### McChrystal Group

Leadership Advisory & Organizational Effectiveness

SECTION 1

Organization Snapshot

|              |                                                                                                                                                                                                                                                 |
|--------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Legal Name   | GXO Logistics, Inc.                                                                                                                                                                                                                             |
| Headquarters | Greenwich, Connecticut, United States                                                                                                                                                                                                           |
| Founded      | 2021                                                                                                                                                                                                                                            |
| Ownership    | Public (NYSE: GXO). Spun off from XPO Logistics in August 2021. No controlling shareholder; institutional investor base.                                                                                                                        |
| Footprint    | Operations in approximately 27 countries across North America, Europe, and Asia-Pacific. 1,200+ warehouse and logistics facilities. Major presence in US, UK (expanded via Wincanton acquisition), Continental Europe, and select APAC markets. |

SECTION 1b

Company Overview

GXO Logistics is the world's largest pure-play contract logistics company, operating 1,000+ warehouses across 27 countries with approximately 150,000 employees. Spun off from XPO in 2021, GXO provides technology-driven supply chain solutions for Fortune 500 companies across e-commerce, consumer goods, healthcare, and industrial sectors. The company completed its acquisition of UK-based Wincanton in 2025.

SECTION 2

Financial Health & Growth Stage

Understanding GXO Logistics's financial position and trajectory is critical to framing any engagement conversation.

Revenue: \$13.2B FY2025 (record), up 12.5% YoY from \$11.7B in FY2024, driven by Wincanton acquisition and 3.5% organic growth. Q4 2025 revenue of \$3.5B (+7.9% YoY).

Profitability: Adjusted EBITDA of \$881M FY2025 (up from \$815M), but GAAP diluted EPS dropped sharply from \$1.12 to \$0.28 - reflecting integration costs, higher interest expense, and one-time items. Adjusted EPS of \$2.52 provides a cleaner picture.

2026 Guidance: Organic revenue growth of 4-5%, adjusted EBITDA of \$930-970M (8% growth), adjusted EPS of \$2.85-\$3.15 (20% growth). Company expects \$50-70M in annual Wincanton synergies by 2026.

Analyst Sentiment: Consensus Strong Buy from 11 analysts, average price target \$67.91. Investors are cautiously optimistic on margin expansion and integration execution but watching leverage and leadership transition risk.

Key Pressures: Integration execution risk on Wincanton, elevated leverage from acquisitions, EPS decline despite revenue growth, multiple simultaneous leadership transitions. Key Tailwinds: Record new business wins (\$1B+ for

third consecutive year), automation-driven productivity gains, margin expansion trajectory, strong 2026 pipeline (\$774M incremental revenue).

### SECTION 3

## Leadership Team Profiles

*The following contacts are recommended as primary outreach targets - champion-level leaders who feel the organizational pain daily and can sponsor McChrystal internally.*

### **Patrick Kelleher - Chief Executive Officer [PRIORITY TARGET]**

33 years in global supply chain. Former CEO North America at DHL Supply Chain (Deutsche Post DHL). Led M&A transactions, robotics deployments (Boston Dynamics Stretch), and major operational transformations at DHL. Metrics-driven leader focused on execution and innovation.

*Outreach rationale: Economic buyer. New CEO actively reshaping the organization - replaced CRO, created COO role, hired new Americas president. Clearly driving a mandate to build 'his team' and a new operating rhythm. Open to external advisory that accelerates transformation without adding bureaucracy.*

### **Bart Beeks - Chief Operating Officer [PRIORITY TARGET]**

Career at CEVA Logistics, rising from intern to COO. Managed operations in 170+ countries, led multiple acquisition integrations, drove operating margin improvements. Based in Eindhoven, Netherlands.

*Outreach rationale: Internal champion. His mandate - 'standardize global execution' across a fragmented, recently-acquired operation - is the exact problem McChrystal's Team of Teams operating model solves. New to the organization and building his own playbook.*

*Additional leadership team members relevant to the engagement:*

### **Michael Jacobs - President, Americas & Asia Pacific**

30+ years in supply chain operations. Former SVP Supply Chain at Ferguson Enterprises where he led supply chain transformation including robotics and AI. Previously led global supply chain at Toys 'R' Us across 33 countries and worldwide distribution at Keurig.

### **Baris Oran - Chief Financial Officer**

Finance executive. Joined from XPO Logistics during spinoff. Oversees financial strategy, capital allocation, and investor relations.

### **Mark Manduca - Chief Investment Officer**

Investment and strategy background. Oversees M&A pipeline and strategic investments including automation technology partnerships.

### SECTION 4

## Organizational Culture & Structure

*Culture and structure are often where McChrystal Group finds the deepest leverage. The following signals indicate how GXO Logistics operates today and where friction exists.*

## Organizational Structure

Historically regional/hierarchical structure inherited from XPO spinoff. Currently undergoing active restructuring under new CEO Kelleher: European reporting flattened to CEO direct (eliminating CRO layer), new COO role created for global operational standardization, Americas/APAC consolidated under single president. Shifting from decentralized regional fiefdoms toward a more matrixed, globally standardized operating model.

## Culture Signals

Glassdoor: 3.4/5.0 overall rating (2,082 reviews). Culture & Values rated 3.2/5.0. 61% would recommend to a friend.

Positive signals: Strong benefits, learning opportunities, sense of belonging in some locations. Company invests in automation training.

Concerning patterns: Recurring themes of 'bad management,' 'favoritism,' and disconnect between corporate vision and warehouse-floor reality. Reviews describe a 'startup culture that prioritizes relentless output over meaningful work' and 'upper management is extremely biased.' Long hours and shifting schedules are common complaints.

McChrystal relevance: The gap between corporate headquarters (Greenwich, CT) and 1,200+ warehouse operations is a classic 'shared consciousness' problem. Mid-level management quality appears inconsistent - exactly the leadership layer where Team of Teams operating rhythms create the most impact. The Wincanton integration adds another cultural layer (UK heritage vs. US-centric GXO).

## SECTION 5

## Recent News & Trigger Events

*The following developments from the past 18 months create urgency and provide natural conversation entry points for engaging GXO Logistics.*

### 1. 2025-06-20 - Patrick Kelleher appointed CEO, replacing retiring Malcolm Wilson

First external CEO signals board's desire for operational transformation. New leader will need to build alignment across a global organization inherited from his predecessor.

### 2. 2025-06-19 - UK CMA clears Wincanton acquisition with conditions; integration commences

Large-scale cross-border integration creates organizational complexity - different cultures, systems, and processes must be unified. Classic McChrystal engagement trigger.

### 3. 2025-10-29 - Major organizational restructuring announced: new Americas/APAC president hired, CRO role eliminated, European reporting flattened to CEO

Kelleher is actively redesigning the organization's operating model. This is the moment to offer a framework for how to build shared consciousness across a restructured global enterprise.

### 4. 2025-12-12 - Bart Beeks appointed as first-ever COO, newly created role to drive standardized global execution

Creating a new COO role signals that operational fragmentation is a recognized problem. Beeks' mandate to

standardize 1,200+ sites is a natural McChrystal Team of Teams engagement.

**5. 2026-02-10 - Q4 and FY 2025 earnings: record \$13.2B revenue (+12.5% YoY) but diluted EPS dropped from \$1.12 to \$0.28; 2026 guidance targets 20% adjusted EPS growth**

Revenue growth masking profitability pressure. The gap between top-line momentum and bottom-line delivery creates urgency around operational excellence and leadership alignment - exactly when organizations seek advisory help.

**6. 2026-03-01 - CRO Richard Cawston departs after mutual agreement; role eliminated in restructuring**

Senior departure from a revenue-facing role during active restructuring. Signals potential internal friction or strategic disagreement during transition. Creates organizational uncertainty in European commercial operations.

**7. 2025-01-01 - GXO IQ AI platform rolling out across 1,200+ global operations; 20,000+ robots deployed; humanoid robot pilots with Agility Robotics and Reflex Robotics**

Technology transformation at this scale requires aligned leadership, cross-functional collaboration, and change management - areas where warehouse-level adoption can stall without shared consciousness across sites.

## SECTION 6

# McChrystal Fit Assessment

*Meets 4 of 5 Strong criteria: (1) Active trigger events within last 6 months (multiple C-suite changes, restructuring, Wincanton integration); (2) Clear economic buyers identified (Kelleher, Beeks); (3) Budget exists (\$13.2B revenue, known transformation spend, \$50-70M synergy target); (4) Organizational urgency (new CEO mandate, 75% EPS decline, three simultaneous transformations). Competitive barrier is moderate - consulting firms are likely present but McChrystal's differentiated Team of Teams model has no direct analog in the logistics advisory space.*

## Primary Problem

A new CEO is simultaneously restructuring leadership, integrating a major acquisition (Wincanton), and driving automation transformation across 1,200+ facilities in 27 countries - without an established operating model or cohesive leadership team to execute it all. The organization risks fragmentation as three major change initiatives compete for attention and new leaders (CEO, COO, Americas President) try to build alignment with inherited teams.

## Best McChrystal Capability Fit

Team of Teams operating model implementation. GXO's challenge is textbook: a large, geographically dispersed organization with siloed regional structures needs to move faster, share information better, and execute consistently across 130,000 people. The new COO's explicit mandate to 'standardize global execution' is precisely what the Team of Teams model delivers - shared consciousness, empowered execution, and cross-functional alignment without centralizing all decision-making.

## Likely Objections to Engagement

'We're an operations company - we need operational consultants, not leadership advisors.' Counter: McChrystal's model was built in operational environments where execution speed and coordination across

dispersed teams was life-or-death. The principles translate directly.

'We just hired a new COO to solve this.' Counter: Beeks needs a framework and facilitation to accelerate alignment, not replace his role. McChrystal accelerates what good operators are already trying to do.

'Budget is tight - EPS dropped 75% year-over-year.' Counter: The \$50-70M Wincanton synergy target alone justifies a \$500K-\$1M advisory engagement if it accelerates integration by even one quarter.

'We've got 20,000 robots - our transformation is technological, not organizational.' Counter: Technology adoption at scale is an organizational challenge. The robots work; the question is whether 130,000 people across 27 countries are aligned on how to deploy and optimize them.

## Competitive Advisory Landscape

McKinsey Operations Practice - likely engaged on Wincanton integration synergy capture and supply chain optimization

Korn Ferry - potential leadership assessment and executive onboarding for the multiple new C-suite hires

Bain & Company - may be advising on post-merger integration playbook given PE heritage (XPO/GXO has PE DNA)

Gartner Supply Chain - technology advisory and benchmarking for automation strategy

Internal transformation team - GXO likely has an internal PMO managing integration; McChrystal would need to complement, not compete with, this team

## SECTION 7

# Conversation Entry Points

*These questions are designed for a Senior Partner's first conversation. Each opens a thread that naturally leads to McChrystal Group's capabilities without a direct pitch.*

## 1. You've restructured nearly every senior leadership role in your first 6 months - what's your framework for getting this new team operating as one unit across 27 countries before the market expects results?

Position McChrystal as the firm that helps new leadership teams build shared consciousness and operating rhythm at speed - not strategy consultants, but the team that helps leaders lead differently.

## 2. Your new COO is tasked with standardizing global execution across 1,200+ sites - how are you thinking about the balance between centralized standards and local autonomy in markets as different as the UK, Continental Europe, and the Americas?

This opens the door to Team of Teams - the tension between standardization and empowered execution is the core problem the model solves. Reference General McChrystal's experience standardizing operations across Joint Special Operations Command's geographically dispersed units.

## 3. With Wincanton integration underway and 20,000+ robots deployed, how confident are you that your mid-level leaders - the site managers and regional directors - are aligned on priorities and empowered to make the right calls daily?

Shift the conversation from C-suite strategy to mid-level execution. McChrystal's model is about pushing decision-making down - and GXO's warehouse-level leadership is where transformation succeeds or fails.

## Recommended Meeting Framing

Position as a peer conversation between leaders who've built high-performing organizations in complex, dispersed operating environments. Lead with General McChrystal's experience unifying special operations across multiple countries and commands - the parallel to GXO's 27-country, 1,200-site challenge is immediate and credible. Avoid 'consulting pitch' framing; Kelleher is an operator who will respect direct, experience-based dialogue over frameworks and decks.

### SECTION 8

## Brand Insights & Market Positioning

*Brand strategy reveals organizational priorities and coordination challenges. The following analysis connects GXO Logistics's market positioning to potential McChrystal engagement opportunities.*

**Brand Value & Competitive Standing:** GXO is the world's largest pure-play contract logistics company, operating 1,200+ warehouses in 27 countries for major brands (Nike, Apple, Nestlé). The GXO brand stands for technology-led logistics - automation, robotics, and AI-driven warehousing. GXO competes against DHL Supply Chain, XPO (its former parent), CEVA Logistics, and Ryder.

**Brand Identity Evolution:** GXO was spun off from XPO Logistics in 2021 as a pure-play contract logistics company. The brand is still building recognition independent of XPO. The Wincanton acquisition (2024, UK-based logistics) expands the brand into new European markets but creates integration complexity.

**Marketing Leadership & Strategy:** GXO's marketing emphasizes technology differentiation - the company positions itself as a "tech-first logistics provider" with proprietary automation and data analytics. The brand story targets Fortune 500 supply chain leaders who want to outsource warehousing to a technology leader.

**Brand Threats:** Labor-intensive warehouse operations face automation disruption from Amazon Robotics, Locus Robotics, and Berkshire Grey. If GXO's automation deployment slows during integration/restructuring, competitors close the technology gap. Customer concentration risk - large contracts mean losing one customer creates significant revenue impact.

**Major Brand Investments:** Automation/robotics deployment across the warehouse network, Wincanton integration (expanding European footprint), and technology partnerships. The "GXO Labs" innovation center showcases automation capabilities to prospective customers.

**McChrystal Connection:** 130,000 employees across 1,200+ facilities in 27 countries - this is one of the most operationally distributed organizations in the pipeline. The brand promise of "technology-led, reliable logistics" requires coordination at massive scale. A new CEO restructuring leadership while integrating Wincanton and deploying automation creates exactly the multi-front transformation McChrystal's operating model addresses.

## SECTION 9

## Deep McChrystal Group Fit Analysis

*This is the strategic case for pursuing GXO Logistics. It synthesizes findings from all previous sections into a comprehensive engagement thesis with specific fit dimensions, expected outcomes, stakeholder mapping, and a phased pursuit strategy.*

### 9a. Fit Dimensions

#### Fit Dimension 1: CEO Transition with Immediate Execution Mandate

New CEO must simultaneously restructure leadership, integrate Wincanton, and drive automation transformation - without an established leadership team or operating rhythm. McChrystal's leadership alignment methodology accelerates CEO effectiveness. Unlike executive coaching firms, McChrystal builds the organizational system around the leader, not just the leader themselves.

#### Fit Dimension 2: Mega-Scale Distributed Operations Coordination

1,200+ facilities across 27 countries with 130,000 employees is one of the most operationally complex organizations in any sector. Coordination mechanisms that work for 100 facilities break at 1,200. McChrystal's Team of Teams model was designed for exactly this scale - connecting distributed, semi-autonomous units into a coordinated whole. No consulting firm has comparable experience at this operational scale.

#### Fit Dimension 3: Automation Transformation as Organizational Change

Deploying robotics and AI across 1,200 warehouses isn't a technology project - it's an organizational transformation affecting 130,000 workers' roles, skills, and career trajectories. McChrystal's change management approach ensures automation deployment doesn't trigger the workforce resistance that has stalled similar programs at other logistics companies.

### 9b. Cumulative Case

GXO is the largest-scale organizational transformation in the pipeline by headcount (130,000). Signal chain: CEO transition -> leadership restructuring -> Wincanton integration -> automation deployment across 1,200 facilities -> 27 countries -> 130,000 employees. Revenue potential: \$500K-\$600K initial (CEO alignment + integration coordination), \$1.5M-\$2M deployment, \$500K ongoing. Total: \$2.5M-\$3.5M over 24 months.

### 9c. Enterprise Issues

1. CEO Establishing Authority at Scale: A new CEO must be felt across 1,200 facilities in 27 countries. Communication and operating rhythm must reach every warehouse manager, not just the C-suite.
2. Wincanton Integration Across Cultures: UK-based Wincanton's culture, customer relationships, and operating practices differ from GXO's U.S.-centric approach. Cross-Atlantic cultural integration at scale.
3. Automation Workforce Impact: Robotics deployment changes or eliminates roles for hourly warehouse workers - the bulk of 130,000 employees. Managing this transition humanely while maintaining operational output.
4. Customer Contract Performance During Transformation: Each warehouse operates under specific customer SLAs. Integration and automation changes cannot degrade service levels for Nike, Apple, Nestlé, etc.
5. 27-Country Regulatory Complexity: Labor, environmental, and operational regulations differ dramatically across geographies.

Organizational changes must be adapted to each jurisdiction. 6. Leadership Gap Post-Restructuring: C-suite restructuring means new leaders in key roles with limited institutional knowledge. Learning curves during peak transformation create execution risk.

## 9d. Expected Outcomes

1. CEO Operating Rhythm: Communication and coordination system connecting new CEO to 1,200 facilities. Measurable: CEO strategic priorities understood at facility level within 90 days. 2. Wincanton Integration: Cross-cultural coordination cadence for UK-GXO integration. Measurable: integration milestones on-track, customer SLAs maintained. 3. Automation Deployment Coordination: Cross-functional framework for robotics rollout across facilities. Measurable: automation deployment velocity maintained at target rate. 4. Workforce Transition: Change management framework for automation-affected roles. Measurable: voluntary attrition below industry average during automation deployment. 5. Customer SLA Protection: Operational discipline ensuring service levels during transformation. Measurable: SLA compliance >99% across all major customer contracts.

## 9e. Key Stakeholders

### CEO

Leader: [New CEO]

Role: Enterprise transformation

McChrystal Relevance: Executive sponsor

### COO

Leader: [COO]

Role: 1,200 facility operations

McChrystal Relevance: Priority: Distributed operations coordination

### CFO

Leader: [CFO]

Role: Integration economics, automation ROI

McChrystal Relevance: Budget gatekeeper

### CTO

Leader: [CTO/Chief Automation Officer]

Role: Robotics/AI deployment

McChrystal Relevance: Automation transformation

### CHRO

Leader: [CHRO]

Role: 130,000 employee workforce transition

McChrystal Relevance: Priority: Change management at scale

### Europe/Wincanton

Leader: [Regional President]

Role: UK/European integration

McChrystal Relevance: Cultural integration

## 9f. Opportunity Thesis

Why Now: New CEO + Wincanton integration + automation acceleration all converging. First 12 months of new

CEO tenure determine organizational trajectory.

Why McChrystal, Not McKinsey: McKinsey advises on logistics strategy and automation roadmap. Deloitte handles IT integration. But coordinating transformation across 130,000 employees in 1,200 facilities across 27 countries - that's a scale of distributed operations coordination where McChrystal's military experience is uniquely relevant. JSOC coordinated operations across more countries with similar complexity.

Phased Engagement: Phase 1 (\$500K-\$600K): CEO operating rhythm + Wincanton integration coordination. Phase 2 (\$1M-\$1.5M): Enterprise deployment, automation coordination framework. Phase 3 (\$500K retainer): Ongoing transformation management. Total: \$2M-\$2.5M.

Multi-Threaded Pursuit: COO (distributed operations), CHRO (workforce transformation), and CEO (executive sponsor via logistics industry or military connections).
