McChrystal Group

Leadership Advisory & Organizational Effectiveness

SECTION 1

Organization Snapshot

Legal Name	Amentum Holdings, Inc.
Headquarters	Chantilly, Virginia
Founded	2024
Ownership	
Public (NYSE: AMTM) - formed via merger of legacy Amentum (American Securities/Lindsay Goldberg) with Jacobs CMS and C&I	
Footprint	
80+ countries, all seven continents. 53,000+ employees in defense, intelligence, space, environment, and civilian government.	

SECTION 1b

Company Overview

Amentum is a global leader in advanced engineering, technology, and mission support services for defense, intelligence, space, and civilian government markets. Formed through the 2024 merger of legacy Amentum with Jacobs Solutions' Critical Mission Solutions and Cyber & Intelligence businesses, the company now employs 53,000+ people across 80+ countries. Publicly traded on NYSE as AMTM, Amentum generated \$14.4B in revenue in FY2025.

SECTION 2

Financial Health & Growth Stage

Understanding Amentum's financial position and trajectory is critical to framing any engagement conversation.

Revenue \$14.4B FY2025 (4% pro-forma growth). Q1 FY2026 adj EPS \$0.54 (beat estimates). Net leverage reduced from 4.0x to 3.2x. Strong defense/intel backlog. Pressure: DOGE scrutiny, federal budget uncertainty. Tailwind: bipartisan defense modernization.

SECTION 3

Leadership Team Profiles

The following contacts are recommended as primary outreach targets - champion-level leaders who feel the organizational pain daily and can sponsor McChrystal internally.

John Heller - Chief Executive Officer [PRIORITY TARGET]

West Point graduate, U.S. Army veteran. Former CEO of PAE Incorporated.

Outreach rationale: West Point grad - natural McChrystal connection. Architect of the merger integration.

Steven Demetriou - Executive Chairman [PRIORITY TARGET]

Former CEO of Jacobs Solutions (2015-2023). Led strategic transformation.

Outreach rationale: Designed the spinoff; board-level champion for cultural integration.

Additional leadership team members relevant to the engagement:

Travis Johnson - Chief Financial Officer

Former Jacobs finance leadership.

Jill Bruning - President, Critical Mission Solutions

Former Jacobs CMS leader. 25+ years gov services.

SECTION 4

Organizational Culture & Structure

Culture and structure are often where McChrystal Group finds the deepest leverage. The following signals indicate how Amentum operates today and where friction exists.

Organizational Structure

Matrixed - organized by segments (CMS, Cyber & Intelligence, legacy services) with geographic and functional overlays. Harmonizing two distinct operating models.

Culture Signals

Two-cultures-colliding: legacy Amentum (PE-backed, lean, entrepreneurial) vs. Jacobs CMS/C&I (public company, process-heavy, engineering). Classified work creates silos resisting integration. Challenge: shared consciousness across programs that cannot share information due to security classifications.

SECTION 5

Recent News & Trigger Events

The following developments from the past 18 months create urgency and provide natural conversation entry points for engaging Amentum.

1. 2024-09-27 - Merger with Jacobs CMS/C&I completed; NYSE listing

Created the integration challenge McChrystal can address

2. 2025-06-01 - First full fiscal year as combined entity; \$14.4B revenue

Integration costs visible in results

3. 2026-02-09 - Q1 FY2026 earnings beat; leverage down to 3.2x

Financial stability = budget for org investment

4. 2025-11-01 - DOGE scrutiny of government contracts

External pressure accelerates need for operational efficiency

5. 2025-08-01 - Contract wins in space, cyber, and intelligence

Growth segments need integrated leadership pipelines

SECTION 6

McChrystal Fit Assessment

West Point CEO, active mega-merger, clear buyers, \$14.4B budget, classified-environment challenge uniquely suits McChrystal.

Primary Problem

Integrating two deeply different cultures across 53K employees in 80 countries, most in classified environments.

Best McChrystal Capability Fit

Team of Teams - JSOC experience unifying compartmented intel community mirrors Amentum's challenge.

Likely Objections to Engagement

Security clearance limits access
Gov services skeptical of consultants
CEO may view integration as on-track

Competitive Advisory Landscape

Booz Allen Hamilton
McKinsey Government Practice
Deloitte Federal
Korn Ferry

SECTION 7

Conversation Entry Points

These questions are designed for a Senior Partner's first conversation. Each opens a thread that naturally leads to McChrystal Group's capabilities without a direct pitch.

1. Eighteen months in, what's hardest about making two organizations think as one - especially when program boundaries prevent information sharing?

Peer-level, shared military background.

2. Legacy Amentum was lean/PE-driven. Jacobs CMS was process-heavy/engineering-first. How do you reconcile those?

Culture question - opens door to Team of Teams as third way.

3. With DOGE scrutiny, how are you building organizational agility to reallocate talent faster than the contracting cycle?

External pressure -> internal capability.

Recommended Meeting Framing

West Point to West Point: building trust across organizations that were competing last year. McChrystal faced this unifying CIA, NSA, and JSOC - direct parallel to Amentum's classified-environment integration.

SECTION 8

Brand Insights & Market Positioning

Brand strategy reveals organizational priorities and coordination challenges. The following analysis connects Amentum's market positioning to potential McChrystal engagement opportunities.

Brand Value & Competitive Standing: Amentum is one of the world's largest government and defense services contractors, formed from the 2024 merger of Amentum Holdings and Jacobs' Critical Mission Solutions (CMS) business. The brand serves U.S. Department of Defense, Department of Energy, NASA, intelligence agencies, and allied governments. Amentum competes against SAIC, Leidos, Peraton, KBR, and BWX Technologies.

Brand Identity Evolution: The merger created a new brand identity from two established names. "Amentum" was originally the infrastructure/mission services arm of AECOM (divested in 2020); combining with Jacobs CMS doubled the company and requires building a unified brand that leverages both legacy identities without confusing the federal customer base.

Marketing Leadership & Strategy: B2G marketing focused on past performance, cleared personnel, and mission capabilities. The merged entity's marketing must unify two proposal teams, two past performance databases, and two customer relationship networks. Key marketing channels: AUSA, AFCEA, government industry days, and executive engagement.

Brand Threats: DOGE-driven federal spending uncertainty threatens the entire government services market. Integration execution risk - if the merged entity stumbles on major contract performance, the new brand suffers disproportionately (it hasn't yet built the trust reserves that decades-old brands like Leidos enjoy). Competitor poaching of talent and contracts during integration uncertainty.

McChrystal Connection: Amentum operates in exactly the environment McChrystal knows best - defense, intelligence, and government missions. The brand's credibility depends on flawless contract execution across 80 countries, often in classified environments where organizational failure has national security consequences. McChrystal's military operational credibility is uniquely differentiated in this market.

SECTION 9

Deep McChrystal Group Fit Analysis

This is the strategic case for pursuing Amentum. It synthesizes findings from all previous sections into a comprehensive engagement thesis with specific fit dimensions, expected outcomes, stakeholder mapping, and a phased pursuit strategy.

9a. Fit Dimensions

Fit Dimension 1: Mega-Merger Integration in Classified Environments

Merging 53,000 employees across 80 countries, many in classified programs with security clearances, is one of the most constrained integration challenges possible. Standard integration playbooks (shared IT systems, open communication, cross-team collaboration) face classification barriers. McChrystal's experience coordinating across classification boundaries in military operations is uniquely relevant. No commercial consulting firm has this capability.

Fit Dimension 2: Dual-Culture Integration at Scale

Amentum (infrastructure/operations DNA from AECOM) and Jacobs CMS (engineering/technology DNA) have fundamentally different cultures, operating rhythms, and customer engagement styles. At 53,000 employees, cultural integration doesn't happen organically - it requires deliberate organizational design. McChrystal's shared consciousness methodology works across cultural divides because it focuses on information sharing and decision-making, not cultural homogenization.

Fit Dimension 3: DOGE Navigation as Existential Organizational Challenge

Federal spending uncertainty under DOGE affects Amentum's entire \$14.4B revenue base. The organization must be able to rapidly reallocate resources, pursue new opportunities, and protect critical contracts - organizational agility that the traditional government contracting model (slow, proposal-driven, hierarchical) doesn't support. McChrystal's VUCA-native operating model is the direct solution.

Fit Dimension 4: Defense Sector Cultural Alignment

Amentum's workforce includes thousands of former military personnel. McChrystal's military background creates cultural credibility that no civilian consulting firm can match. This isn't marketing - it's a genuine capability advantage in an organization where military service is the dominant cultural reference.

9b. Cumulative Case

Amentum is the natural McChrystal prospect - defense/intelligence sector, military-heavy culture, mega-merger integration, classified environments, DOGE uncertainty. Signal chain: Amentum-Jacobs CMS merger -> 53,000 employees -> 80 countries -> classified environments -> DOGE uncertainty -> dual-culture integration -> contract recompetes pressure. Revenue potential: \$500K-\$600K initial (integration coordination for classified environments), \$1.5M-\$2M deployment, \$500K ongoing. Total: \$2.5M-\$3.5M over 24 months.

9c. Enterprise Issues

1. Classification Barriers to Integration: Many programs operate in separate classified environments (SCIFs). Employees on different programs can't share information about what they do - making traditional integration communication impossible.
2. 80-Country Operational Coordination: From Antarctica to the Middle East, Amentum operates in some of the world's most challenging environments. Integration must reach every location without disrupting active missions.
3. Contract Performance During Integration: Federal contracts have strict performance requirements. Any degradation during integration triggers government oversight actions that can cascade into lost recompetes.
4. Cleared Personnel Retention: Security-cleared employees are the scarcest resource in government contracting. Integration uncertainty causes flight to competitors (SAIC, Leidos, Peraton).
5. Dual Proposal Infrastructure: Two companies = two proposal teams, two pricing models, two past performance

databases. Unifying these before the next major recompute is urgent. 6. DOGE Program Vulnerability: Large government support contracts are primary DOGE targets. Amentum must identify vulnerable programs and develop contingency plans - requiring organizational agility the pre-merger entities may not have. 7. Leadership Consolidation: Two C-suites, two sets of P&L owners, two customer relationship networks. Selecting who leads the combined organization - and doing it fast enough to prevent paralysis - is critical.

9d. Expected Outcomes

1. Classification-Aware Integration Model: Coordination framework that respects security boundaries while enabling organizational integration. Measurable: integration milestones achieved across classified and unclassified environments. 2. Contract Performance Continuity: Operating discipline maintaining contract execution during integration. Measurable: zero government performance deficiency notices during first 12 months. 3. Cleared Talent Retention: Retention program for security-cleared personnel. Measurable: cleared employee attrition below 6%. 4. Unified Proposal Capability: Merged proposal infrastructure enabling competitive recompetes. Measurable: recompute win rate maintained at or above historical levels. 5. DOGE Response Agility: Scenario-based response framework for federal spending changes. Measurable: response time to program changes reduced by 50%.

9e. Key Stakeholders

CEO

Leader: John Heller
 Role: Merged entity leadership
 McChrystal Relevance: Executive sponsor

CFO

Leader: Travis Johnson [INFERRED]
 Role: Financial integration
 McChrystal Relevance: Budget gatekeeper

Defense Group

Leader: [EVP Defense]
 Role: DoD contract execution
 McChrystal Relevance: Priority: Classification-aware integration

Intelligence/Space

Leader: [EVP Intel]
 Role: IC/classified programs
 McChrystal Relevance: Priority: Security boundary coordination

HR

Leader: [CHRO]
 Role: 53,000 employee integration
 McChrystal Relevance: Cultural integration

Strategy

Leader: [CSO/M&A]
 Role: Integration PMO
 McChrystal Relevance: Integration coordination

Government Relations

Leader: [VP GR]

Role: DOGE navigation, policy

McChrystal Relevance: Federal relationship management

9f. Opportunity Thesis

Why Now: Merger completed 2024, integration in first 12-18 months. DOGE adds external urgency. First-year integration decisions determine whether the combined entity captures value or struggles with integration debt for years.

Why McChrystal, Not McKinsey: McChrystal commanded the organizations that Amentum supports. He understands classified environments, military culture, and government contracting dynamics in a way no civilian firm can replicate. The cultural credibility is unchallengeable. Additionally, McChrystal's experience coordinating across security boundaries (JSOC worked across multiple classification levels and allied partner nations) is the direct analog to Amentum's integration challenge.

Phased Engagement: Phase 1 (\$500K-\$600K): Integration operating model for classified environments + DOGE agility framework. Phase 2 (\$1M-\$1.5M): Enterprise deployment across defense and intelligence groups. Phase 3 (\$500K retainer): Ongoing integration and DOGE adaptation. Total: \$2M-\$2.5M.

Multi-Threaded Pursuit: EVP Defense (classified integration), CHRO (cultural integration), and CEO (executive sponsor via military network). McChrystal's personal network in defense leadership is the primary introduction vector. AUSA, AFCEA, and defense industry events. Former JSOC/SOF personnel at Amentum.
