

Sedgwick

Business Development Dossier

Industry	Claims Management / Insurance Services
Revenue	\$5B
Employees	33,000
Ideal Customer Profile Score	95

ICP SCORING MODEL

ICP = Signals + Revenue + Employees + Fit (max 100)

Signals (0-35)	Top 4 signals scored; each = base(60%) + recency bonus <30d: 40% <90d: 30% <180d: 20% older: 10%
Revenue (0-25)	\$500M-\$10B sweet spot -> 70-100% of 25 pts Below \$500M -> pro-rata x 0.5 Above \$10B -> 60%
Employees (0-20)	2,000+ preferred (70-100%) 500-2K partial (50-70%) Below 500 -> pro-rata x 0.3
Fit (0-20)	High-fit types: reorg, transformation, M&A, hiring, funding, partnership -> 5 pts ea (max 12) + diversity 2/type (max 8)

Prepared March 19, 2026

McChrystal Group

Leadership Advisory & Organizational Effectiveness

SECTION 1

Organization Snapshot

Legal Name	Sedgwick Claims Management Services, Inc.
Headquarters	Memphis, Tennessee
Founded	1969

Ownership

PE-backed: Carlyle Group (majority owner since 2018, \$6.7B initial investment). Minority investors: Stone Point Capital, Altas Partners (\$1B investment Nov 2024), CDPQ, Onex, and management investors. Enterprise value: \$13.2B.

Footprint

80 countries, 407 locations worldwide, 33,000+ colleagues. Major operations in U.S., UK, Ireland, Canada, Australia, and continental Europe. Global claims handling for multinational insurance programs.

SECTION 1b

Company Overview

Sedgwick is the world's leading claims management company, managing casualty, property, marine, benefits, and brand protection claims across 80 countries with 33,000+ employees and 407 locations. PE-backed by Carlyle Group since 2018 (\$6.7B), with minority investors Stone Point Capital, Altas Partners (\$1B, Nov 2024), CDPQ, and Onex. Enterprise value reached \$13.2B. In September 2025, Sedgwick appointed Vishy Padmanabhan as Chief Transformation Officer to lead company-wide digital, data, and enterprise process transformation.

SECTION 2

Financial Health & Growth Stage

Understanding Sedgwick's financial position and trajectory is critical to framing any engagement conversation.

Revenue: Estimated ~\$5B annually (2025). [INFERRED - Sedgwick is private; multiple sources estimate revenue between \$4.6B and \$5B.]

Growth Trajectory: Enterprise value grew from \$6.7B (2018 Carlyle acquisition) to \$13.2B (November 2024 Altas investment) - nearly 2x in 6 years. Continuous acquisition strategy adding capabilities (Bottomline LSM, smaller bolt-ons).

Profitability: Not publicly disclosed. PE ownership for 8+ years with \$1B additional investment suggests strong cash flow generation and positive EBITDA trajectory.

PE Economics: Carlyle's 2018 entry at \$6.7B; current \$13.2B enterprise value represents ~2x money-on-invested-capital before exit. Altas Partners' \$1B investment (Nov 2024) at \$13.2B valuation signals confidence in continued value creation. Extended hold period (8+ years) unusual for PE - indicates Carlyle sees further upside from transformation.

Key Financial Pressures: PE exit timeline creating urgency for demonstrable operational improvement. \$13.2B valuation must be justified to eventual buyers or public market investors. Transformation investment (CTO hire, technology modernization, sales reorg) expected to drive margin improvement.

SECTION 3

Leadership Team Profiles

The following contacts are recommended as primary outreach targets - champion-level leaders who feel the organizational pain daily and can sponsor McChrystal internally.

Vishy Padmanabhan - Chief Transformation Officer [PRIORITY TARGET]

Former Senior Executive at Wells Fargo; former Partner at Bain & Company. MBA from Emory University. Specializes in aligning IT with business goals, modernizing legacy systems, outcome-based innovation

Outreach rationale: Newly created CTO role with mandate to drive integrated transformation spanning digital, data, and enterprise processes across 33,000 colleagues in 80 countries. His success depends on organizational change management at massive scale - exactly McChrystal's capability. Former Bain partner understands structured advisory approaches.

Additional leadership team members relevant to the engagement:

Michael Arbour - CEO

Insurance and claims management leadership

Paul White - CEO, International

International insurance/claims operations

Brad Krauss - EVP, Head of Casualty & Specialty Business Development

Insurance and risk management

SECTION 4

Organizational Culture & Structure

Culture and structure are often where McChrystal Group finds the deepest leverage. The following signals indicate how Sedgwick operates today and where friction exists.

Organizational Structure

Global matrix organization: CEO (Michael Arbour) with CTO (Padmanabhan), International CEO (Paul White), and service line leaders. U.S. sales recently reorganized into national and regional structure. Country operations have historically operated with significant autonomy. 209 executives in org chart reflecting both geographic and functional leadership. PE board oversight from Carlyle, Atlas, and Stone Point.

Culture Signals

Positive signals: Sedgwick emphasizes a "culture of caring" - purpose-driven work centered on helping people through claims processes. Colleague resource groups foster community. Internal messaging emphasizes career

mobility, industry-leading leaders, and meaningful work. The "caring" culture is both an employee retention asset and a client-facing differentiator.

Transformation challenge: A "culture of caring" optimized for claims handling must now absorb digital transformation, process automation, and data-driven decision-making. Claims professionals who chose this career for the human element may resist technology-driven changes that feel like they reduce the personal touch. The CTO's mandate to drive "digital, data, and enterprise processes" transformation directly tests whether the caring culture can adapt.

Geographic culture variation: 80-country operation means vastly different cultural contexts. Claims handling in Japan, Germany, Brazil, and the U.S. reflect different professional norms, client expectations, and regulatory environments. The CTO's global transformation must be culturally sensitive across all markets.

PE ownership impact: Eight years of Carlyle ownership has normalized PE expectations among senior leadership. But the CTO appointment and sales reorganization signal that operational transformation is entering a new, more intensive phase that will touch all 33,000 colleagues - not just leadership.

SECTION 5

Recent News & Trigger Events

The following developments from the past 18 months create urgency and provide natural conversation entry points for engaging Sedgwick.

1. 2025-09-03 - Appointed Vishy Padmanabhan as Chief Transformation Officer - newly created role

CTO appointment signals board-level recognition that 33,000-person global operation needs fundamental operating model redesign. His mandate: 'champion innovation and agility at scale, partnering across technology and operations to drive an integrated transformation agenda'

2. 2024-11-01 - Closed \$1B minority investment from Altas Partners; Carlyle and Stone Point made additional investments; enterprise value reached \$13.2B

\$1B fresh capital signals extended PE hold and investment in value creation; \$13.2B valuation creates exit urgency

3. 2026-01-01 - Paul White appointed CEO, International - new role overseeing 80-country operation

New international CEO signals recognition that cross-border coordination needs dedicated leadership; alignment opportunity for McChrystal's global operating model

4. 2025-02-01 - Strategic reorganization of U.S. sales team - new national and regional structure

Sales reorg is first visible structural change in broader transformation; signals appetite for organizational redesign

5. 2025-03-01 - Acquired Bottomline's legal spend management division for property & casualty insurance

Acquisition adds capability but also integration complexity during transformation period

SECTION 6

McChrystal Fit Assessment

Problem directly maps to McChrystal's core capability (organizational transformation at massive distributed scale). Active trigger (CTO appointed Sept 2025). Clear economic buyer (CTO with transformation budget). Budget exists (\$5B revenue, \$13.2B enterprise value, PE-funded transformation). Organizational urgency (PE timeline, \$1B fresh capital to deploy). The scale (33,000 people, 80 countries) is the largest in the pipeline and plays directly to McChrystal's military-derived expertise in cross-geographic coordination.

Primary Problem

Executing company-wide digital, data, and enterprise process transformation across 33,000 colleagues in 80 countries - requiring organizational change management at a scale few companies have attempted, under PE timeline pressure to justify \$13.2B enterprise valuation

Best McChrystal Capability Fit

Team of Teams at global scale - McChrystal's framework for shared consciousness and empowered execution across geographically distributed teams operating in different languages, time zones, and regulatory environments is a direct transfer from military coalition operations experience. The 33,000-person, 80-country scale is the largest opportunity in the pipeline and directly matches McChrystal's differentiated capability.

Likely Objections to Engagement

CTO Padmanabhan's Bain background may bias toward familiar Bain/McKinsey-style advisory over McChrystal's approach

Carlyle may prefer PE-specialized operating partners over external organizational advisors

33,000-person global scale may seem too large for a boutique advisory firm - McChrystal must demonstrate capability at this scale

Claims management industry may not immediately see relevance of military-origin organizational frameworks

Competitive Advisory Landscape

Bain & Company - Padmanabhan's former employer; likely has advisory relationship at strategy level

McKinsey - may be advising Carlyle on value creation and transformation strategy

Accenture / Deloitte - probable technology implementation partners for digital transformation

AlixPartners - PE-specialized operational improvement; may be engaged on performance enhancement

SECTION 7

Conversation Entry Points

These questions are designed for a Senior Partner's first conversation. Each opens a thread that naturally leads to McChrystal Group's capabilities without a direct pitch.

1. You've been in the CTO role for about six months now - what's your biggest surprise about how the organization actually operates across 80 countries versus how it looks from the leadership level?

Position as a peer conversation about the gap between strategy vision and organizational reality at global scale - McChrystal specializes in closing that gap

2. How are you thinking about driving transformation adoption at the claims-handler level - getting 33,000 colleagues to change how they work without disrupting the claims quality your clients depend on?

Demonstrate understanding that transformation at this scale requires bottom-up buy-in, not just top-down mandates

3. With Paul White now leading international operations and the U.S. sales team recently reorganized, how are you coordinating the transformation across these structural changes?

Show awareness of the multiple simultaneous organizational changes and imply that coordination is the key challenge

Recommended Meeting Framing

Frame as a conversation between organizational transformation practitioners. McChrystal Group has experience driving change across large, distributed organizations where geographic spread and operational complexity make traditional top-down transformation approaches fail. The CTO should see McChrystal as a partner who understands the gap between transformation strategy and frontline execution.

SECTION 8

Brand Insights & Market Positioning

Brand strategy reveals organizational priorities and coordination challenges. The following analysis connects Sedgwick's market positioning to potential McChrystal engagement opportunities.

Brand Value & Competitive Standing: Sedgwick is the global market leader in claims management, a position built over decades of organic growth and acquisitions. The brand represents reliability, expertise, and global reach in an industry where trust is paramount - insurers and corporations entrust Sedgwick with managing claims that directly impact their policyholders' experience.

Brand Identity Evolution: Sedgwick's brand is evolving from "reliable claims processor" to "technology-enabled claims solutions provider." The CTO appointment and digital transformation mandate signal a brand repositioning toward innovation and data-driven decision-making. This evolution risks alienating the "caring" brand identity that differentiates Sedgwick from purely transactional competitors.

Brand Threats: Technology-native insurtech companies (Lemonade, Hippo, Root) are pushing claims processing toward automation and AI. While Sedgwick operates at a scale insurtechs can't match, the threat creates pressure to modernize without losing the human-touch brand differentiator. Competitors (Crawford & Company, Broadspire, Gallagher Bassett) may position against Sedgwick as slow to modernize during the transformation period.

Major Brand Investments: Global scale (80 countries, 407 locations) is itself a brand investment - no competitor matches Sedgwick's geographic reach. The CTO's technology transformation represents the next major brand investment: building a digital-native claims platform that can handle millions of claims annually with improved speed and accuracy.

McChrystal Connection: The brand transformation challenge - evolving from "reliable claims processor" to

"technology-enabled solutions provider" while maintaining the "culture of caring" - is fundamentally an organizational alignment problem. Every claims professional must embody the new brand promise (innovative, data-driven, fast) while preserving the existing brand equity (caring, expert, reliable). McChrystal's shared consciousness model can align 33,000 colleagues around this evolved brand identity.

SECTION 9

Deep McChrystal Group Fit Analysis

This is the strategic case for pursuing Sedgwick. It synthesizes findings from all previous sections into a comprehensive engagement thesis with specific fit dimensions, expected outcomes, stakeholder mapping, and a phased pursuit strategy.

9a. Fit Dimensions

Fit Dimension 1: Global Operating Model Transformation at 33,000-Person Scale

Sedgwick operates across 80 countries with 33,000+ employees managing claims for some of the world's largest insurers, corporations, and government entities. The appointment of Vishy Padmanabhan as Chief Transformation Officer in September 2025 signals that the existing operating model - built through decades of acquisitions and organic growth across disparate geographies - cannot support the next phase of growth. Padmanabhan's mandate spans "digital, data, and enterprise processes" - a transformation that touches every colleague in every country. McKinsey can design a target operating model on paper. McChrystal builds the human operating system that gets 33,000 people across 80 countries to actually execute it - shared consciousness at global scale with empowered execution at the local claims-handling level.

Competitor displacement logic: Bain (Padmanabhan's former employer) likely has a relationship but focuses on strategy. Accenture/Deloitte would focus on technology implementation. McChrystal fills the gap neither addresses: how do you maintain coordination and cultural cohesion across 33,000 people in 80 countries during a transformation that changes how every colleague works? This is a distributed leadership challenge, not a technology deployment challenge.

Fit Dimension 2: PE-Driven Value Creation Pressure at Scale

Carlyle acquired Sedgwick for \$6.7B in 2018. Eight years into ownership, Atlas Partners invested \$1B in November 2024, pushing enterprise value to \$13.2B. This signals Carlyle is extending its hold period and investing in value creation rather than exiting. The CTO appointment and sales reorganization indicate Carlyle expects significant operational improvement - faster claims processing, better technology adoption, improved client experience - to justify the \$13.2B valuation for eventual exit. McChrystal's ability to drive measurable organizational performance improvement at scale directly supports the PE value creation thesis.

Competitor displacement logic: PE operating partners and AlixPartners focus on financial performance improvement. McChrystal addresses the organizational execution capability that determines whether operational improvements actually stick at the claims-handler level. Cost reduction is easy; sustained performance improvement across 33,000 people requires organizational operating model change.

Fit Dimension 3: Cross-Country Coordination in Claims Management

Claims management is inherently cross-functional and often cross-border - a multinational corporation's property

claim may involve adjusters in multiple countries, legal teams in different jurisdictions, and reporting requirements that span regulatory frameworks. Sedgwick's 80-country operation creates coordination complexity that mirrors military coalition operations - exactly the environment McChrystal's Team of Teams model was designed for. The new international CEO role (Paul White, effective January 2026) signals recognition that international coordination needs dedicated leadership.

Competitor displacement logic: No consulting firm specializes in cross-border claims coordination at organizational scale. McChrystal's framework for maintaining shared consciousness across geographically distributed teams operating in different languages, time zones, and regulatory environments is a direct transfer from military coalition experience.

Fit Dimension 4: Sales Organization Redesign as Transformation Catalyst

In February 2025, Sedgwick announced a strategic reorganization of its U.S. sales team with a new national and regional structure. This is not just a sales restructuring - it's the first visible organizational change in a broader transformation. Sales reorganizations in services companies often reveal deeper structural issues: misaligned incentive structures, siloed client relationships, poor cross-selling between service lines. McChrystal can help ensure the sales reorg becomes a catalyst for broader organizational alignment rather than an isolated structural change.

Competitor displacement logic: Sales consultancies (Korn Ferry, Alexander Group) optimize sales structures. McChrystal ensures the new sales structure is supported by organization-wide communication and coordination that enables cross-selling and client experience consistency.

Fit Dimension 5: Acquisition Integration Across the Claims Ecosystem

Sedgwick's growth strategy includes continuous acquisitions - Bottomline's legal spend management (March 2025) and smaller bolt-ons. Each acquisition adds capabilities but also adds organizational complexity. Without a repeatable integration operating model, Sedgwick risks creating a fragmented collection of acquired businesses rather than a unified platform. McChrystal can design the integration framework that scales.

Competitor displacement logic: Integration consulting firms (McKinsey, Bain) design integration playbooks. McChrystal builds the organizational culture and communication architecture that makes acquisitions feel like joining a unified platform rather than being absorbed by a holding company.

9b. Cumulative Case - Why Sedgwick Is a Top Pipeline Opportunity

Sedgwick is the highest-scoring prospect in the pipeline (95.0) for good reason: it represents a rare convergence of massive scale (33,000 employees, 80 countries), active transformation leadership (newly appointed CTO), PE-driven urgency (\$13.2B valuation to justify), and organizational complexity (cross-border claims coordination). Every dimension reinforces the others: the CTO's transformation agenda requires organizational change at global scale; the PE timeline creates urgency; the international footprint creates coordination complexity; continuous acquisitions add organizational strain.

Reinforcing signal chain: Carlyle ownership since 2018 -> enterprise value grows to \$13.2B -> Altas Partners \$1B investment (Nov 2024) signals extended hold and value creation focus -> CTO Vishy Padmanabhan appointed (Sept 2025) -> sales team reorganized (Feb 2025) -> international CEO appointed (Jan 2026) -> Bottomline acquisition adds capability complexity -> digital/data/process transformation mandate -> 33,000 colleagues across

80 countries must change how they work

Revenue potential: \$750K - \$1M initial diagnostic and transformation operating model design (4-6 months), expanding to \$3M - \$5M for global Team of Teams implementation across key regions and service lines, with \$1M - \$2M/year ongoing transformation advisory retainer through PE hold period. Total engagement potential: \$5M - \$8M over 3-4 years - one of the largest opportunities in the pipeline.

9c. Enterprise Issues & Organizational Challenges

1. Geographic Silos Across 80 Countries Sedgwick's global operation grew through acquisitions and organic expansion, creating country-level operations with varying processes, technology platforms, and cultural norms. A claim handled in the UK follows different workflows, uses different systems, and reflects different service expectations than one handled in Australia, Germany, or Brazil. The CTO's mandate to drive "integrated transformation spanning digital, data, and enterprise processes" requires breaking down these geographic silos without destroying the local expertise that makes Sedgwick effective in each market. McChrystal's shared consciousness model - global visibility with local execution - directly addresses this.

2. Transformation Resistance at 33,000-Person Scale Claims adjusters, examiners, and administrators handle millions of claims annually through established workflows. Changing how 33,000 people work - new technology, new processes, new data requirements - creates enormous resistance. Padmanabhan's background at Wells Fargo and Bain gives him strategy credibility, but executing transformation across a globally distributed, claims-processing workforce requires organizational change management at a scale few firms have attempted. McChrystal's approach - building shared understanding of why the transformation matters, then empowering teams to adapt execution locally - is the proven framework for this scale.

3. PE Timeline Creating Transformation Urgency Without Organizational Readiness Carlyle's 2018 acquisition means the firm is 8+ years into ownership with enterprise value at \$13.2B. Whether Carlyle extends further, exits via sale, or pursues IPO, the PE timeline demands visible operational improvement. But transformation at 33,000-person scale takes years, not quarters. The CTO is under pressure to show results quickly while building sustainable change. McChrystal can help balance PE-speed expectations with organizational absorption capacity.

4. Cross-Border Claims Coordination Gaps Multinational clients expect seamless claims handling across borders - but Sedgwick's country operations evolved independently, creating coordination gaps. A global insurance program with claims in 15 countries may be handled by 15 independent Sedgwick teams with limited real-time information sharing. The new international CEO role (Paul White, January 2026) acknowledges this gap. McChrystal's cross-functional, cross-geographic coordination framework directly applies.

5. Technology Platform Fragmentation Decades of acquisitions created a patchwork of technology systems across countries and service lines. The CTO's digital transformation mandate requires platform consolidation - but technology change fails when organizational change management doesn't accompany it. McChrystal ensures the human operating system evolves alongside the technology platform.

6. Sales and Service Line Siloing The February 2025 sales reorganization signals that Sedgwick's service lines (casualty, property, marine, benefits, brand protection) were not cross-selling effectively. Clients who use Sedgwick for property claims may not know about (or have access to) marine or brand protection capabilities. This service-line siloing is an organizational coordination problem - exactly what McChrystal's shared consciousness model breaks down.

7. Acquisition Integration Fatigue Sedgwick has made numerous acquisitions across its growth trajectory. Each acquisition adds capability but also adds organizational complexity - different systems, cultures, workflows, and client relationships. Without a scalable integration model, the organization risks integration fatigue where each new acquisition creates more organizational entropy. McChrystal can design the repeatable framework.

9d. Expected Outcomes from McChrystal Group Engagement

1. Global Transformation Operating Model McChrystal would design and deploy a transformation communication and coordination architecture that connects CTO Padmanabhan's strategy to every country operation, service line, and functional team. Measurable result: achieve 80%+ colleague awareness and understanding of transformation priorities across all 80 countries within 6 months of implementation.
2. Cross-Border Claims Coordination Improvement Implement shared consciousness operating rhythms across multinational claims teams, enabling real-time information sharing and coordinated decision-making. Measurable result: reduce cross-border claims resolution time by 25-30% for multinational clients within 12 months.
3. Accelerated Technology Adoption Design organizational change management approach that builds buy-in for digital transformation at the claims-handler level. Measurable result: achieve 75%+ adoption of new digital tools within 6 months of deployment in pilot countries (vs. typical 40-50% for top-down technology mandates in distributed organizations).
4. Service Line Cross-Selling Improvement Build cross-service-line communication architectures that enable the new sales structure to identify and execute cross-selling opportunities. Measurable result: increase cross-service-line revenue per client by 15-20% within 12 months of the new sales structure deployment.
5. Transformation Speed Without Disruption McChrystal's framework would enable faster transformation execution while maintaining claims processing quality and client satisfaction. Measurable result: maintain claims quality metrics (NPS, cycle time, accuracy) at or above pre-transformation levels during the first 18 months of change.
6. PE Value Creation Acceleration Provide the organizational execution capability that converts Padmanabhan's transformation strategy into measurable operational improvement. Measurable result: contribute to 200-400 basis point EBITDA margin improvement over 24 months through organizational efficiency gains, supporting the PE value creation thesis.

9e. Key Stakeholders & Business Unit Map

Sedgwick (Global)

Leader: Michael Arbour

Function: CEO

McChrystal Relevance: Executive sponsor; controls strategic direction and advisory engagement

Transformation

Leader: Vishy Padmanabhan

Function: Chief Transformation Officer (since Sept 2025)

McChrystal Relevance: Top priority engagement target - owns the transformation mandate; his success depends on organizational change at 33K-person scale. Former Bain partner and Wells Fargo executive. Reports to CEO

International

Leader: Paul White

Function: CEO, International (since Jan 2026)

McChrystal Relevance: Priority target - owns 80-country international operation; cross-border coordination directly maps to McChrystal capability

U.S. Casualty & Specialty BD

Leader: Brad Krauss

Function: EVP, Head of Casualty & Specialty Business Development

McChrystal Relevance: Sales reorg leader; 30+ years industry experience; influential voice on organizational change

Finance

Leader: [To be confirmed]

Function: CFO

McChrystal Relevance: Budget authority for transformation investments

Human Resources

Leader: [To be confirmed]

Function: CHRO

McChrystal Relevance: Organizational change management, talent retention during transformation

Carlyle Group

Leader: [Board representative]

Function: PE Majority Owner

McChrystal Relevance: Controls strategic investment decisions and hold-period timeline

Altas Partners

Leader: [Board representative]

Function: Minority Investor (\$1B, Nov 2024)

McChrystal Relevance: Growth capital provider; expects operational improvement returns

Property Claims

Leader: [To be confirmed]

Function: Service Line Leader

McChrystal Relevance: Major service line; property claims drive significant revenue

Marine Claims

Leader: [To be confirmed]

Function: Service Line Leader

McChrystal Relevance: Specialized service line; cross-border coordination intensive

Brand Protection

Leader: [To be confirmed]

Function: Service Line Leader

McChrystal Relevance: Growing service line; requires cross-functional coordination with legal and PR teams

Priority engagement targets: (1) Vishy Padmanabhan, CTO - directly responsible for the transformation McChrystal can accelerate; (2) Paul White, CEO International - owns the cross-border coordination challenge; (3) Michael Arbour, CEO - executive sponsor.

9f. Opportunity Thesis

Strategic Signal Convergence - Why Now Carlyle ownership since 2018 -> enterprise value \$6.7B to \$13.2B ->

Altas Partners \$1B investment (Nov 2024) signals extended PE hold -> CTO Vishy Padmanabhan appointed (Sept 2025) to lead digital/data/process transformation -> U.S. sales team reorganized (Feb 2025) -> International CEO Paul White appointed (Jan 2026) -> Bottomline LSM acquisition (Mar 2025) adds integration complexity -> transformation mandate activates across 33,000 colleagues in 80 countries -> urgency to show results before eventual PE exit

The convergence is exceptional: a newly appointed CTO with a clear mandate, a new international CEO, a recent sales reorganization, and \$13.2B in enterprise value that must be justified through operational improvement. Every element creates demand for organizational transformation capability at global scale.

The Structural Paradox - Why McChrystal, Not McKinsey Padmanabhan's background at Bain means Sedgwick has access to world-class strategy capability. McKinsey or BCG could design the transformation roadmap. Accenture or Deloitte could implement the technology. But who builds the organizational operating system that gets 33,000 claims professionals across 80 countries to change how they work? This is not a strategy problem or a technology problem - it's a distributed leadership and coordination problem at massive scale. McChrystal's Team of Teams model was literally designed for this: maintaining shared consciousness and empowered execution across thousands of people in dozens of countries operating in different languages, time zones, and regulatory environments. No other firm can credibly claim expertise in organizational transformation at this geographic scale and operational complexity.

Phased Engagement Hypothesis - Land and Expand

Phase 1 (Months 1-4): Transformation Operating Model Diagnostic - \$750K - \$1M Scope: Partner with CTO Padmanabhan to assess current organizational readiness for transformation across 5-6 key country operations. Map communication architectures, decision-making patterns, and coordination gaps between headquarters, regions, and country operations. Deliver a "Global Transformation Readiness" diagnostic with specific recommendations for operating model design. Why this beachhead: The CTO is 6 months into his role with an enormous mandate and a PE timeline. He needs visibility into how the organization actually operates across 80 countries before he can design the transformation approach. McChrystal's diagnostic provides that visibility - and it positions us as the organizational execution partner for the entire transformation journey.

Phase 2 (Months 4-12): Regional Team of Teams Implementation - \$2M - \$3.5M Scope: Deploy shared consciousness operating rhythms across 3-4 priority regions (e.g., North America, UK/Europe, Asia-Pacific). Train 100+ regional and country leaders in McChrystal's decentralized execution framework. Design cross-service-line coordination mechanisms to support new sales structure. Implement cross-border claims coordination model for multinational clients. Expansion logic: Phase 1 diagnostic reveals specific coordination gaps and transformation resistance patterns that only McChrystal's distributed operations model can address at scale.

Phase 3 (Months 12+): Global Transformation Advisory - \$1M - \$2M/year Scope: Expand implementation to remaining countries. Ongoing transformation monitoring and leadership development. Integration support for each new acquisition. Cross-border coordination optimization.

Competitive Displacement Strategy Bain (Padmanabhan's former employer) has a relationship but operates at strategy level, not organizational execution. McKinsey/BCG may be advising Carlyle on value creation. Accenture/Deloitte are technology implementers. McChrystal enters through the CTO directly - his mandate is to champion "innovation and agility at scale," and he needs an organizational execution partner. Position McChrystal as complementary: "Bain designs the strategy; Accenture builds the technology; McChrystal builds the organizational operating system that gets 33,000 people to execute it." Procurement bypass: enter through the

CTO's transformation budget (separate from general consulting spend).

Multi-Threaded Pursuit Map

Thread 1: CTO Vishy Padmanabhan - Transformation Execution Target: Vishy Padmanabhan, Chief Transformation Officer Angle: "Your mandate spans digital, data, and enterprise processes across 33,000 colleagues. The technology and process design will come from your teams and partners. What's missing is the organizational execution model that gets 80 countries to adopt the new way of working. That's our specialty." Vector: Direct outreach. Padmanabhan's Bain background means he respects structured, data-driven approaches - frame McChrystal's model in those terms. Conference proximity at insurance/claims industry events.

Thread 2: International CEO Paul White - Cross-Border Coordination Target: Paul White, CEO International (since January 2026) Angle: "You're building a coordinated international operation from what was previously a collection of country businesses. McChrystal has helped organizations maintain shared consciousness and coordinated execution across dozens of countries and time zones." Vector: Direct outreach. International insurance industry events. McChrystal's military coalition experience directly relevant to cross-country coordination.

Thread 3: Carlyle Group / Board - PE Value Creation Target: Carlyle operating partner or board representative Angle: "Organizational execution capability is the bottleneck between your value creation thesis and operational reality. McChrystal provides the operating model that converts transformation strategy into measurable improvement across 33,000 people." Vector: PE operating partner networks; McChrystal relationships with PE firms. Carlyle portfolio company cross-referencing (has McChrystal worked with other Carlyle portfolio companies?).
