McChrystal Group

Leadership Advisory & Organizational Effectiveness

SECTION 1

Organization Snapshot

Legal Name	Kindeva Drug Delivery, L.P.
Headquarters	Woodbury, Minnesota (new HQ under construction)
Founded	2020
Ownership	Private, PE-backed by Altaris Capital Partners. Acquired from 3M for \$650M (2020). Additional acquisitions: Meridian Medical Technologies/Pfizer (2022), iPharma Labs (2022), Summit Biosciences (2024).
Footprint	10 sites across U.S. and U.K. New UK HQ at Charnwood Campus (opened Sept 2025). Manufacturing and R&D facilities in Minnesota, New Jersey, and multiple UK locations.

SECTION 1b

Company Overview

Kindeva Drug Delivery is a contract development and manufacturing organization (CDMO) specializing in complex drug delivery systems, including inhalers, auto-injectors, and transdermal patches. Spun off from 3M and acquired by Altaris Capital Partners for \$650M in 2020, the company has since acquired Meridian Medical Technologies (from Pfizer), iPharma Labs, and Summit Biosciences. Kindeva operates 10 facilities across the U.S. and U.K.

SECTION 2

Financial Health & Growth Stage

Understanding Kindeva Drug Delivery's financial position and trajectory is critical to framing any engagement conversation.

Revenue ~\$1.2B [INFERRED from CDMO market positioning and acquisition history]. Four acquisitions in four years signal aggressive growth strategy. Altaris invested \$650M initially; subsequent acquisitions suggest significant additional investment. CDMO market growing at 7-8% annually. Key pressure: integrating four acquired companies into coherent operating model. Key tailwind: pharma outsourcing trend accelerating, specialized drug delivery capabilities command premium pricing.

SECTION 3

Leadership Team Profiles

The following contacts are recommended as primary outreach targets - champion-level leaders who feel the organizational pain daily and can sponsor McChrystal internally.

David Stevens - Chief Executive Officer [PRIORITY TARGET]

Former CEO of Arranta Bio (biologics CDMO, sold to Recipharm 2022). Previously SVP at AMRI. 20+ years CDMO experience.

Outreach rationale: New CEO inheriting a company mid-transformation. Needs to build his leadership team's operating rhythm

and establish culture for the combined entity.

Milton Boyer - Board Member (Former CEO) [PRIORITY TARGET]

25+ years pharma. U.S. Army Captain.

Outreach rationale: Former CEO and U.S. Army Captain - warm introduction vector via McChrystal's military network. Board-level champion.

Additional leadership team members relevant to the engagement:

Daniel Speciale - Chief Financial Officer

PE carve-out specialist. Led Vantive/Baxter \$3.8B Carlyle separation. Mallinckrodt experience.

Prakash Pandian - Chief Information Officer

25+ years IT/digital. Former CIO at Curia (CDMO), Biogen, Merck KGaA.

SECTION 4

Organizational Culture & Structure

Culture and structure are often where McChrystal Group finds the deepest leverage. The following signals indicate how Kindeva Drug Delivery operates today and where friction exists.

Organizational Structure

Transitioning from 3M divisional structure to standalone company. Four acquisitions in four years (3M Drug Delivery, Meridian/Pfizer, iPharma, Summit) have created a patchwork of operating models that need unification. New C-suite is building the organizational design from near-scratch.

Culture Signals

Glassdoor: 2.6/5 overall, 1.9/5 culture score, 32% recommend. Reviews cite blame culture, siloed departments, leadership trust deficit, and burnout. This is consistent with a company that's been through rapid ownership change, four acquisitions, and near-complete C-suite turnover - employees don't know what the company stands for yet. The cultural foundation hasn't been set because leadership has been in flux.

SECTION 5

Recent News & Trigger Events

The following developments from the past 18 months create urgency and provide natural conversation entry points for engaging Kindeva Drug Delivery.

1. 2026-01-01 - New CEO David Stevens takes helm, completing C-suite overhaul

New leadership team has ~6 month window to set organizational direction

2. 2025-10-01 - Succession plan initiated; CEO Boyer steps to board role

Planned transition signals organizational maturity, but new team needs framework

3. 2025-09-01 - New UK HQ opened at Charnwood Campus

Physical expansion while organizational identity still forming

4. 2024-01-01 - Acquired Summit Biosciences - fourth acquisition in four years

Integration debt compounding across four acquired entities

5. 2024-11-01 - New CIO appointed to lead digital transformation

Technology modernization layered on top of cultural transformation

SECTION 6

McChrystal Fit Assessment

Active triggers (new CEO, C-suite turnover, terrible Glassdoor scores). Former CEO is U.S. Army Captain (McChrystal network). Clear buyer (new CEO + PE sponsor). 1.9/5 culture score = organizational crisis that demands intervention.

Primary Problem

Building a cohesive company identity and culture from four acquired entities under a near-complete new C-suite, all while employees show critically low engagement (1.9/5 culture score).

Best McChrystal Capability Fit

Team of Teams + culture change. Kindeva needs to create shared consciousness across four legacy cultures with a new leadership team. McChrystal's approach to building trust and alignment in newly formed organizations is purpose-built for this.

Likely Objections to Engagement

Smaller company (2,500 employees) may see McChrystal as 'too big' for their stage
New CEO may want to establish his own approach before bringing in external advisory
Altaris may prioritize operational improvements over culture investment

Competitive Advisory Landscape

McKinsey Pharma Practice
L.E.K. Consulting (life sciences)
Korn Ferry (leadership transition)
CultureIQ / Glint (employee engagement)

SECTION 7

Conversation Entry Points

These questions are designed for a Senior Partner's first conversation. Each opens a thread that naturally leads to McChrystal Group's capabilities without a direct pitch.

1. You inherited a company built from four acquisitions in four years with a brand new C-suite. How are you thinking about building the culture that makes Kindeva feel like one company?

Acknowledge the challenge's scale. New CEOs need frameworks, not just advice.

2. Your Glassdoor scores suggest employees don't yet know what Kindeva stands for. With a new HQ, new leadership, and new strategy - how do you define that identity before the market defines it for you?

Use data to surface the urgency without being confrontational.

Recommended Meeting Framing

Milton Boyer (former CEO, Army Captain) as warm introduction. Frame as leadership alignment for a newly formed team - McChrystal helped JSOC unify organizations that had never worked together. Kindeva's four-acquisition patchwork is the corporate equivalent.

SECTION 8

Brand Insights & Market Positioning

Brand strategy reveals organizational priorities and coordination challenges. The following analysis connects Kindeva Drug Delivery's market positioning to potential McChrystal engagement opportunities.

Brand Value & Competitive Standing: Kindeva Drug Delivery is a contract development and manufacturing organization (CDMO) specializing in inhalation, transdermal, and drug-device combination products. The brand carries technical credibility in complex drug delivery - serving pharmaceutical companies who outsource manufacturing of metered-dose inhalers, transdermal patches, and specialty dosage forms. Kindeva competes against Catalent, Lonza, Recipharm, and specialized drug delivery firms.

Brand Identity Evolution: Kindeva was formed from four acquired entities assembled by Altaris Capital Partners - it's a PE-constructed company that must build a unified brand from pieces. The "Kindeva" name is relatively new and lacks the decades of brand recognition that competitors like Catalent carry. Building brand credibility as a reliable CDMO partner is essential for winning new pharmaceutical contracts.

Marketing Leadership & Strategy: [INFERRED] B2B pharmaceutical marketing targeting VP/SVP-level pharmaceutical executives responsible for outsourcing manufacturing. Key channels: pharmaceutical industry conferences (CPhI, INTERPHEX), technical publications, and direct sales relationships. Trust and quality reputation are the primary brand drivers in CDMO.

Brand Threats: Catalent's brand dominance in CDMO (despite its own financial challenges) overshadows smaller players like Kindeva. If the low employee engagement (1.9/5 culture score) translates to quality incidents, pharmaceutical customers will de-risk by dual-sourcing or switching. FDA regulatory compliance is table stakes - any 483 observation or warning letter devastates the brand.

McChrystal Connection: Kindeva's brand is being built from four acquired entities with different cultures, systems, and quality standards. The brand promise of "reliable, high-quality drug delivery manufacturing" requires operational coordination across sites that were separate companies 18 months ago. With employee engagement at crisis levels (1.9/5), the organizational foundation for brand delivery is at risk. McChrystal's crisis leadership and organizational cohesion methodology addresses the engagement crisis that threatens quality, and therefore the brand.

SECTION 9

Deep McChrystal Group Fit Analysis

This is the strategic case for pursuing Kindeva Drug Delivery. It synthesizes findings from all previous sections into a comprehensive engagement thesis with specific fit dimensions, expected outcomes, stakeholder mapping, and a phased pursuit strategy.

9a. Fit Dimensions

Fit Dimension 1: Multi-Entity Cultural Integration

Four acquired entities with different cultures, quality systems, operating procedures, and employee bases must become one company. At 2,500 employees, this is intimate enough for cultural change to be felt - but complex enough to require deliberate organizational design. McChrystal's shared consciousness methodology creates unity from fragments faster than organic cultural development.

Fit Dimension 2: Employee Engagement Crisis as Quality Risk

A 1.9/5 culture score in a pharmaceutical manufacturing environment is a quality risk - disengaged employees in GMP environments make errors that can result in FDA actions, product recalls, and customer loss. McChrystal's organizational cohesion methodology addresses engagement as an operational imperative, not an HR initiative.

Fit Dimension 3: Near-Complete Leadership Team as Fresh Start

A nearly entirely new C-suite means the organizational culture can be deliberately designed rather than inherited. McChrystal's leadership team alignment methodology builds shared operating norms, decision-making frameworks, and cultural foundations for the new leadership team from day one.

9b. Cumulative Case

Kindeva is the most acute employee engagement crisis in the pipeline - a PE-assembled CDMO with critically low engagement, near-complete leadership turnover, and four legacy cultures that haven't unified. Signal chain: PE assembly (4 acquisitions) -> new brand -> near-complete C-suite replacement -> 1.9/5 engagement score -> quality risk -> pharmaceutical customer confidence at stake. Revenue potential: \$200K initial, \$500K-\$700K deployment, \$150K ongoing. Total: \$850K-\$1.1M.

9c. Enterprise Issues

1. Employee Engagement Crisis: 1.9/5 culture score indicates deep organizational dysfunction. Root causes likely include: integration confusion, leadership churn, unclear direction, and perceived PE-driven cost-cutting. 2. Quality System Harmonization: Four different quality management systems must converge to a single standard that satisfies FDA, EMA, and customer audit requirements. Misalignment creates regulatory risk. 3. Leadership Team Cohesion: Nearly all-new C-suite must build trust and shared operating norms while addressing the engagement crisis and maintaining GMP compliance. 4. Customer Confidence: Pharmaceutical companies need CDMO partners they can depend on for 5-10 year supply agreements. Organizational instability signals risk. 5. Site-Level Cultural Variation: Each of the four legacy sites has its own identity, processes, and informal leadership. Creating "Kindeva" culture across sites requires more than email announcements.

9d. Expected Outcomes

1. Engagement Recovery: Organizational cohesion program reversing the 1.9/5 culture score. Measurable: engagement scores improving to 3.0+ within 12 months. 2. Quality System Unification: Harmonized quality standards across all sites. Measurable: zero FDA observations attributed to integration gaps. 3. Leadership Team Effectiveness: New C-suite operating as a cohesive unit. Measurable: leadership team alignment scores established and trending positive. 4. Customer Confidence Restoration: Visible organizational stability reassuring pharmaceutical partners. Measurable: customer audit scores improving. 5. Unified Kindeva Culture: Shared identity across four legacy sites. Measurable: employee identification with Kindeva brand >70% within 12 months.

9e. Key Stakeholders

CEO

Leader: [New CEO]

Role: Organizational rebuilding

McChrystal Relevance: Executive sponsor

COO

Leader: [New COO]

Role: Manufacturing operations, quality

McChrystal Relevance: Priority: Quality-engagement nexus

CHRO

Leader: [New CHRO]

Role: Engagement recovery, culture

McChrystal Relevance: Priority: 1.9/5 crisis response

VP Quality

Leader: [VP Quality/Regulatory]

Role: GMP compliance, quality harmonization

McChrystal Relevance: Quality system unification

Altaris Capital

Leader: [Operating Partner]

Role: PE governance, value creation

McChrystal Relevance: Sponsor alignment

9f. Opportunity Thesis

Why Now: 1.9/5 engagement is a crisis - not a trend. In pharmaceutical manufacturing, engagement directly correlates to quality. Every month without intervention increases regulatory and customer risk.

Why McChrystal: Crisis leadership + organizational cohesion in a high-stakes manufacturing environment. The military parallel is direct: maintaining operational discipline and team cohesion during organizational upheaval in an environment where errors have serious consequences.

Phased Engagement: Phase 1 (\$200K): Engagement diagnostic + leadership alignment. Phase 2 (\$400K-\$500K): Multi-site cultural integration, quality coordination. Phase 3 (\$150K retainer): Ongoing organizational development. Total: \$750K-\$850K.

Multi-Threaded Pursuit: COO (quality-engagement connection), CHRO (engagement crisis), Altaris operating partner (PE value creation). Pharmaceutical industry conferences; CDMO industry network.
