Prepared March 19, 2026

McChrystal Group

Leadership Advisory & Organizational Effectiveness

SECTION 1

Organization Snapshot

Legal Name	Haleon plc
Headquarters	Weybridge, Surrey, England, UK
Founded	2022

Ownership

Public - dual-listed London Stock Exchange (FTSE 100) and NYSE. GSK and Pfizer have fully exited. BlackRock is largest shareholder.

Footprint

170+ markets. Reorganizing into six Operating Units: North America, Europe, Latin America, MEA, APAC, India Subcontinent. Completed full buyout of China OTC JV (TSKF) June 2025.

SECTION 1b

Company Overview

Haleon is the world's largest standalone consumer health company, spun off from GSK in 2022. The company owns iconic brands including Sensodyne, Advil, Voltaren, Centrum, and Theraflu, serving consumers across oral health, pain relief, vitamins, and respiratory health globally.

SECTION 2

Financial Health & Growth Stage

Understanding Haleon's financial position and trajectory is critical to framing any engagement conversation.

Revenue: FY2024 GBP 11.2B -> FY2025 GBP 11.0B (organic +3.0%, below 4-6% guidance). Adj. operating profit +10.5% organically. Gross margins +220 bps. FY2026 guidance: organic 3-5%, high single-digit adj. operating profit growth. GBP 800M productivity target over 5 years. Consensus Moderate Buy (9 buy, 1 hold, 1 sell). Target ~430p (~15% upside). Pressures: top-line growth below guidance, FX headwinds. Tailwinds: margin expansion, productivity savings, shareholder overhang cleared.

SECTION 3

Leadership Team Profiles

The following contacts are recommended as primary outreach targets - champion-level leaders who feel the organizational pain daily and can sponsor McChrystal internally.

Brian McNamara - CEO [PRIORITY TARGET]

BS Electrical Engineering (Union College), MBA Finance (Cincinnati). 16 years P&G, 10 years Novartis (Executive Committee). Mondelez board.

Outreach rationale: Architect of 'Win as One' transformation. Publicly committed to overhauling entire operating model by mid-2026. Engineer-turned-CEO who values structured frameworks.

Jonathan Workman - Chief Transformation Officer / President Europe [PRIORITY TARGET]

15 years P&G, then 15+ years GSK/Haleon in GM roles across Asia, Africa, Europe. President of AESGP.

Outreach rationale: Owns transformation execution. P&G discipline + diverse GM experience = understands complexity of making decentralized models work. Most likely internal champion.

Additional leadership team members relevant to the engagement:

Dawn Allen - CFO

25 years at Mars (rose to Global CFO & VP Global Transformation). CFO Tate & Lyle. ICAEW member. Her Mars title 'VP Global Transformation' signals direct transformation experience.

Filippo Lanzi - Chief Growth Officer

9 years Nestle, then J&J, GSK since 2015. Oversees Category, Marketing, Strategy, Commercial Excellence.

Line De Decker - CHRO**Vindi Banga - Chairman**

33 years Unilever (CEO Hindustan Unilever). Operating Partner at Clayton Dubilier & Rice. Chair of UK Government Investments (UKGI). Chair Imperial College London Council.

SECTION 4

Organizational Culture & Structure

Culture and structure are often where McChrystal Group finds the deepest leverage. The following signals indicate how Haleon operates today and where friction exists.

Organizational Structure

Reorganizing from three geographic regions into six Operating Units with direct CEO reporting. Creating CGO and CTO to break functional silos. Eliminating CMO role. Category-led model replacing geographic fiefdoms.

Culture Signals

Glassdoor 3.6/5.0. Career opportunities 3.4 (weakness). 70% recommend. Concerns: 'lack of career progression,' 'no job security' during restructuring, some regions flagged as 'toxic.' Still shedding GSK pharma DNA while building consumer-first culture. Six Operating Units while asking people to 'Win as One' is an inherent tension. Multiple leadership changes (CFO, CHRO, CMO, Chairman, R&D Chief all changed 2024-2026) - restructuring fatigue risk.

SECTION 5

Recent News & Trigger Events

The following developments from the past 18 months create urgency and provide natural conversation entry points for engaging Haleon.

1. 2026-02-25 - FY2025 results: organic +3.0% (below guidance); announced operating model overhaul

with CGO, CTO, six Operating Units

Publicly admitting current structure doesn't deliver growth. Overhauling entire operating model = maximum organizational disruption and advisory need.

2. 2026-01-01 - Vindi Banga becomes Chairman, succeeding Sir Dave Lewis

New board leadership catalyzes fresh thinking. Banga's CD&R/Unilever background values operational transformation.

3. 2025-03-19 - Pfizer sells final 7.3% stake for ~\$3.3B. Haleon fully independent.

First time without former parent oversight. Can pursue own organizational identity.

4. 2025-08-01 - Carl Haney appointed Chief R&D Officer (external hire)

Another senior change adding to team dynamics that need integration.

5. 2025-06-01 - Completed full buyout of China OTC JV (TSKF)

Integrating previously semi-independent entity into new operating model. Adds complexity.

6. 2025-05-01 - Capital Markets Day: 'Win as One' strategy, GBP 800M productivity target, 1B more consumers by 2030

Public commitment. CEO has staked reputation on this strategy delivering.

7. 2024-11-01 - Dawn Allen joins as CFO from Mars/Tate & Lyle

Allen's Mars title 'VP Global Transformation' - hired for transformation credentials alongside financial expertise.

SECTION 6

McChrystal Fit Assessment

Transformation publicly committed and underway. Organizational challenge maps directly to core offering. CEO staked reputation on it. Timing right (mid-2026 deadline). Company large enough for premium advisory.

Primary Problem

Transforming a 24,000-person company's entire operating model - from regional geographic structure to category-led six-Operating-Unit model - in ~18 months, while delivering growth acceleration and GBP 175-200M cost savings. Challenge is organizational execution at speed: getting six new unit leaders, new CGO, CTO, CFO, CHRO, and R&D chief to operate cohesively while org chart redraws underneath them.

Best McChrystal Capability Fit

Team of Teams - creating exactly the kind of decentralized multi-unit structure that fails without shared consciousness. Cross-functional alignment - CGO must coordinate Category, Marketing, Strategy, R&D, Supply Chain across six regions. Leadership development - multiple new Executive Committee members who have never worked together.

Likely Objections to Engagement

Already have a Chief Transformation Officer and detailed plan
Consumer healthcare, not military/defense

Focused on cost savings - can't add advisory spend
 Already working with Big 4 / McKinsey [INFERRED]

Competitive Advisory Landscape

McKinsey - likely already involved given size and scope
 Korn Ferry - org structure / Executive Committee expansion
 BCG/Bain - consumer goods sector expertise
 Deloitte - technology/process transformation
 McChrystal differentiator: 'Win as One' is literally Team of Teams. No competitor offers the operating model framework for making decentralized structures operate as one.

SECTION 7

Conversation Entry Points

These questions are designed for a Senior Partner's first conversation. Each opens a thread that naturally leads to McChrystal Group's capabilities without a direct pitch.

- 1. You've committed to making six Operating Units work as one team by mid-2026. What's your plan for building shared consciousness across unit leaders who have historically competed for resources?**
- 2. Your new CGO role sits at the intersection of Category, Marketing, Strategy, R&D, Supply Chain, and six regional units. How are you ensuring Filippo Lanzi has the connective tissue to lead across all those interfaces without becoming a bottleneck?**
- 3. With a new CFO, CHRO, CTO, R&D chief, and Chairman all joining in 18 months, your Executive Committee is essentially a startup team inside a GBP 11B company. How are you accelerating team formation?**

Recommended Meeting Framing

Frame as 'lessons from organizations that have successfully decentralized at scale.' Bring case studies. Hook: 'The ones that succeed invest as much in the operating system - how teams connect and share information - as they do in the org chart. The ones that fail assume the new structure creates new behavior. It never does.'

SECTION 8

Brand Insights & Market Positioning

Brand strategy reveals organizational priorities and coordination challenges. The following analysis connects Haleon's market positioning to potential McChrystal engagement opportunities.

Brand Value & Competitive Standing: Haleon owns some of the world's most recognized consumer healthcare brands: Sensodyne (#1 toothpaste by revenue globally), Advil, Centrum, Voltaren, Theraflu, and Tums. Combined brand portfolio value estimated at \$15B+. Haleon competes against Reckitt Benckiser (Mucinex, Durex), Johnson & Johnson (Tylenol, Listerine), and Procter & Gamble (Vicks, Oral-B).

Brand Identity Evolution: Haleon was spun off from GSK in July 2022 as the world's largest standalone consumer

healthcare company (\$14.5B revenue). The "Haleon" corporate brand is still being established - consumers know Sensodyne and Advil, not Haleon. The corporate brand evolution from "GSK Consumer Healthcare" to standalone "Haleon" parallels the organizational identity transformation.

Marketing Leadership & Strategy: Haleon invests heavily in brand marketing - consumer healthcare requires direct-to-consumer advertising, pharmacy/retail relationships, and healthcare professional endorsement. The shift to six category-led Operating Units (from three geographic regions) will fundamentally change how marketing is organized - local market adaptation within global category strategies.

Brand Threats: Private label / store brand growth eroding premium pricing power. GLP-1 weight loss drugs reducing demand for some OTC categories. Amazon and digital pharmacy channels disrupting traditional retail distribution. Regulatory scrutiny on health claims for supplements (Centrum).

Major Brand Investments: Sensodyne and Advil are the flagship investment brands - receiving the majority of advertising spend. Innovation pipeline focuses on premium product extensions within existing brands. Digital marketing and e-commerce capabilities being built rapidly.

McChrystal Connection: Haleon's "Win as One" operating model transformation - moving from regional structure to category-led Operating Units - is fundamentally about how 24,000 people coordinate across brands, geographies, and functions. The brand promise of "better everyday health" requires consistent execution across markets that the old regional structure couldn't deliver. McChrystal's cross-functional alignment methodology ensures the new Operating Unit structure actually changes how work gets done, not just how org charts look.

SECTION 9

Deep McChrystal Group Fit Analysis

This is the strategic case for pursuing Haleon. It synthesizes findings from all previous sections into a comprehensive engagement thesis with specific fit dimensions, expected outcomes, stakeholder mapping, and a phased pursuit strategy.

9a. Fit Dimensions

Fit Dimension 1: Operating Model Transformation at Scale

Haleon is dismantling its three-region geographic structure and replacing it with six category-led Operating Units - affecting every employee's reporting lines, decision authorities, and operating rhythms. This is the most ambitious organizational redesign in consumer healthcare. McKinsey designs the Operating Unit structure; McChrystal builds the cross-unit coordination system that prevents six OUs from becoming six silos. Competitor displacement: Deloitte handles change management communications; McChrystal builds the operating rhythm that makes the new structure function.

Fit Dimension 2: Post-Spinoff Identity and Culture Building

Like Solventum, Haleon is building a corporate identity from scratch - 24,000 employees who were "GSK people" must become "Haleon people" with shared values, operating norms, and cultural identity. McChrystal's shared consciousness methodology accelerates cultural formation in newly independent organizations.

Fit Dimension 3: Simultaneous Transformation + Growth Delivery

Haleon must deliver GBP 300M+ in cost savings while growing organically 4-6% - requiring the operating model transformation to improve (not degrade) commercial execution. McChrystal's approach ensures transformation enables rather than disrupts growth delivery.

9b. Cumulative Case

Haleon is the largest operating model transformation in consumer healthcare globally - a \$14.5B company redesigning its entire organizational structure from geographic to category-led, 2 years post-spinoff, while delivering growth and cost savings simultaneously. Signal chain: GSK spinoff -> corporate identity building -> "Win as One" strategy -> 3-region to 6-OU transformation -> GBP 300M+ cost savings target -> 4-6% organic growth mandate -> 24,000 employees navigating simultaneous identity change and structural change. Revenue potential: \$500K initial, \$1.5M-\$2M deployment, \$500K ongoing. Total: \$2.5M-\$3.5M over 24 months.

9c. Enterprise Issues

1. Operating Unit Boundary Confusion: Six new OUs must define their scope, decision rights, and resource ownership - but many products span multiple categories and many markets need cross-OU coordination. Boundary disputes will consume leadership bandwidth. 2. Regional Knowledge Loss: The shift from regional to category-led means local market expertise (regulatory, distribution, consumer behavior) could be diluted. The structure must preserve local knowledge while enabling global category scale. 3. Shared Services Redesign: Functions that served three regions must now serve six OUs - creating different demand patterns, SLA requirements, and resource allocation challenges. 4. GLP-1 Strategic Response: Weight loss drugs are disrupting OTC categories (appetite suppressants, metabolic health). Haleon's organizational response requires cross-OU coordination to adapt the portfolio. 5. Digital Transformation Overlay: Building e-commerce and digital marketing capabilities on top of the OU transformation creates change-on-change complexity. 6. Post-Spinoff TSA Expiration: Transitional Service Agreements with GSK continue to expire, requiring Haleon to stand up standalone capabilities (IT, procurement, regulatory) on deadlines that don't align with the OU transformation timeline.

9d. Expected Outcomes

1. Six-OU Operating Rhythm: Cross-OU coordination cadence preventing silos. Measurable: cross-OU decision cycle time <5 business days. 2. Category-Market Matrix Coordination: Framework for managing products that span multiple OUs. Measurable: zero unresolved boundary disputes after 90 days. 3. Cost Savings Delivery: Organizational discipline ensuring GBP 300M+ targets are achieved. Measurable: savings milestones on-track quarterly. 4. Growth Protection During Transformation: Operating model that enables commercial execution during restructuring. Measurable: organic growth maintained at 4%+ through transformation period. 5. Cultural Identity Formation: Shared consciousness across 24,000 employees in the new Haleon identity. Measurable: employee identification with Haleon brand (vs. GSK) increasing quarter-over-quarter.

9e. Key Stakeholders

CEO

Leader: Brian McNamara

Role: "Win as One" architect

McChrystal Relevance: Executive sponsor

CFO

Leader: [CFO]

Role: Cost savings governance

McChrystal Relevance: Budget gatekeeper

Operating Unit Heads (6)

Leader: [Category Presidents]

Role: OU execution

McChrystal Relevance: Priority: Cross-OU coordination

CHRO

Leader: [Chief People Officer]

Role: Organizational design, culture

McChrystal Relevance: Priority: Operating model transformation

Strategy

Leader: [CSO]

Role: OU structure design

McChrystal Relevance: Transformation architecture

Supply Chain

Leader: [SVP Supply Chain]

Role: Global manufacturing/distribution

McChrystal Relevance: Cross-OU operational coordination

9f. Opportunity Thesis

Why Now: "Win as One" transformation launching in 2025-2026 - the operating model redesign is happening NOW. First 12 months of the new OU structure determine whether it creates the intended benefits or just creates new silos.

Why McChrystal, Not McKinsey: McKinsey almost certainly designed the six-OU structure. But designing the org chart and making it function are different capabilities. McChrystal builds the operating rhythm, information flow, and decision architecture that turns a structure into an operating model. The gap between McKinsey's recommendation and Haleon's execution is McChrystal's lane.

Phased Engagement: Phase 1 (\$400K-\$500K): Cross-OU coordination architecture - design operating cadence for six OUs. Phase 2 (\$1M-\$1.5M): Enterprise deployment across all OUs and shared functions. Phase 3 (\$500K retainer): Ongoing operating model optimization. Total: \$2M-\$2.5M.

Multi-Threaded Pursuit: OU heads (cross-OU coordination challenge), CHRO (organizational design), and CSO (transformation architecture). Consumer healthcare industry events; GSK alumni network; European business connections (Haleon HQ is in Weybridge, UK).
