McChrystal Group

Leadership Advisory & Organizational Effectiveness

SECTION 1

Organization Snapshot

Legal Name	Concentra Group Holdings Parent, Inc.
Headquarters	Addison, Texas (Dallas area)
Founded	1979

Ownership

Public (NYSE: CON) since July 2024 IPO. Spun off from Select Medical Holdings Corporation. Full distribution completed November 2025 - Select Medical no longer owns shares. Welsh Carson Anderson & Stowe was a prior minority investor through Select Medical. Now a fully independent public company.

Footprint

770+ occupational health centers and onsite clinics across 42 U.S. states. Nova Medical acquisition added 67 sites in Texas, Georgia, Tennessee, Indiana, and Wisconsin. No international operations. Employer onsite clinics at major corporate locations.

SECTION 1b

Company Overview

Concentra is the largest provider of occupational health services in the U.S. by number of locations, operating 770+ centers and onsite clinics in 42 states. The company partners with ~200,000 employers including 100% of Fortune 100 and ~95% of Fortune 500 companies. Spun off from Select Medical via IPO in July 2024 ($529M raised) and completed full distribution in November 2025. Revenue grew 13.9% to $2.2B in FY2025. Actively acquiring: Nova Medical Centers ($265M, 67 sites) and Pivot On-site Innovations in 2025. TSA with Select Medical expires November 2026.

SECTION 2

Financial Health & Growth Stage

Understanding Concentra Group Holdings's financial position and trajectory is critical to framing any engagement conversation.

Revenue: $2.2B in FY2025, up 13.9% YoY. Q4 2025 revenue growth continued strong trajectory.

Profitability: Adjusted EBITDA of $431.9M in FY2025, up 14.6% YoY. EBITDA margin ~19.6%. Company guided for ~$2.1B revenue and ~$415M adjusted EBITDA including Nova for 2025 (pre-actual results exceeding guidance).

Growth Trajectory: Planning 7-9 de novo new locations in 2026, potentially double-digit in 2027. Continued bolt-on acquisition strategy alongside organic growth. Revenue CAGR accelerating with Nova integration.

Capital Structure: IPO raised $529M (July 2024). Manageable debt load from separation. Strong cash flow generation supports de novo expansion and bolt-on acquisitions.

Analyst Sentiment: Newly public company building analyst coverage. Strong FY2025 results against initial guidance exceeded expectations. Key watch items: TSA transition execution, Nova integration milestones, de novo expansion pace.

Client Base: ~200,000 employer partners including 100% of Fortune 100 and ~95% of Fortune 500 - providing revenue stability and cross-selling opportunities.

SECTION 3

Leadership Team Profiles

The following contacts are recommended as primary outreach targets - champion-level leaders who feel the organizational pain daily and can sponsor McChrystal internally.

Matthew DiCanio - President & CFO [PRIORITY TARGET]

Operations and finance leadership; oversees clinical, operational, sales, marketing, M&A, real estate, growth, and business improvement

Outreach rationale: The most overloaded executive in the pipeline - simultaneously managing TSA wind-down, $265M Nova integration, de novo expansion, public company reporting, and growth strategy. McChrystal's organizational coordination framework directly addresses his convergence of challenges.

Additional leadership team members relevant to the engagement:

W. Keith Newton - Chairman, President & CEO

Occupational health pioneer; led company through multiple ownership transitions (Humana -> Select Medical/Welsh Carson -> IPO). Deep institutional knowledge spanning 25+ years.

John A. Delorimier - EVP, Chief Digital and Data Officer

Healthcare technology and digital transformation

Giovanni Gallara - EVP, Chief Clinical Services Officer

Clinical healthcare operations

Su Zan Nelson - EVP, Chief Accounting Officer

Healthcare finance and accounting

SECTION 4

Organizational Culture & Structure

Culture and structure are often where McChrystal Group finds the deepest leverage. The following signals indicate how Concentra Group Holdings operates today and where friction exists.

Organizational Structure

Newly independent public company structure with CEO (Newton) and President/CFO (DiCanio) overseeing all operations. Functional EVPs for digital/data, clinical services, and accounting. Regional structure across 42 states with center-level management. Employer onsite division and Concentra Ventures as separate business units. Still transitioning from Select Medical shared services to fully independent infrastructure.

Culture Signals

Mission-Driven Identity: Concentra's stated mission is "improving the health of America's workforce." The occupational health focus creates a purpose-driven culture - employees connect their work to helping injured workers return to health and employers maintain safe workplaces. This purpose alignment is both a retention asset and a potential resistance point during technology-driven transformation.

Transition Culture Dynamics: Employees are experiencing a unique cultural moment - Concentra has gone from being a Select Medical subsidiary to an independent public company in 18 months. This creates both excitement (independence, growth potential, equity opportunity) and anxiety (new systems, new processes, TSA uncertainty). The culture is in flux, making it simultaneously receptive to and stressed by organizational change.

Center-Level Autonomy: Each of the 770+ centers operates with significant day-to-day autonomy - local clinical directors and center managers make patient care and employer relationship decisions. This distributed model creates the classic McChrystal challenge: maintaining quality consistency and strategic alignment across hundreds of independently operating units.

Growth Culture: 13.9% revenue growth, Nova acquisition, and de novo expansion plans signal a growth-oriented culture. Leadership's willingness to pursue multiple growth vectors simultaneously suggests organizational ambition - but also potential overextension risk.

Occupational Health Workforce: Clinical staff (physicians, nurse practitioners, physical therapists) combined with business operations staff creates a dual-culture organization. Clinical staff are mission-driven; operations staff are efficiency-driven. Aligning these two cultures around shared priorities during a period of organizational transition is a classic McChrystal challenge.

SECTION 5

Recent News & Trigger Events

The following developments from the past 18 months create urgency and provide natural conversation entry points for engaging Concentra Group Holdings.

1. 2025-11-01 - Completed full spinoff from Select Medical - Concentra now a fully independent public company

Independence creates urgency to build standalone corporate infrastructure; TSA clock running

2. 2025-03-03 - Closed $265M acquisition of Nova Medical Centers (67 sites in 5 states)

Largest acquisition in company history; integration happening simultaneously with TSA transition and infrastructure buildout

3. 2025-06-01 - Hired 80%+ of FTEs needed to replace Select Medical shared services

Rapid corporate hiring creates large cohort of new employees without institutional knowledge - organizational onboarding and alignment challenge

4. 2026-02-28 - FY2025 results exceed guidance - revenue $2.2B (+13.9%), Adjusted EBITDA $431.9M (+14.6%)

Strong results set high expectations for continued performance; execution stumbles during TSA transition would be visible to investors

5. 2026-11-01 - Transition Services Agreement with Select Medical expires November 2026 [UPCOMING]

Hard deadline for completing standalone infrastructure - the single most time-sensitive organizational challenge in the pipeline

SECTION 6

McChrystal Fit Assessment

> *Problem directly maps to McChrystal's distributed operations capability. Hard deadline trigger (TSA Nov 2026). Clear economic buyer (President/CFO DiCanio). Budget exists ($2.2B revenue, strong cash flow, IPO proceeds). Organizational urgency (TSA deadline + acquisition integration + expansion simultaneously). The 770+ center scale plays directly to McChrystal's strength in coordinated decentralized execution.*

Primary Problem

Simultaneously building standalone corporate infrastructure (hard TSA deadline Nov 2026), integrating the largest acquisition in company history (Nova, 67 sites), and scaling de novo expansion - three high-complexity organizational challenges converging in a newly independent public company with no historical precedent for operating independently

Best McChrystal Capability Fit

Distributed operations coordination and Team of Teams - Concentra's 770+ independently operating centers with a new corporate infrastructure being built around them is exactly the organizational topology McChrystal excels at: maintaining shared consciousness and empowered execution across hundreds of distributed locations during maximum organizational change

Likely Objections to Engagement

Revenue ($2.2B) is at the lower end of ICP sweet spot - advisory budget may be constrained for a newly public company focused on demonstrating profitability

Healthcare services may not immediately see relevance of military-origin organizational frameworks

Company may view TSA transition as primarily a technology/systems challenge rather than an organizational coordination challenge

Strong FY2025 performance may create complacency - 'things are working, why bring in outside help?'

Competitive Advisory Landscape

Accenture / Deloitte - likely engaged on IT systems separation and TSA implementation

Advisory Board / Kaufman Hall - healthcare-specific operational consulting

Welsh Carson operating partners - PE-affiliated operational advisors (legacy relationship through Select Medical)

Huron Consulting Group - healthcare transformation advisory (potential competitor)

SECTION 7

Conversation Entry Points

These questions are designed for a Senior Partner's first conversation. Each opens a thread that naturally leads to McChrystal Group's capabilities without a direct pitch.

1. With the TSA expiring in November and Nova integration underway, how are you managing the coordination across what are essentially three simultaneous organizational buildouts?

Show understanding of the convergence of challenges without overstating the difficulty - position McChrystal as a peer who has helped organizations manage multiple complex workstreams simultaneously

2. How are your center managers experiencing the transition from Select Medical infrastructure to Concentra-owned systems - are they seeing disruption at the point of care?

Demonstrate concern for the operational reality at the center level, where organizational changes are felt most acutely

3. As you scale from 770 to 780+ centers this year, what's your playbook for maintaining the service consistency that your Fortune 500 clients depend on?

Acknowledge the growth ambition while raising the quality-at-scale challenge that McChrystal directly addresses

Recommended Meeting Framing

Frame as a conversation about operational execution during organizational transition - McChrystal Group has helped organizations maintain performance across hundreds of distributed locations during periods of maximum organizational change. Not about strategy (they have one) or technology (they're building it) - about the organizational coordination that ensures 770+ centers keep performing while everything around them changes.

SECTION 8

Brand Insights & Market Positioning

Brand strategy reveals organizational priorities and coordination challenges. The following analysis connects Concentra Group Holdings's market positioning to potential McChrystal engagement opportunities.

Brand Value & Competitive Standing: Concentra is the clear market leader in U.S. occupational health by location count (770+). The brand represents reliability and scale to employer clients - particularly Fortune 500 companies that need a single national provider for occupational health services. The Fortune 100/500 client penetration (100%/95%) is an extraordinary brand position.

Brand Identity Evolution: Concentra is evolving from "occupational health division of Select Medical" to "independent occupational health platform." This brand independence is both an opportunity (focused identity, direct equity) and a risk (loss of Select Medical's institutional backing and healthcare system credibility). The Nova acquisition extends the brand footprint but creates integration challenges that could affect brand consistency.

Brand Threats: Regional and local occupational health providers compete on personal relationships and community presence. National competitors (Premise Health for onsite clinics, CareATC for employer health) are growing. The risk is that TSA transition disruption or integration challenges create service quality inconsistencies that damage the brand's reliability promise to Fortune 500 clients.

Major Brand Investments: IPO itself was a brand event - establishing Concentra as an independent public company with its own equity story. Nova acquisition ($265M) extends the brand's geographic reach. De novo expansion (7-9 new sites in 2026) invests in brand presence in new markets.

McChrystal Connection: Concentra's brand promise to employers is "consistent, reliable occupational health services across every location." Delivering on this promise across 770+ centers during simultaneous TSA transition, acquisition integration, and expansion is fundamentally an organizational coordination challenge. McChrystal's shared consciousness model ensures that every center delivers the brand promise regardless of the organizational changes happening at the corporate level.

SECTION 9

Deep McChrystal Group Fit Analysis

This is the strategic case for pursuing Concentra Group Holdings. It synthesizes findings from all previous sections into a comprehensive engagement thesis with specific fit dimensions, expected outcomes, stakeholder mapping, and a phased pursuit strategy.

9a. Fit Dimensions

Fit Dimension 1: Standalone Infrastructure Buildout Under Hard Deadline

Concentra completed its spinoff from Select Medical via IPO (July 2024) and full distribution (November 2025), but remains dependent on Select Medical for critical operational services under a Transition Services Agreement expiring November 2026. The company has hired 80%+ of the FTEs needed to replace shared services, but building a fully independent corporate infrastructure - IT systems, HR operations, financial reporting, procurement, compliance - while maintaining service quality across 770+ locations is an enormous organizational design challenge. McChrystal's operating model directly addresses the coordination required to stand up parallel systems while keeping the existing operation running seamlessly.

Competitor displacement logic: Accenture and Deloitte can implement technology systems for the separation. McChrystal builds the organizational coordination layer that ensures 770+ locations continue serving 200,000 employers without disruption during the infrastructure transition. This is a distributed operations challenge, not a technology implementation challenge.

Fit Dimension 2: Simultaneous Acquisition Integration and Organizational Buildout

While building standalone infrastructure, Concentra is simultaneously integrating Nova Medical Centers (67 sites in 5 states, closed March 2025) and Pivot On-site Innovations. Integrating acquisitions is challenging under normal circumstances; doing it while the parent organization is itself under construction amplifies complexity exponentially. Nova's 67 sites must be absorbed into systems, processes, and culture that are themselves being rebuilt. McChrystal's ability to maintain coordination across multiple simultaneous organizational changes is directly applicable.

Competitor displacement logic: Integration consultancies focus on one-time integration events. McChrystal addresses the compound challenge: how do you integrate an acquisition (Nova) into an organization (Concentra) that is itself transforming its infrastructure? No standard integration playbook covers this scenario.

Fit Dimension 3: Rapid De Novo Expansion Adding Organizational Complexity

Concentra plans to open 7-9 new locations in 2026 and double-digit new sites in 2027. Each new center requires staffing, training, systems setup, local employer partnerships, and integration into Concentra's operational model. This expansion is happening simultaneously with the TSA wind-down and Nova integration. McChrystal's framework for scaling distributed operations - maintaining quality and consistency across hundreds of independently operating locations - directly enables this growth.

Competitor displacement logic: Healthcare consulting firms (Advisory Board, Kaufman Hall) advise on growth strategy. McChrystal provides the organizational operating model that enables Concentra to open new locations at speed without degrading service quality at existing ones. This is an execution capability, not a strategy capability.

Fit Dimension 4: Newly Public Company Building Operational Maturity

Concentra went public in July 2024 and completed full separation in November 2025. As a newly public company, it faces analyst scrutiny, quarterly earnings pressure, and investor expectations for growth and margin improvement. The company must build the operational discipline, reporting rigor, and strategic communication capabilities expected of a public company - all while executing the TSA transition, acquisitions, and de novo expansion. McChrystal's leadership development and organizational alignment capabilities can accelerate the maturity required for public company performance.

Competitor displacement logic: Public company readiness advisors (EY, Deloitte) focus on compliance and governance. McChrystal addresses the organizational performance and leadership alignment that determines whether a newly public company meets market expectations or disappoints.

9b. Cumulative Case - Why Concentra Is a Top Pipeline Opportunity

Concentra is executing the most complex organizational buildout in the occupational health industry: simultaneously standing up independent corporate infrastructure (hard deadline November 2026), integrating the largest acquisition in its history (Nova, 67 sites), continuing de novo expansion (7-9 new locations in 2026), and building public company maturity - all at the same time. The convergence creates compounding risk: a failure in any one dimension (TSA deadline miss, Nova integration stumble, expansion quality issues, earnings disappointment) cascades into the others.

Reinforcing signal chain: IPO completed (Jul 2024) -> full spinoff from Select Medical (Nov 2025) -> TSA clock starts ticking -> Nova acquisition closes ($265M, 67 sites, Mar 2025) -> Pivot acquisition adds more integration -> standalone infrastructure buildout (80% FTEs hired) -> de novo expansion planned (7-9 sites in 2026) -> FY2025 results strong (revenue +13.9%) creating high expectations -> November 2026 TSA deadline approaching -> simultaneous execution pressure across all dimensions

Revenue potential: $400K - $600K initial diagnostic focused on TSA transition operating model and integration coordination (3-4 months), expanding to $1.5M - $2M for company-wide Team of Teams implementation across 770+ locations, with $500K - $750K/year ongoing advisory through TSA completion and beyond. Total engagement potential: $2.5M - $3.5M over 2-3 years.

9c. Enterprise Issues & Organizational Challenges

1. TSA Dependency Risk - Building the Airplane While Flying It Concentra's most critical challenge: replacing Select Medical shared services before the November 2026 TSA expiration. HR, IT, financial systems, procurement, and other corporate functions currently depend on Select Medical infrastructure. The 80% FTE hiring completion is encouraging, but the remaining 20% plus the actual systems migration and process standup must happen flawlessly. A TSA deadline miss would create operational disruption across 770+ locations. McChrystal's organizational coordination capability can design the transition operating model that ensures zero-disruption cutover.

2. Nova Medical Integration During Infrastructure Transition Integrating 67 Nova Medical sites into Concentra while Concentra's own corporate infrastructure is being rebuilt is like renovating a house while adding a new wing. Nova sites must adopt Concentra processes, systems, and culture - but those processes and systems are themselves changing as the TSA winds down. McChrystal can design the sequencing and coordination that prevents the integration from collapsing under the weight of concurrent changes.

3. 770+ Location Consistency Challenge Concentra operates across 42 states with centers that range from standalone urgent care-style facilities to onsite employer clinics. Maintaining consistent service quality, patient experience, and employer satisfaction across this network requires organizational coordination at scale. Each center operates somewhat independently, creating the distributed operations challenge McChrystal's model directly addresses.

4. Newly Public Company Performance Pressure FY2025 revenue grew 13.9% and adjusted EBITDA grew 14.6% - setting high expectations for continued performance. As a newly public company (NYSE: CON), Concentra faces quarterly earnings scrutiny and analyst expectations. Any operational disruption from the TSA transition, integration challenges, or expansion missteps will be immediately visible to investors. McChrystal can help build the operational discipline that prevents execution stumbles during the critical first years as a public company.

5. Employer Client Relationship Continuity Concentra partners with 200,000 employers, including 100% of Fortune 100 and ~95% of Fortune 500. These relationships depend on consistent, reliable service delivery. The combination of infrastructure transition, acquisition integration, and expansion creates multiple points where service quality could degrade. McChrystal's shared consciousness model ensures that every center maintains service excellence during organizational turbulence.

6. New Employee Cohort Integration The rapid hiring to replace Select Medical shared services means Concentra is onboarding hundreds of new corporate employees who have no institutional knowledge of how the organization operates. Simultaneously, Nova Medical's 67-site workforce must be culturally integrated. Building cohesion across legacy Concentra, new corporate hires, and acquired Nova employees requires intentional culture-building at speed. McChrystal's team-building and purpose frameworks directly apply.

9d. Expected Outcomes from McChrystal Group Engagement

1. Zero-Disruption TSA Transition McChrystal would design the coordination architecture for migrating from Select Medical shared services to independent Concentra infrastructure without service disruption. Measurable result: complete TSA wind-down by November 2026 deadline with zero center-level service interruptions and zero employer client complaints attributable to the transition.

2. Accelerated Nova Integration Design an integration operating model that absorbs Nova's 67 sites into

Concentra while both organizations are in transition. Measurable result: achieve full operational integration of Nova sites within 9 months of close (vs. typical 12-18 months for healthcare services acquisitions), with Nova site performance metrics matching legacy Concentra benchmarks within 6 months.

3. De Novo Expansion Playbook Create a standardized new-center launch operating model that enables Concentra to open 7-9 locations in 2026 and scale to double-digit openings in 2027. Measurable result: reduce average new-center time-to-profitability by 20% compared to historical averages, with new centers achieving target utilization rates within 90 days.

4. New Employee Cohesion McChrystal's team-building programs would integrate legacy Concentra, new corporate hires, and acquired Nova employees into a unified culture with shared purpose. Measurable result: achieve above-industry employee engagement scores across all employee cohorts within 12 months.

5. Investor Confidence Through Execution Discipline Provide visible organizational execution framework that demonstrates management capability to analysts and investors. Measurable result: maintain or exceed FY2025 growth trajectory (13.9% revenue growth) through FY2026 despite simultaneous TSA transition, integration, and expansion execution.

9e. Key Stakeholders & Business Unit Map

Concentra (Overall)

Leader: W. Keith Newton
Function: Chairman, President & CEO (since 2015)
McChrystal Relevance: Executive sponsor; co-founded the company; deep institutional knowledge

Operations & Growth

Leader: Matthew DiCanio
Function: President & CFO (since 2023/2024)
McChrystal Relevance: Top priority target - oversees clinical, operational, sales, marketing, M&A, real estate, and growth. The single person most responsible for TSA transition, Nova integration, and de novo expansion simultaneously

Digital & Data

Leader: John A. Delorimier
Function: EVP, Chief Digital and Data Officer
McChrystal Relevance: Technology transformation leader; responsible for building standalone digital infrastructure

Clinical Services

Leader: Giovanni Gallara
Function: EVP, Chief Clinical Services Officer
McChrystal Relevance: Clinical quality and consistency across 770+ centers; critical for maintaining service standards during transition

Accounting & Finance

Leader: Su Zan Nelson
Function: EVP, Chief Accounting Officer
McChrystal Relevance: Financial reporting and compliance for newly public company; TSA transition for financial systems

Nova Medical Integration

Leader: [To be confirmed]
Function: Integration Leader

McChrystal Relevance: Responsible for absorbing 67 Nova sites into Concentra operations

Employer Onsite Group

Leader: [To be confirmed]
Function: Division Leader
McChrystal Relevance: Onsite clinic operations at employer locations; sensitive client relationships

Concentra Ventures

Leader: [Under DiCanio]
Function: Innovation/Growth
McChrystal Relevance: New ventures and business development; growth beyond core occupational health

Priority engagement targets: (1) Matthew DiCanio, President & CFO - the single executive managing the convergence of TSA transition, acquisition integration, de novo expansion, and growth strategy; (2) John Delorimier, CDDO - building standalone digital infrastructure under TSA deadline pressure; (3) Keith Newton, CEO - executive sponsor with deep institutional knowledge.

9f. Opportunity Thesis

Strategic Signal Convergence - Why Now IPO completes (Jul 2024) -> full spinoff from Select Medical (Nov 2025) -> TSA clock starts -> Nova Medical acquisition closes ($265M, 67 sites, Mar 2025) -> Pivot acquisition adds integration load -> standalone FTE hiring at 80%+ -> FY2025 results strong (revenue +13.9%, EBITDA +14.6%) -> high investor expectations set -> de novo expansion begins (7-9 sites in 2026) -> November 2026 TSA expiration deadline -> all workstreams must execute simultaneously with zero margin for error

The convergence is uniquely time-bound: the November 2026 TSA deadline is a hard constraint that creates urgency across every organizational dimension. Each concurrent initiative (infrastructure buildout, acquisition integration, expansion, public company maturity) must execute on the same timeline.

The Structural Paradox - Why McChrystal, Not McKinsey McKinsey and Bain can design standalone operating models and integration plans. Accenture and Deloitte can implement technology systems. But Concentra's challenge isn't strategy or technology - it's organizational coordination across 770+ locations during simultaneous infrastructure transition, acquisition integration, and expansion. This is a distributed execution challenge at a complexity level that strategy consultants don't address. McChrystal's Team of Teams model - building shared consciousness across hundreds of independently operating locations while empowering each center to execute locally - is purpose-built for Concentra's situation. No other firm combines distributed operations expertise with leadership development at this scale in healthcare services.

Phased Engagement Hypothesis - Land and Expand

Phase 1 (Months 1-3): TSA Transition Operating Model - $350K - $500K Scope: Map the critical TSA dependencies across all shared service functions (IT, HR, finance, procurement). Identify the highest-risk transition workstreams and design a coordination architecture that ensures zero-disruption cutover at each center. Include 10-15 center-level assessments to understand how TSA services are actually consumed at the point of care. Why this beachhead: The November 2026 TSA deadline creates urgent demand for a transition operating model. This is a bounded, high-value engagement with a clear deliverable and measurable success criteria (TSA completion without service disruption).

Phase 2 (Months 3-9): Enterprise Operating Model and Integration - $1M - $1.5M Scope: Implement shared consciousness operating rhythms across 770+ centers. Design Nova integration operating model. Create de novo expansion playbook. Train 50+ regional leaders in McChrystal's decentralized execution framework. Expansion logic: Phase 1 TSA transition work reveals broader organizational coordination gaps that only McChrystal's distributed operations model can address at the 770+ center scale.

Phase 3 (Months 9+): Growth Operating Model Advisory - $500K - $750K/year Scope: Ongoing support for de novo expansion execution. Integration support for future acquisitions. Newly public company organizational maturity development.

Competitive Displacement Strategy Concentra's advisory relationships likely include healthcare consulting firms (Advisory Board), IT separation consultants (Accenture/Deloitte), and PE-affiliated advisors (Welsh Carson operating partners). McChrystal enters through the President/CFO (Matthew DiCanio), who is the single executive managing the convergence of all organizational challenges. The pitch: "Your technology partners are building the systems; your consulting partners designed the strategy; we build the organizational coordination layer that ensures 770+ centers continue performing while everything changes around them." Procurement bypass: position as a leadership development and organizational effectiveness engagement (different budget line than management consulting or IT implementation).

Multi-Threaded Pursuit Map

Thread 1: President/CFO Matthew DiCanio - Organizational Coordination Target: Matthew DiCanio, President & CFO Angle: "You're managing TSA transition, Nova integration, de novo expansion, and public company performance simultaneously. We specialize in helping leaders coordinate multiple complex workstreams across distributed organizations without dropping any balls." Vector: Direct outreach; healthcare leadership conferences; CFO/COO networks

Thread 2: Chief Digital & Data Officer - Infrastructure Transition Target: John Delorimier, EVP & Chief Digital and Data Officer Angle: "Building standalone digital infrastructure under a hard TSA deadline requires organizational change management at 770+ centers, not just technology deployment. We help distributed organizations adopt new systems at speed." Vector: Healthcare IT conferences (HIMSS); CIO/CTO networks

Thread 3: CEO Keith Newton - Executive Sponsor Target: W. Keith Newton, Chairman, President & CEO Angle: Newton co-founded Concentra and has been with the company through multiple ownership transitions. His deep institutional knowledge makes him uniquely positioned to appreciate the organizational challenge of the current moment. Vector: McChrystal personal network; occupational health industry events; healthcare CEO peer networks
