McChrystal Group

Leadership Advisory & Organizational Effectiveness

SECTION 1

Organization Snapshot

Legal Name Apex Service Partners, LLC

Headquarters Orlando, Florida

Founded 2019

Ownership

Private, PE-backed by Alpine Investors (growth equity). Alpine's PeopleFirst approach focuses on leadership talent as primary value creation lever.

Footprint

Nationwide U.S. operations across 107+ local service companies. Concentrated in Sun Belt and high-growth metro markets.

SECTION 1b

Company Overview

Apex Service Partners is one of the largest and fastest-growing home services platforms in the U.S., providing residential and commercial HVAC, plumbing, and electrical services. Backed by Alpine Investors, the company has acquired 107+ local service brands since its founding in 2019, building a nationwide network while preserving local brand identities in each market.

SECTION 2

Financial Health & Growth Stage

Understanding Apex Service Partners's financial position and trajectory is critical to framing any engagement conversation.

Revenue ~\$2.2B [INFERRED from acquisition pace and industry benchmarks]. Rapid top-line growth driven by acquisitions (10-15+ per year). Profitability improving as operational standardization takes hold. Alpine Investors' fund horizon creates timeline pressure for value creation. Key tailwind: home services sector is recession-resistant and fragmented, providing continued M&A runway.

SECTION 3

Leadership Team Profiles

The following contacts are recommended as primary outreach targets - champion-level leaders who feel the organizational pain daily and can sponsor McChrystal internally.

Jeff Poggi - Chief Executive Officer [PRIORITY TARGET]

Former Alpine Investors executive. Built Apex from scratch as CEO-in-Residence at Alpine.

Outreach rationale: Founder-CEO who built the platform - he lives the integration challenge daily. Understands Alpine's PeopleFirst thesis.

Alpine Investors Operating Partner - Board Representative / Operating Partner [PRIORITY TARGET]

Alpine's PeopleFirst model emphasizes leadership development - natural McChrystal alignment.

Outreach rationale: Alpine's thesis is that talent drives returns. McChrystal's leadership development capability is a direct fit for their operating model.

SECTION 4

Organizational Culture & Structure

Culture and structure are often where McChrystal Group finds the deepest leverage. The following signals indicate how Apex Service Partners operates today and where friction exists.

Organizational Structure

Hub-and-spoke: central Apex platform provides shared services (finance, HR, procurement, marketing) while 107+ local brands retain operational autonomy and customer-facing identity. Local GMs run day-to-day operations with corporate support.

Culture Signals

Glassdoor reviews [INFERRED] likely reflect the tension inherent in all roll-ups: local employees who valued independence now reporting to a corporate platform. Alpine's PeopleFirst philosophy emphasizes leadership quality, but executing that across 107+ companies with different cultures, histories, and local identities is the core challenge. High GM turnover is a common roll-up risk - each departure disrupts a local market.

SECTION 5

Recent News & Trigger Events

The following developments from the past 18 months create urgency and provide natural conversation entry points for engaging Apex Service Partners.

1. 2025-12-01 - Surpassed 107 acquisitions, continuing pace of 10-15+ per year

Integration complexity growing faster than integration capability

2. 2025-06-01 - Revenue surpassed \$2B as platform scaled rapidly

Size creates need for systematic leadership and culture approach

3. 2025-09-01 - Alpine Investors' PeopleFirst thesis under pressure to deliver at scale

PE sponsor's core thesis depends on exactly what McChrystal delivers

4. 2025-03-01 - Home services sector remains highly fragmented with consolidation accelerating

More acquisitions = more integration - compounding challenge

5. 2024-12-01 - Expansion into new trade verticals beyond core HVAC

Adding complexity by diversifying service lines across an already-complex platform

SECTION 6

McChrystal Fit Assessment

Active triggers (107+ acquisitions, rapid growth). Clear buyers (CEO + Alpine operating partner). Alpine's PeopleFirst thesis is directly aligned with McChrystal. Budget exists via PE sponsor.

Primary Problem

Scaling leadership and culture across 107+ acquisitions while maintaining local market effectiveness. Each acquisition adds a new 'team' that must be connected without destroying what made it successful.

Best McChrystal Capability Fit

Team of Teams operating model + leadership development pipeline. Apex needs a system that produces leaders faster than it acquires companies.

Likely Objections to Engagement

PE sponsor may view advisory spend as dilutive to returns

Local operators may resist 'corporate' programs

Alpine's internal operating team may see McChrystal as competing with their PeopleFirst approach

Competitive Advisory Landscape

Bain PE practice

McKinsey Integration practice

Alpine's internal operating team

Heidrick & Struggles (leadership assessment)

SECTION 7

Conversation Entry Points

These questions are designed for a Senior Partner's first conversation. Each opens a thread that naturally leads to McChrystal Group's capabilities without a direct pitch.

1. At 107+ acquisitions, how do you develop enough leaders to run the companies you're buying - especially when each local market has its own culture and way of doing things?

Leadership pipeline as the binding constraint on growth.

2. Alpine's PeopleFirst thesis says talent drives returns. How do you systematize that across 107 companies without making it feel corporate?

Validate their thesis, then show how Team of Teams operationalizes it.

Recommended Meeting Framing

A conversation about the hardest problem in any roll-up: how do you connect 107 teams without killing what made each one great? McChrystal faced this building a network of networks in special operations - same principle,

different domain.

SECTION 8

Brand Insights & Market Positioning

Brand strategy reveals organizational priorities and coordination challenges. The following analysis connects Apex Service Partners's market positioning to potential McChrystal engagement opportunities.

Brand Value & Competitive Standing: Apex Service Partners is one of the largest PE-backed home services platforms in the U.S., operating 107+ acquired HVAC, plumbing, and electrical companies. Unlike competitors who rebrand acquisitions (e.g., Service Experts), Apex preserves each local brand - meaning "Apex" is invisible to consumers while the acquired brands (local HVAC companies with decades of community trust) carry the customer relationship.

Brand Identity Evolution: Apex's brand strategy is deliberately "invisible parent" - the corporate brand serves PE investors and acquisition targets, while local brands serve customers. This creates organizational complexity: 107+ brand identities must be maintained while standardizing back-office operations. The brand evolution challenge isn't building Apex's brand - it's scaling the organizational infrastructure without damaging 107 local brands.

Marketing Leadership & Strategy: [INFERRED] Marketing is decentralized to local brands - each acquired company maintains its own marketing, customer relationships, and community presence. Corporate marketing focuses on recruiting acquisition targets (demonstrating the value of joining the Apex platform) and PE investor communications.

Brand Threats: Competitor platforms (Wrench Group, Home Franchise Concepts, Authority Brands) pursuing the same acquisition targets. If Apex's integration degrades service quality at acquired companies, local brand equity erodes - and with it, customer retention and technician loyalty. Homeowner review platforms (Google, Yelp, Angi) make quality inconsistency immediately visible.

McChrystal Connection: 107+ autonomous local brands that must coordinate on shared services (procurement, technology, training, recruiting) while maintaining local independence is the exact Team of Teams challenge. The "invisible parent" model works only if the organizational coordination is excellent - any centralized initiative that damages local brand quality destroys the entire value proposition.

SECTION 9

Deep McChrystal Group Fit Analysis

This is the strategic case for pursuing Apex Service Partners. It synthesizes findings from all previous sections into a comprehensive engagement thesis with specific fit dimensions, expected outcomes, stakeholder mapping, and a phased pursuit strategy.

9a. Fit Dimensions

Fit Dimension 1: Roll-Up Integration at Hyper-Scale

107+ acquisitions in a PE hold period creates organizational integration debt that compounds with every deal. Each acquired company has its own culture, processes, systems, and customer relationships. McChrystal's Team of Teams connects 107 autonomous units without destroying the local effectiveness that made each acquisition valuable. Integration-specific firms handle deal-level PMI; McChrystal builds the enterprise coordination architecture.

Fit Dimension 2: Culture Scaling Without Dilution

Apex's model depends on preserving the entrepreneurial culture of acquired companies while adding the professional infrastructure of a \$2.2B platform. At 107+ entities, this balance requires deliberate organizational design - not just good intentions. McChrystal's shared consciousness methodology creates cultural cohesion across autonomous units without homogenizing them.

Fit Dimension 3: Technician Workforce Coordination

HVAC, plumbing, and electrical technicians are the revenue-generating asset. Recruiting, training, and retaining 8,000 technicians across 107 companies requires coordination systems that most roll-ups never build. McChrystal's operating model extends to frontline workers - not just leadership.

9b. Cumulative Case

Apex is the most aggressive home services roll-up in the market - 107+ acquisitions creating an organizational scaling challenge that will define whether PE-backed home services roll-ups succeed as a category. Signal chain: PE backing -> 107+ acquisitions -> 8,000 employees -> 107 local brands -> invisible parent model -> integration debt -> technician shortage -> next wave of acquisitions funded. Revenue potential: \$250K initial, \$600K-\$900K deployment, \$200K ongoing. Total: \$1M-\$1.5M.

9c. Enterprise Issues

1. Integration Debt at 107+ Acquisitions: Each deal at a different integration stage - early acquisitions may be fully integrated, recent ones still independent. Variation creates inconsistent customer and employee experience.
2. Technology Platform Fragmentation: 107 acquired companies brought 107 different CRMs, scheduling systems, invoicing tools, and communication platforms. Standardizing without disrupting active operations.
3. Technician Recruiting Competition: HVAC/plumbing/electrical technician shortage is industry-wide. Apex competes for technicians with both other platforms and independent shops. Organizational reputation as an employer matters.
4. Local Brand Quality Maintenance: If centralized initiatives (procurement, scheduling, pricing) degrade the customer experience at local brands, Yelp/Google reviews punish immediately.
5. PE Timeline Pressure: PE sponsors expect value creation and exit readiness within the hold period. Integration velocity must match deal velocity.

9d. Expected Outcomes

1. Scalable Integration Cadence: Operating rhythm enabling parallel acquisition absorption. Measurable: time-to-integration reduced by 30%.
2. Shared Services Without Local Damage: Coordination architecture for centralized procurement, tech, and training that enhances local brands. Measurable: local brand NPS maintained or improved.
3. Technician Retention Program: Enterprise-wide recruiting and retention framework. Measurable:

technician turnover reduced by 15%. 4. Cross-Entity Best Practice Sharing: System for 107 companies to share operational best practices. Measurable: measurable adoption of best practices across 50%+ of entities within 12 months.

9e. Key Stakeholders

CEO

Leader: [CEO]

Role: Platform leadership

McChrystal Relevance: Executive sponsor

COO

Leader: [COO]

Role: 107+ entity operations

McChrystal Relevance: Priority: Integration coordination

VP Integration

Leader: [VP M&A]

Role: Acquisition integration

McChrystal Relevance: Priority: Integration playbook scaling

PE Sponsor

Leader: [Lead PE firm]

Role: Value creation oversight

McChrystal Relevance: Sponsor relationship

9f. Opportunity Thesis

Why Now: 107+ acquisitions accumulated, more coming. Integration debt compounds non-linearly - addressing it now prevents exponential complexity.

Why McChrystal: No consulting firm matches McChrystal's capability for connecting 107+ autonomous units. Military special operations coordination across dozens of autonomous teams is the direct analog.

Phased Engagement: Phase 1 (\$200K-\$300K): Integration operating model assessment. Phase 2 (\$400K-\$600K): Enterprise coordination deployment. Phase 3 (\$200K retainer): Ongoing integration management. Total: \$800K-\$1.1M.

Multi-Threaded Pursuit: COO (operations), VP Integration (M&A), PE sponsor (portfolio value creation). Home services industry events; PE network connections.
