Branch Operations - experiencing the headquarters-branch disconnect firsthand; (3) Brad Jacobs - executive sponsor who has built companies before and recognizes organizational operating model gaps.

9f. Opportunity Thesis

Strategic Signal Convergence - Why Now Beacon acquisition closed (Apr 2025) -> immediate rebranding and restructuring -> legacy talent attrition and Glassdoor backlash -> CTO and CAIO hired to drive tech transformation -> Kodiak acquisition announced (Feb 2026) before Beacon fully integrated -> $3B Series C convertible preferred to fund more acquisitions -> $50B target demands relentless acquisition pace -> compounding organizational strain

The convergence is accelerating: QXO is adding organizational complexity faster than its operating model can absorb. The Glassdoor feedback is the early warning signal. Without intervention, each new acquisition will amplify the culture disconnect that's already visible.

The Structural Paradox - Why McChrystal, Not McKinsey Brad Jacobs has worked with every major consulting firm across XPO, GXO, and RXO. McKinsey and Bain have likely already provided integration playbooks and synergy analyses for Beacon. But the Glassdoor reviews prove that strategic playbooks aren't solving the organizational problem. The headquarters-branch disconnect, the "cold and hierarchical" culture perception, the departure of experienced industry talent - these are operating model failures, not strategy failures. McKinsey tells QXO what to do; McChrystal builds the organizational system that gets 700+ branches to actually do it. This is the gap Jacobs' existing advisory relationships consistently leave unfilled.

Phased Engagement Hypothesis - Land and Expand

Phase 1 (Months 1-3): Branch Integration Operating Model Assessment - $400K - $600K Scope: Assess current state of Beacon integration from the branch perspective (not headquarters). Map communication architectures, decision-making patterns, and cultural friction points across a sample of 20-30 branches. Deliver a "State of the Branch Network" diagnostic that gives Jacobs and the CHRO visibility into what's actually happening at the field level. Why this beachhead: The Glassdoor feedback tells leadership there's a problem, but they don't have granular visibility into how it manifests across different regions and branch types. McChrystal's diagnostic provides that visibility - and it's a bounded, high-value deliverable that builds trust.

Phase 2 (Months 3-9): Team of Teams Implementation Across Branch Network - $1.5M - $2.5M Scope: Implement shared consciousness operating rhythms across all 700+ branches. Design and deploy communication architectures that connect corporate strategy to branch execution. Train 50+ regional leaders in McChrystal's decentralized execution framework. Pilot technology adoption change management approach. Expansion logic: Phase 1 diagnostic reveals specific dysfunction patterns that only McChrystal's distributed operations model can address at scale.

Phase 3 (Months 9+): Perpetual Integration Advisory - $750K - $1.5M/year Scope: Embed McChrystal integration operating model into QXO's acquisition playbook. Provide rapid-deployment integration teams for each new acquisition. Ongoing branch network culture monitoring and leadership development.

Competitive Displacement Strategy QXO's existing advisory relationships are likely strategy-focused (McKinsey, Bain) and technology-focused (Accenture, Deloitte). McChrystal enters through the CHRO or branch operations leadership - a different stakeholder set than existing advisors target. The pitch: "Your strategy advisors designed the integration plan; we're here because the plan isn't landing at the branch level." Position as complementary to existing relationships. Procurement bypass: enter through a leadership development or organizational effectiveness budget line.

Multi-Threaded Pursuit Map

Thread 1: CHRO - Culture and Integration Target: Josephine Berisha, CHRO Angle: "The Glassdoor feedback from Beacon employees tells us there's a culture integration gap between corporate and the branch network. We specialize in building shared consciousness across distributed organizations." Vector: Direct outreach; HR leadership network connections; CHRO conferences

Thread 2: Branch Operations - Field Perspective Target: SVP/President of Branch Operations Angle: "We help distributed organizations maintain local execution quality during rapid centralization and transformation - your branch managers need a voice in the integration, not just directives from corporate." Vector: Building products industry events; regional branch manager networks

Thread 3: Brad Jacobs - Executive Sponsor Target: Brad Jacobs, Chairman & CEO Angle: Jacobs has built four companies through serial acquisition - he understands organizational operating models better than most CEOs. Pitch McChrystal as the organizational equivalent of what his CTO and CAIO provide for technology: a systematic framework for scaling human coordination. Vector: CEO peer network; McChrystal personal relationship; military/veteran connection if applicable; Jacobs' public speaking circuit (he is a frequent conference speaker)
