

InvestCloud

Business Development Dossier

Industry	Financial Technology (Wealth Management)
Revenue	\$800M
Employees	3,000
Ideal Customer Profile Score	79

ICP SCORING MODEL

ICP = Signals + Revenue + Employees + Fit (max 100)

Signals (0-35)	Top 4 signals scored; each = base(60%) + recency bonus <30d: 40% <90d: 30% <180d: 20% older: 10%
Revenue (0-25)	\$500M-\$10B sweet spot -> 70-100% of 25 pts Below \$500M -> pro-rata x 0.5 Above \$10B -> 60%
Employees (0-20)	2,000+ preferred (70-100%) 500-2K partial (50-70%) Below 500 -> pro-rata x 0.3
Fit (0-20)	High-fit types: reorg, transformation, M&A, hiring, funding, partnership -> 5 pts ea (max 12) + diversity 2/type (max 8)

Prepared March 19, 2026

McChrystal Group

Leadership Advisory & Organizational Effectiveness

SECTION 1

Organization Snapshot

Legal Name InvestCloud, Inc.

Headquarters West Hollywood, California

Founded 2010

Ownership

Private, PE-backed by Motive Partners (acquired majority stake 2022). Motive is a specialist fintech PE firm.

Footprint

Global operations across U.S., U.K., Europe, Asia-Pacific, Middle East. Serves 500+ financial institutions worldwide.

SECTION 1b

Company Overview

InvestCloud is a global financial technology company that provides digital wealth management and financial planning platforms to over 500 financial institutions worldwide. Backed by Motive Partners, the company was formed through the 2021 merger of InvestCloud and Tegra118. Under CEO Jeff Yabuki (former Fiserv CEO), InvestCloud is pivoting from custom implementations to a productized, AI-first platform model.

SECTION 2

Financial Health & Growth Stage

Understanding InvestCloud's financial position and trajectory is critical to framing any engagement conversation.

Revenue ~\$800M [INFERRED from industry positioning and M&A history]. Formed through merger of InvestCloud and Tegra118 (2021). Motive Partners invested at ~\$1B+ valuation. AI-driven restructuring aimed at improving margins by shifting from custom professional services to scalable product revenue. Key pressure: fintech competition (Addepar, Black Diamond, Orion). Key tailwind: wealth management industry digitization accelerating.

SECTION 3

Leadership Team Profiles

The following contacts are recommended as primary outreach targets - champion-level leaders who feel the organizational pain daily and can sponsor McChrystal internally.

Jeff Yabuki - Chief Executive Officer [PRIORITY TARGET]

Former CEO of Fiserv (2005-2020). Led Fiserv from \$4B to \$15B revenue and through \$22B First Data merger. Deep fintech transformation experience.

Outreach rationale: Former Fiserv CEO who managed massive transformation. He understands organizational redesign at scale and is the economic buyer.

Additional leadership team members relevant to the engagement:

John Googas - President

Former InvestCloud COO. Operational leader managing day-to-day transformation.

SECTION 4

Organizational Culture & Structure

Culture and structure are often where McChrystal Group finds the deepest leverage. The following signals indicate how InvestCloud operates today and where friction exists.

Organizational Structure

Transitioning from a services-heavy model (custom implementations) to a product-led model (standardized platform). This requires fundamental restructuring of team composition, skill requirements, and delivery processes. The March 2026 layoffs targeted roles that don't fit the new model.

Culture Signals

Glassdoor reviews [INFERRED from similar fintech PE transitions] likely show anxiety around layoffs and strategic uncertainty. The shift from 'build custom solutions for each client' to 'deploy standardized products' is identity-changing for engineers and client teams who valued creative problem-solving. Motive Partners' PE timeline adds performance pressure. Former InvestCloud founder John Wise's departure [INFERRED] may have left a culture vacuum that Yabuki (as an outside CEO) is filling.

SECTION 5

Recent News & Trigger Events

The following developments from the past 18 months create urgency and provide natural conversation entry points for engaging InvestCloud.

1. 2026-03-09 - 150+ layoffs in Digital Wealth division

Active restructuring - organization is mid-transformation right now

2. 2026-02-01 - AI-driven business model pivot announced

Fundamental operating model change creates need for organizational redesign

3. 2025-09-01 - Jeff Yabuki accelerating strategic realignment

CEO-driven transformation with PE backing - decision-maker is engaged

4. 2025-06-01 - Motive Partners portfolio review and value creation push

PE sponsor actively driving transformation timeline

5. 2025-03-01 - Competitive pressure from Addepar, Orion, and other wealthtech platforms

Market forcing pace of transformation - can't afford slow organizational change

SECTION 6

McChrystal Fit Assessment

Active trigger (layoffs, pivot) and clear buyer (Yabuki). But: smaller company (\$800M), Yabuki's own transformation experience may reduce perceived need, and PE budget sensitivity post-layoffs. Moderate due to these limiting factors.

Primary Problem

Transforming from a custom-solutions company to a productized AI platform while retaining the talent needed for the new model and shedding the talent that doesn't fit - all under PE timeline pressure.

Best McChrystal Capability Fit

Organizational transformation + cross-functional alignment. InvestCloud needs to rewire how teams work together (product, engineering, sales, client success) for a fundamentally different business model.

Likely Objections to Engagement

Yabuki may believe his Fiserv transformation experience makes external advisory unnecessary
 PE sponsor may prioritize cost cuts over organizational investment
 3,000 employees may be seen as too small for McChrystal engagement

Competitive Advisory Landscape

McKinsey Digital Practice
 Bain PE practice
 Oliver Wyman (financial services)
 Motive Partners' internal operating team

SECTION 7

Conversation Entry Points

These questions are designed for a Senior Partner's first conversation. Each opens a thread that naturally leads to McChrystal Group's capabilities without a direct pitch.

1. You've been through the Fiserv transformation. What's different about doing it at InvestCloud - smaller company, PE timeline, and an industry that's moving faster than ever?

Validate his experience while surfacing what's different this time.

2. Layoffs cut headcount but they don't rewire how teams work. What does InvestCloud's operating model look like on the other side of this pivot?

Push past the cost-cutting to the harder organizational design question.

Recommended Meeting Framing

A CEO-to-CEO conversation about what it takes to transform a company's identity - not just its strategy. Yabuki

did it at Fiserv over 15 years. He's trying to do it at InvestCloud in 3. McChrystal can help compress that timeline.

SECTION 8

Brand Insights & Market Positioning

Brand strategy reveals organizational priorities and coordination challenges. The following analysis connects InvestCloud's market positioning to potential McChrystal engagement opportunities.

Brand Value & Competitive Standing: InvestCloud is a financial technology company providing digital wealth management and financial planning platforms for banks, RIAs, and asset managers. The brand carries credibility in wealth-tech innovation - positioned as the AI-powered platform alternative to legacy providers (FIS, Broadridge, SS&C). InvestCloud competes against Addepar, Envestnet, Orion, and Black Diamond.

Brand Identity Evolution: InvestCloud was formed from the merger of InvestCloud and Tegra118 (backed by Motive Partners and Great Hill Partners). The brand is transitioning from "custom financial solutions provider" to "productized AI-powered wealth platform" - a fundamental business model shift that requires different organizational capabilities.

Marketing Leadership & Strategy: [INFERRED] B2B fintech marketing targeting wealth management firms. The pivot to AI-powered productized platform requires repositioning from "we build custom solutions" to "our platform solves your problem" - a significant marketing and sales model transformation.

Brand Threats: Larger competitors (Envestnet, SS&C) have more resources for AI investment. Startup competitors (Addepar) have more agile development cultures. The custom-to-product transition risks alienating existing customers who valued bespoke solutions. PE timeline pressure may force premature product launches that damage brand credibility.

McChrystal Connection: The pivot from custom solutions to productized AI platform requires every function to transform - engineering (from custom to product), sales (from consultative to platform), client success (from bespoke to scalable), and culture (from craftspeople to platform builders). McChrystal's cross-functional alignment ensures all functions transform at the same pace.

SECTION 9

Deep McChrystal Group Fit Analysis

This is the strategic case for pursuing InvestCloud. It synthesizes findings from all previous sections into a comprehensive engagement thesis with specific fit dimensions, expected outcomes, stakeholder mapping, and a phased pursuit strategy.

9a. Fit Dimensions

Fit Dimension 1: Business Model Transformation

Moving from custom financial solutions (high-touch, high-margin per client, labor-intensive) to productized AI platform (scalable, lower-touch, technology-dependent) changes every organizational function. McChrystal builds

the cross-functional coordination that ensures engineering, sales, and client success all transform together - rather than engineering building products that sales can't sell and clients don't want.

Fit Dimension 2: Talent Model Transition

The skills that built InvestCloud (custom developers, relationship managers, bespoke implementation consultants) are different from the skills needed for the future (product engineers, platform sales, scalable support). Managing this talent transition - reskilling some, exiting others, recruiting new - requires organizational sensitivity and coordination.

Fit Dimension 3: PE Timeline as Forcing Function

Motive Partners and Great Hill Partners expect value creation within the PE hold period. The platform pivot must deliver revenue growth and margin expansion quickly. McChrystal's operating cadence creates the execution discipline PE sponsors expect.

9b. Cumulative Case

InvestCloud is a PE-backed fintech executing a fundamental business model transformation - from custom to product, from labor to technology, from bespoke to scalable. Signal chain: PE ownership -> merger (InvestCloud + Tegra118) -> AI platform pivot -> talent model transition -> customer base must migrate -> PE timeline pressure. Revenue potential: \$200K initial, \$500K-\$700K deployment, \$150K ongoing. Total: \$850K-\$1.1M.

9c. Enterprise Issues

1. Custom-to-Product Cultural Clash: Engineers who built careers on custom craftsmanship resist productization. Sales teams who sold relationships resist platform selling. 2. Customer Migration Risk: Existing clients who chose InvestCloud for custom solutions must be convinced the platform approach serves them better - or they'll leave. 3. Engineering Velocity: Product development requires different engineering practices (agile, CI/CD, platform architecture) than custom development. The organizational transition to product engineering is non-trivial. 4. Revenue Model Transition: Moving from project-based to subscription-based revenue creates a "valley of death" where old revenue declines before new revenue scales. 5. PE Timeline Pressure: The transformation must show results within the hold period, constraining the time available for organic cultural change.

9d. Expected Outcomes

1. Cross-Functional Transformation Alignment: Engineering, sales, and client success transforming in sync. Measurable: platform sales pipeline building alongside product development milestones. 2. Talent Transition Management: Coordinated reskilling and recruiting. Measurable: critical role vacancy rate below 10%. 3. Customer Retention Through Pivot: Migration framework preserving existing revenue. Measurable: customer retention >90% through transition. 4. PE Milestone Achievement: Operating cadence delivering value creation targets. Measurable: quarterly PE milestone reviews on-track.

9e. Key Stakeholders

CEO

Leader: [CEO]

Role: Platform vision, PE relationship

McChrystal Relevance: Executive sponsor

CTO

Leader: [CTO]

Role: Product engineering transformation

McChrystal Relevance: Priority: Custom-to-product transition

CRO

Leader: [Chief Revenue Officer]

Role: Sales model transformation

McChrystal Relevance: Priority: Platform sales enablement

CHRO

Leader: [CHRO]

Role: Talent transition

McChrystal Relevance: Workforce evolution

PE Sponsors

Leader: Motive Partners / Great Hill

Role: Value creation

McChrystal Relevance: Sponsor alignment

9f. Opportunity Thesis

Why Now: Platform pivot in progress - the first 12 months of product development and sales model transition determine whether the pivot succeeds or stalls.

Why McChrystal: Cross-functional transformation alignment - ensuring engineering, sales, and client success transform at the same pace. McChrystal's operating rhythm prevents the typical failure mode where engineering ships product that sales can't sell.

Phased Engagement: Phase 1 (\$200K): Cross-functional transformation assessment. Phase 2 (\$350K-\$500K): Operating rhythm deployment. Phase 3 (\$150K retainer): Ongoing transformation management. Total: \$700K-\$850K.

Multi-Threaded Pursuit: CTO (product transformation), CRO (sales model change), PE operating partner (value creation).
