McChrystal Group

Leadership Advisory & Organizational Effectiveness

SECTION 1

Organization Snapshot

Legal Name	Arcosa, Inc.
Headquarters	Dallas, Texas
Founded	2018

Ownership

Public (NYSE: ACA); spun off from Trinity Industries in November 2018. Diversified institutional ownership.

Footprint

Operations primarily across the United States; Stavola acquisition added significant presence in the New York-New Jersey metropolitan area (nation's largest MSA). Manufacturing and quarry sites across multiple states. Engineered structures operations include utility poles, traffic structures, and telecom towers.

SECTION 1b

Company Overview

Arcosa is a Dallas-based infrastructure products company providing construction aggregates, specialty materials, and engineered structures. Spun off from Trinity Industries in 2018, Arcosa has transformed its portfolio through the $1.2B Stavola acquisition, the planned $450M barge business divestiture, and the Ameron acquisition - fundamentally reshaping from a diversified industrial into a focused infrastructure-led platform approaching $3B in revenue.

SECTION 2

Financial Health & Growth Stage

Understanding Arcosa Inc's financial position and trajectory is critical to framing any engagement conversation.

Revenue: $2.88B in 2025, double-digit growth. Q2 2025 was a record quarter. 2026 guidance: $2.95-3.10B.

Profitability: Adjusted EBITDA surged 42% in 2025 to $583.3M. Stavola acquisition highly accretive - 360-basis-point margin expansion in aggregates. 2026 EBITDA guidance: $590-640M.

Debt: Net debt-to-adjusted EBITDA at 2.3x (ahead of schedule on deleveraging). Barge sale ($450M, expected Q2 2026) will further reduce debt and simplify capital allocation.

Analyst Sentiment: Positive. Infrastructure spending tailwinds (IIJA, reshoring) provide multi-year demand visibility. Successful Stavola integration validates M&A strategy.

Key Pressures: Barge sale execution risk; integration complexity from multiple acquisitions; infrastructure spending tied to government funding cycles; construction materials subject to weather and seasonal patterns.

Key Tailwinds: Infrastructure Investment and Jobs Act (IIJA) providing federal spending; reshoring/onshoring creating demand for construction materials; aggregates business has local market monopoly dynamics; Stavola's NY-NJ positioning is premium.

SECTION 3

Leadership Team Profiles

The following contacts are recommended as primary outreach targets - champion-level leaders who feel the organizational pain daily and can sponsor McChrystal internally.

Jesse Collins - President, Construction Products [INFERRED] [PRIORITY TARGET]

Leads largest segment including Stavola integration - aggregates, asphalt, specialty materials

Outreach rationale: Directly responsible for integrating the $1.2B Stavola acquisition into the Construction Products segment while driving organic growth. This is where the organizational complexity lives - merging a family-owned NJ/NY aggregates business into a Dallas-headquartered public company. Natural champion for McChrystal's integration work.

SVP, Integration & Transformation - SVP Corporate Development / Integration [INFERRED] [PRIORITY TARGET]

Managing multi-acquisition integration and barge divestiture execution

Outreach rationale: Owns the portfolio transformation execution - simultaneous Stavola integration, Ameron integration, and barge business divestiture. Must coordinate across multiple business segments and geographies while maintaining operational continuity.

Additional leadership team members relevant to the engagement:

Antonio Carrillo - President & CEO

Led Arcosa from Trinity Industries spinoff through portfolio transformation; deep industrial experience

Gail Peck - Chief Financial Officer

Financial leadership through Stavola acquisition financing and portfolio reshaping

SVP, Engineered Structures - President, Engineered Structures [INFERRED]

Leads utility poles, traffic structures, telecom towers segment including Ameron integration

SECTION 4

Organizational Culture & Structure

Culture and structure are often where McChrystal Group finds the deepest leverage. The following signals indicate how Arcosa Inc operates today and where friction exists.

Organizational Structure

Three segments: Construction Products (aggregates, specialty materials - largest, includes Stavola), Engineered Structures (utility poles, traffic structures, telecom towers - includes Ameron), and Transportation Products (barge business - being divested). Post-spinoff from Trinity Industries, the organization has been continuously reshaping through acquisitions and divestitures.

Culture Signals

Transformation-Ready Culture: Since its 2018 spinoff, Arcosa has been in continuous transformation - employees are accustomed to change. This is both an advantage (change tolerance) and a risk (change fatigue).

Acquisition Integration Culture: Multiple acquisitions create cultural patchwork. Stavola was a family-owned NJ business; Ameron was a public company division. Each brought distinct cultures that must integrate with Arcosa's Dallas-based corporate culture.

Industrial Heritage: Manufacturing-centric culture prioritizes operational execution, safety, and reliability. This can create resistance to 'corporate overhead' initiatives perceived as non-operational.

Glassdoor: [INFERRED] Typical industrial company reviews - pride in product quality and infrastructure mission; concerns about pace of organizational change and acquisition integration.

SECTION 5

Recent News & Trigger Events

The following developments from the past 18 months create urgency and provide natural conversation entry points for engaging Arcosa Inc.

1. **2024-10-01 - Completed $1.2B Stavola acquisition - largest deal in company history, adding aggregates/asphalt in NY-NJ**
   Transformational acquisition doubles down on infrastructure-led strategy; integration complexity requires cross-functional coordination across geographies and cultures

2. **2025-06-01 - Announced $450M sale of barge business to reduce portfolio complexity and eliminate cyclicality**
   Divestiture creates organizational redesign moment - functions supporting barges must be transitioned; remaining organization simplifies

3. **2025-12-01 - Full-year 2025 results: double-digit revenue growth, EBITDA surged 42%, leverage targets achieved ahead of schedule**
   Strong results validate strategy but create execution pressure - must maintain momentum while completing transformation

4. **2026-02-01 - Barge sale expected to close Q2 2026 after regulatory approval**
   Final phase of portfolio transformation - organizational structure must be redesigned around two-segment future

5. **2025-03-01 - Stavola integration accelerated - contributed $90.3M in revenue with 28.3% EBITDA margin in first full year**
   Successful early integration proves M&A thesis but full cultural and operational integration is multi-year - this is when the harder work begins

SECTION 6

McChrystal Fit Assessment

> *Clear organizational need (portfolio transformation, multi-acquisition integration, segment restructuring) and the company has advisory budget capacity ($3B revenue). However, strong current performance (42% EBITDA growth) reduces urgency for external help, and industrial cultures often resist consulting engagement. Rating could move to Strong if integration challenges surface as Stavola moves past the 'easy' phase, or if the barge divestiture creates organizational disruption.*

Primary Problem

Completing a portfolio transformation - integrating a $1.2B acquisition, divesting a $450M business unit, and transitioning from three segments to two - while maintaining the operational execution that delivered 42% EBITDA growth. The organizational design challenge: reshaping an 8,500-person company mid-stride without disrupting the growth momentum.

Best McChrystal Capability Fit

Organizational design during portfolio transformation - Arcosa needs to redesign its operating model as it transitions from three segments (diversified industrial) to two segments (focused infrastructure). McChrystal's cross-functional alignment methodology ensures the transition maintains operational continuity while enabling the new organizational structure. Uniquely: McChrystal's approach preserves the operational execution discipline that industrial companies depend on.

Likely Objections to Engagement

We're executing well - 42% EBITDA growth shows we don't need help
Industrial companies prefer internal operational leadership over external consultants
Stavola integration is already ahead of plan
Advisory budget may be viewed as 'overhead' in an operational culture

Competitive Advisory Landscape

McKinsey Operations Practice - industrial transformation and post-merger integration
Bain - PE-style value creation and portfolio strategy
Oliver Wyman - industrial strategy and organizational design
Internal: Arcosa has built integration capability through serial acquisitions since 2018

SECTION 7

Conversation Entry Points

These questions are designed for a Senior Partner's first conversation. Each opens a thread that naturally leads to McChrystal Group's capabilities without a direct pitch.

1. With the Stavola integration ahead of plan financially, where is the harder organizational and cultural integration work showing up - and what happens when the barge sale closes and you become a fundamentally

different company?

Acknowledge the financial success while surfacing the deeper organizational challenge that's coming. Position McChrystal as the partner for the next phase.

2. As you transition from three segments to two, how are you redesigning the organizational structure to match the new portfolio - and how do shared functions adapt?

Ask a specific organizational design question that demonstrates expertise in portfolio transformation.

Recommended Meeting Framing

Frame as a conversation about what McChrystal has learned from organizations that successfully executed portfolio transformations - particularly the challenge of redesigning mid-stride without losing operational momentum. Use industrial and military examples (not tech).

SECTION 8

Brand Insights & Market Positioning

Brand strategy reveals organizational priorities and coordination challenges. The following analysis connects Arcosa Inc's market positioning to potential McChrystal engagement opportunities.

Brand Position: Arcosa is a B2B infrastructure brand with limited consumer visibility but strong reputation among construction contractors, utilities, and transportation companies. The brand stands for reliability, quality materials, and local market expertise.

Brand Evolution: Transitioning from 'diversified industrial spinoff' to 'focused infrastructure platform.' The barge sale completes this repositioning. Investor brand is changing from 'what is Arcosa?' to 'pure-play infrastructure.'

McChrystal Connection: Infrastructure delivery requires coordination across quarries, manufacturing, logistics, and customer delivery. The brand promise of reliable supply depends on operational coordination - particularly as new acquisitions (Stavola, Ameron) bring different operational practices that must standardize without losing local excellence.

SECTION 9

Deep McChrystal Group Fit Analysis

This is the strategic case for pursuing Arcosa Inc. It synthesizes findings from all previous sections into a comprehensive engagement thesis with specific fit dimensions, expected outcomes, stakeholder mapping, and a phased pursuit strategy.

9a. Fit Dimensions

Fit Dimension 1: Portfolio Transformation Organizational Design

Arcosa is transitioning from three segments to two - a structural change that affects every shared function (HR, IT, Finance, Legal, Safety). McChrystal designs the operating model for the new two-segment structure. McKinsey can recommend the new org chart; McChrystal builds the cross-functional coordination system that makes it work during the transition.

Fit Dimension 2: Multi-Acquisition Cultural Integration

Stavola (family-owned NJ aggregates), Ameron (public company utility structures), and the legacy Arcosa business each have distinct cultures. The 'easy' financial integration happened fast; the harder cultural integration - shared values, operating norms, decision-making styles - is a multi-year effort. McChrystal's shared consciousness model accelerates cultural integration without destroying the local operational excellence that made each acquisition valuable.

Fit Dimension 3: Divestiture Transition Management

Selling the barge business means employees, functions, and processes must be transitioned or eliminated. This creates organizational disruption at the same moment the company is integrating acquisitions - competing demands on the same leadership bandwidth. McChrystal's operating rhythm manages both workstreams in parallel.

9b. Cumulative Case

Arcosa is executing one of the cleanest portfolio transformations in the industrial sector. Signal chain: Spinoff (2018) -> serial acquisitions -> $1.2B Stavola deal -> barge divestiture -> two-segment focused infrastructure platform. Each move amplifies organizational complexity. Revenue potential: $250K initial (portfolio transformation operating model), $600K-$800K deployment, $150K-$250K ongoing. Total: $1M-$1.5M over 18 months.

9c. Enterprise Issues

1. Segment Transition Organizational Gaps: Moving from three to two segments means shared functions must be redesigned. Some roles become redundant; others need new capabilities. The transition creates uncertainty. 2. Stavola Cultural Integration: A family-owned NJ business integrating into a public Dallas company - different decision-making styles, pace, and relationship norms. Financial integration is done; cultural integration is not. 3. Barge Business Employee Transition: Employees in the divested segment face uncertainty. Key talent may leave before the sale closes, degrading business value. 4. Geographic Coordination: Stavola's NY-NJ focus, Ameron's distributed manufacturing, and Arcosa's existing operations create a more complex geographic footprint that requires new coordination mechanisms. 5. Growth Expectations Post-Transformation: The market expects continued 10%+ growth. Maintaining this while absorbing portfolio changes requires organizational agility that the legacy structure may not support.

9d. Expected Outcomes

1. Two-Segment Operating Model: Design the organizational structure and operating rhythm for the post-barge-sale company. Measurable: new operating model implemented within 90 days of barge sale closure. 2. Cultural Integration Acceleration: Shared consciousness framework across Arcosa + Stavola + Ameron teams. Measurable: cross-acquisition collaboration metrics established and improving. 3. Divestiture Transition Execution: Coordinated transition of barge business functions. Measurable: zero unplanned talent attrition during transition period. 4. Shared Function Optimization: Right-sized shared services for two-segment structure. Measurable: overhead reduction targets achieved without operational disruption.

9e. Key Stakeholders

CEO

Leader: Antonio Carrillo
Role: Portfolio transformation architect
McChrystal Relevance: Executive sponsor

Construction Products

Leader: Jesse Collins [INFERRED]
Role: Largest segment, Stavola integration
McChrystal Relevance: Priority: Integration execution

Engineered Structures

Leader: [Segment President]
Role: Utility structures, Ameron integration
McChrystal Relevance: Growth and integration

Transportation (Barge - divesting)

Leader: [Segment President]
Role: Managing sale transition
McChrystal Relevance: Divestiture coordination

CFO

Leader: Gail Peck [INFERRED]
Role: Financial transformation
McChrystal Relevance: Budget gatekeeper

Corporate Development

Leader: SVP M&A [INFERRED]
Role: Portfolio strategy execution
McChrystal Relevance: Priority: Transformation coordination

9f. Opportunity Thesis

Why Now: Barge sale closes Q2 2026 - the 90-day window after closure is when the organizational redesign from three segments to two must happen. If Arcosa waits, informal structures calcify around the old three-segment model.

Why McChrystal, Not McKinsey: McKinsey advises on portfolio strategy (which segments to keep/sell). Arcosa already knows that. The challenge is executing the organizational transition - redesigning shared functions, integrating acquired cultures, and maintaining operational momentum - while the portfolio transforms beneath everyone's feet. McChrystal builds the execution architecture.

Phased Engagement: Phase 1 ($200K-$300K): Portfolio transformation operating model assessment. Phase 2 ($400K-$600K): Two-segment organizational design and cultural integration. Phase 3 ($150K-$250K): Ongoing integration management. Total: $750K-$1.2M.

Multi-Threaded Pursuit:

- Thread 1: Construction Products President - Stavola integration. Angle: "Financial integration was the easy part. How is the cultural integration going between a Dallas company and a NJ family business?"

- Thread 2: SVP Corporate Development - portfolio transformation coordination. Angle: "What's your plan for organizational redesign when the barge sale closes?"

- Thread 3: CEO Antonio Carrillo - executive sponsor. Angle: "You've built a portfolio transformation playbook. McChrystal can build the organizational execution playbook that matches it." Conference proximity: infrastructure industry events, Dallas business community.
