RTX Corporation

Business Development Dossier

Industry	**Defense & Aerospace**
Revenue	**$88.6B**
Employees	**180,000**
Ideal Customer Profile Score	**87**

ICP SCORING MODEL

```
ICP = Signals + Revenue + Employees + Fit   (max 100)
```

Signals (0-35)	Top 4 signals scored; each = base(60%) + recency bonus <30d: 40% | <90d: 30% | <180d: 20% | older: 10%
Revenue (0-25)	$500M-$10B sweet spot -> 70-100% of 25 pts Below $500M -> pro-rata x 0.5 | Above $10B -> 60%
Employees (0-20)	2,000+ preferred (70-100%) | 500-2K partial (50-70%) Below 500 -> pro-rata x 0.3
Fit (0-20)	High-fit types: reorg, transformation, M&A, hiring, funding, partnership -> 5 pts ea (max 12) + diversity 2/type (max 8)

Prepared March 19, 2026

McChrystal Group

Leadership Advisory & Organizational Effectiveness

SECTION 1

Organization Snapshot

Legal Name	RTX Corporation
Headquarters	Arlington, Virginia
Founded	2020

Ownership

Public (NYSE: RTX); formed from 2020 merger of Raytheon Company and United Technologies Corporation. Widely held institutional ownership.

Footprint

Global operations across 50+ countries; major U.S. facilities in Connecticut (Pratt & Whitney HQ), Iowa (Collins Aerospace), Arizona/Massachusetts (Raytheon); manufacturing, R&D, and service operations worldwide. 180,000 employees.

SECTION 1b

Company Overview

RTX Corporation is the world's largest aerospace and defense company by revenue ($88.6B), formed from the 2020 merger of Raytheon and United Technologies. Operating through Pratt & Whitney (aircraft engines), Collins Aerospace (avionics/systems), and Raytheon (weapons/space), RTX is executing post-merger integration under new CEO Chris Calio while navigating record defense demand and commercial aerospace recovery across 180,000 employees globally.

SECTION 2

Financial Health & Growth Stage

Understanding RTX Corporation's financial position and trajectory is critical to framing any engagement conversation.

Revenue: $88.6B in 2025, up 10% YoY. Segment breakdown: Pratt & Whitney $32.9B, Collins Aerospace $30.2B, Raytheon $28.0B.

Profitability: Operating margins improving across all three segments. Collins Aerospace leading efficiency with 9% organic sales growth on 3% headcount reduction (organic basis). Pratt & Whitney geared powder metal issue costs largely resolved.

Backlog: Record defense backlog across Raytheon segment; commercial aftermarket backlog growing with widebody recovery.

Capital Allocation: Significant share buyback program; R&D investment across next-gen engine programs (GTF, NGAD) and hypersonic weapons.

Key Pressures: Pratt & Whitney GTF engine quality issues (geared turbofan inspection/replacement cycle); supply chain constraints in defense production; post-merger integration complexity still ongoing 5 years after combination; talent competition across aerospace.

Key Tailwinds: Record defense spending globally; commercial aerospace recovery (widebody deliveries accelerating); aftermarket revenue growth (MRO demand); structural cost reduction gains.

SECTION 3

Leadership Team Profiles

The following contacts are recommended as primary outreach targets - champion-level leaders who feel the organizational pain daily and can sponsor McChrystal internally.

Shane Eddy - President, Pratt & Whitney [PRIORITY TARGET]

Leading through GTF engine quality crisis and commercial recovery

Outreach rationale: Manages the most operationally complex segment ($32.9B) navigating GTF engine inspection/replacement while ramping production. The tension between quality remediation and production acceleration is the exact organizational coordination challenge McChrystal addresses. Pratt & Whitney's global MRO network of 30+ facilities requires Team of Teams coordination.

Colin Mahoney - President, Collins Aerospace [INFERRED] [PRIORITY TARGET]

Leading the segment that achieved 9% growth on 3% headcount reduction - the efficiency story

Outreach rationale: Collins Aerospace is the post-merger integration success story within RTX - achieving growth with headcount reduction. This leader is executing the structural cost reduction and cross-functional integration that McChrystal can help scale to the enterprise level.

Additional leadership team members relevant to the engagement:

Christopher T. Calio - Chairman & Chief Executive Officer

Former COO of RTX; oversaw three-segment reorganization; deep aerospace operations experience

Neil Mitchill - Executive Vice President & CFO

Financial leadership through merger integration; manages $88.6B enterprise

Wesley Kremer - President, Raytheon

Leading the weapons and space segment; managing record defense backlog

Dantaya Williams - Chief Human Resources Officer [INFERRED]

Managing talent strategy across 180,000 employees post-merger

SECTION 4

Organizational Culture & Structure

Culture and structure are often where McChrystal Group finds the deepest leverage. The following signals indicate how RTX Corporation operates today and where friction exists.

Organizational Structure

Three major business segments (Pratt & Whitney, Collins Aerospace, Raytheon) each operating as substantial enterprises in their own right ($28-33B each). Corporate center in Arlington, VA provides shared services and enterprise strategy. Post-merger, the organization has been rationalized from the complex UTC/Raytheon legacy structures into cleaner segment boundaries - but cross-segment coordination (particularly where Raytheon weapons use Pratt engines and Collins avionics) remains a challenge.

Culture Signals

Two Legacy Cultures Still Merging: Five years after the Raytheon-UTC combination, the cultural integration is ongoing. UTC's commercial aerospace DNA (Collins, Pratt) and Raytheon's defense-first DNA create different operating tempos, risk profiles, and decision-making styles. New CEO Calio (a UTC legacy executive) must bridge both cultures credibly.

Engineering Excellence Culture: RTX's identity centers on engineering innovation - from jet engines to hypersonic weapons. This creates a culture that values technical expertise but can undervalue organizational coordination and cross-functional alignment.

GTF Quality Crisis Impact: The Pratt & Whitney GTF engine inspection program damaged internal confidence and created accountability tensions between engineering, manufacturing, and quality organizations. Rebuilding trust between these functions is an ongoing cultural challenge.

Scale Creates Silos: At 180,000 employees across three segments operating in 50+ countries, organizational silos are structural, not just cultural. Information that should flow between segments (shared technology, common customers, joint programs) often doesn't.

Glassdoor: [INFERRED] Mixed reviews reflecting merger integration fatigue, pride in technology leadership, and varying experiences across the three very different segments.

SECTION 5

Recent News & Trigger Events

The following developments from the past 18 months create urgency and provide natural conversation entry points for engaging RTX Corporation.

1. **2024-05-01 - Chris Calio appointed CEO, succeeding Greg Hayes; elected Chairman in 2025**
   New CEO from the operations side (former COO) signals focus on execution and integration completion - creates openness to organizational effectiveness partnerships

2. **2025-01-01 - Three-segment reorganization completed: Pratt & Whitney, Collins Aerospace, Raytheon consolidated into clean structure**
   Organizational structure is set - now the harder work of cross-segment coordination and cultural integration within the new structure begins

3. **2025-06-01 - Collins Aerospace achieved 9% organic sales growth on 3% headcount reduction -**

structural efficiency model

Proof that organizational effectiveness drives growth + efficiency simultaneously - McChrystal can help scale this model enterprise-wide

4. 2025-12-01 - Revenue grew 10% to $88.6B; record defense backlog; Pratt & Whitney GTF remediation program progressing

Growth creates organizational scaling demands; GTF program requires cross-functional coordination between engineering, manufacturing, and MRO worldwide

5. 2025-06-01 - Pratt & Whitney GTF engine inspection/replacement program ongoing across global MRO network

Quality crisis requiring coordination across 30+ global MRO facilities - the distributed operations challenge McChrystal was built for

6. 2026-01-01 - RTX enters 2026 with commercial aerospace recovery accelerating and defense demand at record levels

Dual-market growth (commercial + defense) creates resource allocation tension between segments - the organizational coordination challenge at the core of mega-defense companies

SECTION 6

McChrystal Fit Assessment

> *Immense organizational complexity (180,000 employees, three $30B segments, post-merger integration) creates a massive addressable need. However, RTX at $88.6B is well above the ICP revenue sweet spot, has substantial internal transformation capability, and likely has McKinsey/BCG engaged. Rating could move to Strong if: (1) a specific segment leader champions McChrystal for a bounded engagement (e.g., Collins Aerospace cross-functional optimization), or (2) the GTF quality coordination challenge creates a Pratt & Whitney-specific entry point. McChrystal's military credibility resonates strongly in the Raytheon (defense) segment.*

Primary Problem

Completing the cultural and operational integration of the world's largest A&D merger (Raytheon + UTC) while simultaneously managing GTF engine quality remediation, record defense demand, commercial aerospace recovery, and structural cost reduction - across 180,000 employees in 50+ countries, under a new CEO who must make the three-segment structure work as one enterprise.

Best McChrystal Capability Fit

Enterprise operating model and cross-segment coordination - RTX's three segments operate as near-independent companies ($28-33B each). McChrystal's Team of Teams builds the connective tissue that enables shared technology transfer, common customer coordination, and enterprise-wide operational excellence. The Collins Aerospace efficiency model (9% growth on 3% headcount reduction) proves the concept - McChrystal scales it enterprise-wide.

Likely Objections to Engagement

We're the world's largest A&D company - we don't need external organizational help
McKinsey/BCG already advise on enterprise strategy and merger integration
Three segments operate semi-independently by design - cross-segment coordination is limited
Budget allocated to GTF remediation and R&D, not organizational consulting
New CEO wants to establish his own approach before engaging external advisors

Competitive Advisory Landscape

McKinsey Aerospace & Defense - enterprise strategy, merger integration
BCG - defense portfolio strategy, operational transformation
Deloitte - IT integration, shared services design, change management
Booz Allen Hamilton - defense-specific organizational advisory
Internal: RTX has built significant internal transformation capability over 5 years of merger integration

SECTION 7

Conversation Entry Points

These questions are designed for a Senior Partner's first conversation. Each opens a thread that naturally leads to McChrystal Group's capabilities without a direct pitch.

1. Collins Aerospace achieved 9% organic growth while reducing headcount 3% - what's the organizational model behind that efficiency, and how are you thinking about scaling it across the other two segments?

Start with a genuine compliment on a specific achievement, then surface the cross-segment scaling challenge. This positions McChrystal as helping scale what's already working.

2. Five years after the Raytheon-UTC combination, where is the cultural integration still showing friction - particularly where programs span multiple segments?

Demonstrate awareness that mega-mergers have long cultural tails. Programs that need Pratt engines, Collins avionics, and Raytheon weapons coordination are where integration gaps become visible.

3. How is the GTF engine remediation program coordinating across 30+ global MRO facilities - and what's the organizational cadence for managing that kind of distributed quality response?

A specific, technical question that shows deep understanding of Pratt & Whitney's operational challenge. If the answer reveals coordination gaps, McChrystal is the solution.

Recommended Meeting Framing

Frame as a peer conversation about enterprise coordination in multi-segment defense companies - specifically, how the Collins Aerospace efficiency model could be extended enterprise-wide. Emphasize McChrystal's experience coordinating distributed operations under pressure (JSOC parallels to global MRO networks are genuine). Enter through segment-level leadership, not corporate - the segments are where the pain lives.

SECTION 8

Brand Insights & Market Positioning

Brand strategy reveals organizational priorities and coordination challenges. The following analysis connects RTX Corporation's market positioning to potential McChrystal engagement opportunities.

Brand Value & Competitive Standing: RTX is the world's largest A&D company by revenue - a brand that commands respect in both defense (Raytheon heritage: Patriot, Stinger, Tomahawk) and commercial aerospace (Pratt & Whitney: GTF engines; Collins: avionics on virtually every commercial aircraft). The three segment brands (Pratt, Collins, Raytheon) carry more recognition than the RTX corporate brand, which is still relatively new (renamed from Raytheon Technologies in 2023).

Brand Identity Evolution: The RTX corporate brand is an ongoing evolution - from "Raytheon Technologies" to "RTX" (2023), signaling a move beyond the legacy Raytheon defense identity toward a broader aerospace and technology positioning. The brand challenge: making "RTX" mean something to employees, customers, and investors beyond just a stock ticker.

Brand Threats: GTF engine quality issues damaged the Pratt & Whitney brand with airlines; defense program execution delays (if any) would damage the Raytheon brand with DoD; the RTX corporate brand lacks the heritage emotional connection of its segment brands.

McChrystal Connection: RTX's brand depends on three segment brands (Pratt, Collins, Raytheon) each delivering excellence while the corporate brand provides the enterprise value-add. When the segments don't coordinate - when a defense system using Pratt engines and Collins avionics has integration issues - the RTX brand suffers. McChrystal's cross-segment coordination model ensures the enterprise brand promise matches reality.

SECTION 9

Deep McChrystal Group Fit Analysis

This is the strategic case for pursuing RTX Corporation. It synthesizes findings from all previous sections into a comprehensive engagement thesis with specific fit dimensions, expected outcomes, stakeholder mapping, and a phased pursuit strategy.

9a. Fit Dimensions

Fit Dimension 1: Cross-Segment Enterprise Coordination

RTX's three segments ($28-33B each) are near-independent enterprises that must coordinate on shared customers (DoD, airlines), shared technology (engines + avionics + weapons), and shared operations (supply chain, manufacturing). McKinsey designs enterprise strategy; McChrystal builds the operating rhythm that makes three separate companies function as one. The Collins Aerospace efficiency model (9% growth on 3% headcount reduction) proves organizational effectiveness works - McChrystal scales it.

Fit Dimension 2: GTF Quality Response as Distributed Operations Challenge

Pratt & Whitney's GTF engine inspection/replacement program spans 30+ MRO facilities worldwide -

coordinating engineering specifications, parts supply, airline scheduling, and quality assurance across geographies and time zones. This is a textbook McChrystal distributed operations challenge. The military parallel: coordinating maintenance operations across forward operating bases worldwide.

Fit Dimension 3: Post-Merger Cultural Integration at Scale

Five years after combining UTC and Raytheon, cultural integration continues. Three segment cultures (commercial aerospace, avionics/electronics, defense weapons) have different risk profiles, decision speeds, and customer engagement models. McChrystal's shared consciousness creates the cultural connective tissue without homogenizing the segment-specific strengths.

Fit Dimension 4: New CEO Establishing Operating Model

Chris Calio, 18 months in as CEO, is still establishing his leadership brand and operating model for the world's largest A&D company. McChrystal's CEO effectiveness methodology - building the enterprise operating cadence around a new leader - accelerates the transition from inherited to intentional operating model.

9b. Cumulative Case - Why RTX Is a Top Pipeline Opportunity

RTX represents the ultimate enterprise coordination challenge in defense: three $30B segments, 180,000 employees, 50+ countries, post-merger integration still ongoing, GTF quality crisis requiring global coordination, and a new CEO establishing his authority. Signal chain: Mega-merger (2020) -> three-segment reorganization -> new CEO (2024) -> Collins efficiency model proven -> GTF quality response ongoing -> record defense demand -> commercial recovery accelerating. Revenue potential: $750K-$1M initial (segment-level operating model pilot, likely Collins or Pratt), $2M-$3M enterprise deployment, $750K-$1M ongoing. Total: $3.5M-$5M over 24-36 months. This would be McChrystal's flagship defense engagement.

9c. Enterprise Issues & Organizational Challenges

1. Cross-Segment Coordination Gaps: Programs requiring Pratt engines + Collins avionics + Raytheon weapons suffer from coordination overhead. Each segment optimizes its own P&L, creating local optima that suboptimize the enterprise.

2. GTF Global MRO Coordination: 30+ facilities worldwide must coordinate on inspection protocols, parts availability, airline scheduling, and quality assurance - while Pratt simultaneously ramps new engine production. Two competing demands on the same manufacturing and engineering workforce.

3. Post-Merger Cultural Legacy: UTC culture (commercial, margin-focused, speed) vs. Raytheon culture (defense, compliance-focused, precision) still creates friction in shared functions, executive interactions, and enterprise initiatives.

4. Talent Competition Across Segments: Engineers, program managers, and operational leaders are recruited by all three segments (and by external competitors). Without enterprise-level talent coordination, internal competition wastes recruiting investment.

5. Supply Chain Complexity: Shared suppliers serve all three segments with different priority, pricing, and delivery requirements. Without enterprise supply chain coordination, RTX's $88.6B purchasing power is underutilized.

6. Information Sharing Barriers: Defense classification requirements in Raytheon create legitimate information

barriers - but the "classification culture" extends into areas where information should flow freely between segments.

7. New CEO Authority Across Legacy Power Structures: Segment presidents run $30B enterprises with significant autonomy. Calio must build enterprise authority without undermining the segment accountability that drives performance.

9d. Expected Outcomes from McChrystal Group Engagement

1. Enterprise Operating Rhythm: Cross-segment coordination cadence connecting the three segment presidents and corporate leadership. Measurable: cross-segment decision cycle time reduced from weeks to days.

2. Collins Efficiency Model Enterprise Scaling: Extend the 9% growth / 3% headcount reduction model from Collins to Pratt and Raytheon. Measurable: enterprise-wide organic growth-to-headcount ratio improving.

3. GTF Global MRO Coordination System: Distributed operations cadence for 30+ MRO facilities. Measurable: GTF inspection/replacement cycle time reduced by 15-20%.

4. Cross-Segment Technology Transfer: Framework for sharing technology innovations (materials science, AI, manufacturing techniques) between segments. Measurable: technology transfer projects increasing 50%+.

5. Enterprise Talent Coordination: Unified talent pipeline across segments, reducing internal competition and improving retention. Measurable: critical-role vacancy rate declining 20%+.

6. CEO Operating Model: Enterprise cadence establishing Calio's leadership rhythm. Measurable: strategic initiative velocity at enterprise level increasing.

9e. Key Stakeholders & Business Unit Map

Office of Chairman/CEO

Leader: Chris Calio
Function: Enterprise leadership, post-merger transformation
McChrystal Relevance: Executive sponsor

Pratt & Whitney

Leader: Shane Eddy, President
Function: $32.9B - engines, MRO, GTF remediation
McChrystal Relevance: Priority: GTF coordination, distributed MRO

Collins Aerospace

Leader: Colin Mahoney [INFERRED], President
Function: $30.2B - avionics, systems, interiors
McChrystal Relevance: Priority: Efficiency model scaling

Raytheon

Leader: Wesley Kremer, President
Function: $28.0B - weapons, space, defense electronics
McChrystal Relevance: Defense-specific engagement opportunity

Finance

Leader: Neil Mitchill, EVP & CFO

Function: Financial integration, segment P&L
McChrystal Relevance: Budget gatekeeper

HR

Leader: Dantaya Williams [INFERRED], CHRO
Function: 180,000 employee talent strategy
McChrystal Relevance: Enterprise talent coordination

Supply Chain

Leader: [SVP Supply Chain]
Function: Enterprise procurement, supplier management
McChrystal Relevance: Cross-segment supply chain coordination

Engagement Priority:

1. Shane Eddy (President, Pratt & Whitney) - GTF distributed MRO coordination as entry point
2. Colin Mahoney (President, Collins Aerospace) - efficiency model scaling champion
3. Chris Calio (CEO) - enterprise sponsor via military/defense network

9f. Opportunity Thesis

Strategic Signal Convergence - Why Now: Mega-merger integration ongoing -> new CEO establishing authority -> Collins efficiency model proven -> GTF quality crisis requiring global coordination -> record defense demand -> commercial recovery accelerating. The convergence creates a unique window: a new CEO who needs to demonstrate enterprise-level impact, a proven model (Collins) that could scale, and an active crisis (GTF) that demands distributed operations coordination.

The Structural Paradox - Why McChrystal, Not McKinsey: McKinsey designed the segment structure and likely advises on enterprise strategy. BCG may advise on operational transformation. But neither builds the enterprise operating rhythm that connects three $30B segments into a coordinated whole while respecting their autonomy. McChrystal's Team of Teams model was designed for this exact challenge - and the military credibility resonates uniquely in the Raytheon (defense) segment. Positioning: "McKinsey built the strategy for three segments. McChrystal builds the operating system that makes them function as one."

Phased Engagement Hypothesis - Land and Expand:

- Phase 1 (Months 1-4, $500K-$750K): Segment-Level Pilot - GTF global MRO coordination system for Pratt & Whitney OR Collins Aerospace cross-functional efficiency model documentation. Beachhead: Pratt & Whitney GTF coordination - urgent, visible, measurable, and the highest-stakes operational challenge at RTX right now.
- Phase 2 (Months 5-12, $1.5M-$2M): Enterprise deployment - cross-segment operating rhythm, technology transfer framework, enterprise talent coordination.
- Phase 3 (Months 13-36, $750K-$1M retainer): Ongoing enterprise operating model management, CEO cadence, post-merger cultural integration.

Competitive Displacement Strategy: Don't compete with McKinsey on enterprise strategy or Deloitte on IT integration. Enter through segment operations - the people managing GTF worldwide or driving Collins efficiency. Position as operational execution expertise that complements (doesn't replace) existing strategic advisory. McChrystal's military credibility opens the Raytheon segment door.

Multi-Threaded Pursuit Map:

- Thread 1: Shane Eddy (President, Pratt & Whitney) - GTF coordination. Angle: "How is the GTF remediation program coordinating across 30+ global MRO facilities? McChrystal built the distributed operations model for exactly this challenge."

- Thread 2: Collins Aerospace President - efficiency scaling. Angle: "The 9% growth on 3% headcount reduction is impressive. How are you thinking about scaling that model, and what's the organizational infrastructure behind it?"

- Thread 3: Chris Calio (CEO) via military/defense network - executive sponsor. McChrystal's personal network likely intersects with RTX's defense advisory boards, board members, or government relations contacts. A personal introduction from General McChrystal carries weight in defense.

- Warm Introduction Vectors: Defense industry conferences (AUSA, AFA, SNA); McChrystal personal network (defense leadership, former flag officers on RTX's advisory boards); Raytheon's strong military-connected culture (many former military in leadership).
