

Oshkosh Corporation

Business Development Dossier

Industry	Defense & Industrial Vehicles
Revenue	\$10.4B
Employees	14,000
Ideal Customer Profile Score	85

ICP SCORING MODEL

ICP = Signals + Revenue + Employees + Fit (max 100)

Signals (0-35)	Top 4 signals scored; each = base(60%) + recency bonus <30d: 40% <90d: 30% <180d: 20% older: 10%
Revenue (0-25)	\$500M-\$10B sweet spot -> 70-100% of 25 pts Below \$500M -> pro-rata x 0.5 Above \$10B -> 60%
Employees (0-20)	2,000+ preferred (70-100%) 500-2K partial (50-70%) Below 500 -> pro-rata x 0.3
Fit (0-20)	High-fit types: reorg, transformation, M&A, hiring, funding, partnership -> 5 pts ea (max 12) + diversity 2/type (max 8)

Prepared March 19, 2026

McChrystal Group

Leadership Advisory & Organizational Effectiveness

SECTION 1

Organization Snapshot

Legal Name	Oshkosh Corporation
Headquarters	Oshkosh, Wisconsin
Founded	1917
Ownership	Public (NYSE: OSK); diversified institutional ownership.
Footprint	
Major operations: Oshkosh WI (headquarters, manufacturing), Spartanburg SC (NGDV production), McConnellsburg PA (JLG), international defense operations. Earned Military Friendly Employer designation for 2026. 14,000 employees.	

SECTION 1b

Company Overview

Oshkosh Corporation is a diversified industrial company operating across Defense (JLTV, tactical vehicles), Access (JLG aerial platforms), Vocational (fire trucks, refuse), and USPS NGDV (Next Generation Delivery Vehicle). Under CEO John Pfeifer, Oshkosh navigates the loss of the JLTV 2 contract, NGDV production delays (2,500 of 50,000+ delivered), \$200M tariff headwinds, and production layoffs - while targeting \$11B in 2026 revenue and \$18-22 EPS by 2028.

SECTION 2

Financial Health & Growth Stage

Understanding Oshkosh Corporation's financial position and trajectory is critical to framing any engagement conversation.

Revenue: \$10.4B in FY2025; 2026 guidance ~\$11B. Access segment largest, followed by Defense, Vocational, and NGDV.

Profitability: Adjusted EPS \$10.79 in 2025; guided to ~\$11.50 in 2026. Targeting \$18-22 by 2028. Operating income ~\$1B.

Program Challenges: JLTV 2 contract lost (must find replacement defense revenue); NGDV only 2,500 of 50,000+ ordered delivered (production ramp behind schedule); \$200M tariff headwind in 2026.

Key Pressures: JLTV 2 loss threatens defense segment's long-term revenue base; NGDV production delays risk USPS confidence; tariffs hitting Access segment margins; production layoffs (160 in Jan 2026) signal workforce right-sizing.

Key Tailwinds: \$6B NGDV contract provides multi-year revenue visibility; international JLTV exports (24,000+ produced, combat-tested); Vocational/fire truck demand stable; 2028 growth targets ambitious but achievable if execution improves.

SECTION 3

Leadership Team Profiles

The following contacts are recommended as primary outreach targets - champion-level leaders who feel the organizational pain daily and can sponsor McChrystal internally.

John Bryant - EVP & President, Oshkosh Defense [PRIORITY TARGET]

Leads the defense segment through JLTV-to-next-gen transition and NGDV production challenges

Outreach rationale: Owns the two biggest program execution challenges at Oshkosh: (1) rebuilding defense revenue after losing JLTV 2, and (2) ramping NGDV production from behind-schedule to full rate. Both require organizational coordination between engineering, manufacturing, supply chain, and customer management. He's the operational leader who feels the execution gap most acutely.

Pat Williams - Chief Programs Officer, Oshkosh Defense [PRIORITY TARGET]

Program management across defense vehicle portfolio

Outreach rationale: Directly manages program execution - the function where JLTV international sales, NGDV production ramp, and next-gen vehicle development must be coordinated. Program management coordination is McChrystal's core capability.

Additional leadership team members relevant to the engagement:

John Pfeifer - President & Chief Executive Officer

Operations-first leader with deep Oshkosh experience; driving long-term growth strategy toward 2028 targets

Frank Nerenhausen - EVP & CFO [INFERRED]

Financial leadership managing \$200M tariff impact and 2028 growth investment

SECTION 4

Organizational Culture & Structure

Culture and structure are often where McChrystal Group finds the deepest leverage. The following signals indicate how Oshkosh Corporation operates today and where friction exists.

Organizational Structure

Four segments: Access (JLG - largest), Defense (JLTV, tactical vehicles), Vocational (fire trucks, refuse vehicles, concrete mixers), and NGDV (USPS delivery vehicles). CEO Pfeifer oversees with segment presidents. Defense segment under pressure from JLTV 2 loss; NGDV has its own organizational challenges as a separate contract within the defense manufacturing infrastructure.

Culture Signals

Military-Friendly Culture: Oshkosh earned the 2026 Military Friendly Employer designation - genuine commitment to veteran hiring and military-connected culture. This creates natural cultural affinity with McChrystal.

Manufacturing Heartland Identity: Headquartered in Oshkosh, Wisconsin, the company embodies Midwest manufacturing values - practical, execution-focused, no-nonsense. This aligns well with McChrystal's direct,

results-oriented approach.

Program Loss Impact on Morale: Losing the JLTV 2 contract after building 24,000 vehicles - proving the platform in combat - is a blow to organizational pride. The defense segment needs to rebuild confidence and find its next mission.

Production Transition Stress: NGDV production shifting from Wisconsin to South Carolina, combined with 160 layoffs, creates uncertainty for the Wisconsin-based workforce that has been Oshkosh's foundation.

SECTION 5

Recent News & Trigger Events

The following developments from the past 18 months create urgency and provide natural conversation entry points for engaging Oshkosh Corporation.

1. 2025-06-01 - Lost JLTV 2 follow-on contract despite combat-proven platform with 24,000+ vehicles produced

Defense segment's signature program lost to competitor - requires organizational pivot to international JLTV sales, NGDV, and next-gen vehicle development

2. 2026-01-05 - 160 production workers laid off; NGDV production shifting from Wisconsin to South Carolina

Workforce right-sizing and geographic production shift create organizational disruption and morale challenges

3. 2025-12-01 - NGDV production: only 2,500 of 50,000+ ordered vehicles delivered; all new orders to be BEV by 2026

NGDV production delays threaten the \$6B contract and USPS confidence. Production ramp is an organizational coordination challenge across engineering, manufacturing, supply chain, and customer management

4. 2025-12-01 - 2028 targets set: \$18-22 EPS (from \$10.79 in 2025); requires significant operational improvement

Ambitious growth targets require organizational transformation - cost efficiency, production optimization, and cross-segment coordination

5. 2025-06-01 - \$200M tariff headwind projected for 2026; ~75% hitting Access segment

Tariff impact requires cross-functional coordination between procurement, manufacturing, pricing, and customer management

SECTION 6

McChrystal Fit Assessment

Clear organizational need (JLTV loss, NGDV delays, tariff headwinds, production transitions). Revenue \$10.4B is in the ICP range. Military Friendly culture creates natural McChrystal affinity. However, Oshkosh's challenges are more operational/production than organizational transformation at this scale. Rating moves to Strong if: NGDV delays worsen (USPS confidence at risk), or 2028 targets require organizational redesign

beyond current capability.

Primary Problem

Rebuilding the defense segment's revenue base after losing the JLTV 2 contract, ramping NGDV production from behind-schedule status, managing \$200M in tariff headwinds, and hitting ambitious 2028 growth targets (\$18-22 EPS from \$10.79) - all requiring organizational coordination across four segments, two major production transitions (JLTV->next-gen, Wisconsin->South Carolina), and the shift to all-BEV NGDV.

Best McChrystal Capability Fit

Program execution and organizational coordination during strategic transition - Oshkosh is managing the 'bridge' between legacy programs (JLTV) and future platforms (NGDV, next-gen vehicles). McChrystal's operating model connects engineering, manufacturing, supply chain, and customer delivery during program transitions. The Military Friendly employer designation creates genuine cultural alignment.

Likely Objections to Engagement

We're a manufacturing company - our challenges are production and engineering, not organizational
 CEO Pfeifer is operations-focused and may prefer internal solutions
 Budget constrained by tariff impact and defense revenue decline
 Oshkosh at \$10B is below some defense primes - advisory spend may be limited

Competitive Advisory Landscape

McKinsey - manufacturing operations optimization
 BCG - defense portfolio strategy
 AlixPartners - operational restructuring
 Internal: Oshkosh has strong manufacturing operations culture

SECTION 7

Conversation Entry Points

These questions are designed for a Senior Partner's first conversation. Each opens a thread that naturally leads to McChrystal Group's capabilities without a direct pitch.

1. After building 24,000 combat-proven JLTVs - and losing the follow-on contract - how is the defense segment rebuilding its identity and revenue pipeline?

Acknowledge the emotional impact of losing JLTV 2 while showing interest in the organizational pivot required.

2. The NGDV production ramp has been behind schedule - what are the organizational coordination challenges between engineering, manufacturing, and USPS customer management as you scale to full rate?

Surface NGDV as an organizational coordination challenge, not just a production problem.

Recommended Meeting Framing

Frame as a conversation about program transitions in defense - McChrystal's experience managing military

transitions between capabilities while maintaining operational readiness. The JLTV->next-gen transition parallels military force modernization challenges.

SECTION 8

Brand Insights & Market Positioning

Brand strategy reveals organizational priorities and coordination challenges. The following analysis connects Oshkosh Corporation's market positioning to potential McChrystal engagement opportunities.

Brand Value: Oshkosh Defense is the JLTV brand - 24,000+ combat-tested vehicles serving U.S. and allied forces. The broader Oshkosh Corporation brand includes JLG (aerial platforms), Pierce (fire trucks), and McNeilus (refuse trucks). Losing JLTV 2 damages the defense brand's momentum.

Brand Threats: NGDV production delays risk the USPS customer relationship - Oshkosh's largest non-defense contract. JLTV 2 loss to a competitor undermines the 'combat-proven' positioning.

McChrystal Connection: Oshkosh's Military Friendly designation and JLTV heritage create natural cultural alignment with McChrystal. The vehicles that McChrystal's soldiers used in combat were often Oshkosh-built - the connection is authentic.

SECTION 9

Deep McChrystal Group Fit Analysis

This is the strategic case for pursuing Oshkosh Corporation. It synthesizes findings from all previous sections into a comprehensive engagement thesis with specific fit dimensions, expected outcomes, stakeholder mapping, and a phased pursuit strategy.

9a. Fit Dimensions

Fit Dimension 1: Defense Segment Strategic Pivot

JLTV 2 loss requires Oshkosh Defense to pivot from guaranteed domestic revenue to a new growth strategy (international JLTV, next-gen vehicles, NGDV). McChrystal helps defense organizations navigate strategic transitions while maintaining operational execution.

Fit Dimension 2: NGDV Production Coordination

Ramping from 2,500 to 50,000+ vehicles requires cross-functional coordination between engineering (BEV transition), manufacturing (WI->SC production shift), supply chain (component scaling), and USPS customer management. McChrystal's operating model connects these functions.

Fit Dimension 3: Multi-Segment Tariff Response

\$200M tariff headwind requires coordinated response across Access (75%), Defense, Vocational, and NGDV. Each segment has different tariff exposure, customer dynamics, and mitigation options. Enterprise-level coordination prevents segment-by-segment suboptimization.

9b. Cumulative Case

Oshkosh faces multiple converging challenges that require enterprise-level organizational coordination. Signal chain: JLTV 2 loss -> defense pivot -> NGDV delays -> BEV transition -> production shift WI->SC -> \$200M tariff headwind -> 2028 targets demanding execution improvement. Revenue potential: \$250K-\$350K initial, \$600K-\$900K deployment, \$200K ongoing. Total: \$1M-\$1.5M.

9c. Enterprise Issues

1. Defense Revenue Replacement: JLTV 2 loss creates a revenue gap that international sales and next-gen programs must fill. 2. NGDV Execution Risk: Behind-schedule production threatens USPS confidence and \$6B contract. 3. BEV Transition Complexity: All new NGDVs as BEV by 2026 requires new manufacturing processes, supply chain, and workforce skills. 4. Geographic Production Shift: Moving from Wisconsin to South Carolina creates workforce, logistics, and quality coordination challenges. 5. Tariff Impact Management: \$200M headwind requiring cross-segment pricing and supply chain coordination.

9d. Expected Outcomes

1. Defense Pivot Strategy Execution: Cross-functional coordination for international JLTV and next-gen programs. Measurable: defense segment revenue stabilized. 2. NGDV Production Ramp: Operating rhythm connecting engineering, manufacturing, supply chain, and USPS. Measurable: NGDV delivery milestones on-track. 3. Tariff Mitigation Coordination: Enterprise-level response to tariff headwinds. Measurable: tariff margin impact limited to <50% of gross exposure.

9e. Key Stakeholders

CEO

Leader: John Pfeifer

Role: Enterprise strategy, 2028 targets

McChrystal Relevance: Executive sponsor

Defense

Leader: John Bryant, EVP & President

Role: JLTV transition, NGDV execution

McChrystal Relevance: Priority: Program coordination

Chief Programs Officer

Leader: Pat Williams

Role: Defense program management

McChrystal Relevance: Priority: Execution discipline

CFO

Leader: [CFO]

Role: Tariff impact, capital allocation

McChrystal Relevance: Budget gatekeeper

Access

Leader: [President]

Role: Largest segment, tariff exposure

McChrystal Relevance: Cross-segment coordination

9f. Opportunity Thesis

Why Now: JLTV 2 loss + NGDV delays + \$200M tariff headwind converging in 2026. Defense segment needs organizational pivot NOW.

Why McChrystal: Military Friendly employer + JLTV combat heritage = natural cultural alignment. McChrystal's soldiers used Oshkosh vehicles in combat - the connection is authentic. Program transition management in defense is McChrystal's core capability.

Phased Engagement: Phase 1 (\$250K-\$350K): Defense segment pivot + NGDV coordination assessment. Phase 2 (\$400K-\$600K): Cross-segment deployment including tariff response. Phase 3 (\$200K retainer): Ongoing program management. Total: \$850K-\$1.2M.

Multi-Threaded Pursuit: John Bryant (Defense President), Pat Williams (Programs), John Pfeifer (CEO). AUSA, military vehicle conferences; Military Friendly employer network; Wisconsin manufacturing community.
